Looking for weather stickers and need help. My client has seem what's available on wunderground.com. Doesn't like any of them. He wants what's on yahoo.com. Of course the problem is you can't separate the weather infomation from the yahoo.com personal page.</p> <p>Any advice would be appreciated...Dennis</p> <p style="text-align: right;">Quote</p>

Hi again. I tried both wunderground.com and weather.com. The client doesn't like what's on wunderground.com. The rainbow cloud doesn't reflect actual weather. The weather.com has a nice sticker, but too big. I'd like to remove the zip code <form> prompt, but am afraid that would goof up their signup agreement.

Any advice would be appreciated...Dennis

P.S. Sorry for the double post. It's been a few days since my last post to this thread. Was worried the thread was too old and no one would read it.
