Companies beta US Copyright Group

The US Copyright Group is a company owned by intellectual property lawyers that has one singular mission and focus: to stop movie copyright infringement and make illegal downloaders pay damages for the content they have stolen. From Washington D.C. to Los Angeles, technology companies and a conglomeration intellectual property law firms work hand-in-hand with each other to end unlawful downloading and illegal file-sharing of films.

Our unique partnerships allow us to monitor filing sharing, uploads and downloading. Then, we obtain the infringers' identities through ISP subpoenas, finally resulting in "cease & desist" letters with a demand for payment of damages being sent to the illegal downloaders on a massive scale. Research suggests that once a copyright infringer is forced to pay settlement damages far in excess of the actual cost of the stolen content, he will never steal copyrighted material again. Through these methods, the US Copyright Group has the ability to recover losses for our clients and stop film piracy on a massive scale.
