### Action Steps | Personalized tips chosen for you based on your energy use and housing profile

#### Smart Purchase

Save a lot by spending a little

- Switch to compact fluorescent light bulbs (CFLs)**  
Incandescent bulbs are inexpensive but very inefficient. Compact fluorescent light bulbs (CFLs) offer both an easy and affordable way to save energy and money.

CFLs use 75% less energy and last ten times longer, saving you money on energy bills and replacement costs.

Find discounted CFLs and efficient light fixtures in retail stores displaying the Energy Efficiency Fund logo. Or check our online SmartLiving Catalog at [www.cl-p.com](http://www.cl-p.com).

SAVE UP TO  
**\$135** OVER BULB LIFE

#### Quick Fix

Something you can do right now

- Turn off lights when not needed**  
It's a common misconception that turning a light off and on consumes more energy than leaving it on all the time. This is not the case.

Turn off incandescent lights every time they are not needed. For compact fluorescent lights, it's cost effective to turn them off when you won't need them for 15 minutes or more.

Turning off unneeded lights can save energy and money.

SAVE UP TO  
**\$30** PER YEAR

#### Smart Purchase

Save a lot by spending a little

- Use solar outdoor lights**  
Outdoor lights often consume more electricity than your other light fixtures. To save money and energy, consider switching to solar lights.

Since solar outdoor lights don't need wires, installing them is easy and you can put them anywhere you want.

Solar outdoor lights do not get as bright as lights powered by your home's electricity, but they are bright enough to safely light paths and outdoor gathering areas.

SAVE UP TO  
**\$45** PER LIGHT PER YEAR
