Plot

Jack Carver, a former member of Germany's Special Forces, takes the journalist Valerie Cardinal to visit her uncle Max, on an island, where he works in a military complex. As the pair arrives, minions of Doctor Krieger capture Valerie. Jack does not care about her until his boat explodes. After his boat is destroyed, Jack finds out the true purpose of the facilities on the island: the creation of genetically modified soldiers.

Production

Uwe Boll gained the rights to a *Far Cry* movie, purportedly even before the game was released. In an October 2006 interview, Uwe Boll said that production on *Far Cry* would begin in May 2007.[1]

The *Far Cry series* has been heavily edited in Germany, where it was released in October 2008, to sub-par reviews.

Reception

Like many other video game adaptations by Uwe Boll, Far Cry was universally panned by fans and critics.
