

## 05-74891 3D Systems, Inc. v. Envisiontec, Inc., et al

## EXHIBIT C

D. Claim 35 of the '143 Patent

Claim 35 depends from claim 28 and limits the terms “receiving and form means” to “means for forming said object substantially layer by layer.” As limited, Claim 35 is rewritten as follows with disputed claim terms appearing in boldface:

35. (1) An apparatus for **producing a three-dimensional object** from a medium capable of selective physical transformation
- (2) upon **exposure to synergistic stimulation**
- (3) **from an object representation** specifying a first object surface to be spaced from a second surface by a spacing, and at least partially opposing the second surface, comprising:
- (4) at least one **computer programmed to form a support representation**
- (5) specifying a **removable support**
- (6) to be **formed in said spacing out of a material substantially layer by layer**,
- (7) said support in cross sectional width being **thin**, and comprising a solid which extends along a path connecting said first and second surfaces, the path having a vertical path component which is greater than any horizontal path component; and
- (8) **means for receiving said support representation, and for forming said three-dimensional object out of said medium substantially layer by layer and also for forming said support out of said material substantially layer by layer, in accordance with said object and support representations.**
