Re: United States Patent Nos. 6,212,833 and 6,447,392

To Whom It May Concern:

Our legal firm, Cozen O'Connor, represents DCI Products Inc. ("DCI") in various intellectual property matters, including the 'enforcement' of DCI's patent rights. DCI is the owner of certain patented devices and methods for venting structures having roofs, specifically those devices and methods covered by United States Patent Nos. 6,212,833 and 6,447,392.

It has come to our attention that your company is, or may be, interested in the subject matter of the above-referenced patents. We would be amenable to licensing this patented technology under an appropriate license agreement.

As you may be aware, our patent rights 'exclude' others from making, using, selling, modifying, importing, or advertising in any way any product covered by these patent rights. For example, the 'modification' of an existing 'non-infringing product' could bring that product within our patent rights. DCI Products may have advertising information to attest that the above information may be applicable to your company. Public 'display' and 'verbal dialogue' that may have happened at the International Builders Show 2006 along with previous communication attempts with no response could cause immediate action on our part.

Accordingly, please contact us at your earliest convenience to discuss this matter further. We look forward to hearing from you shortly.

Sincerely,

  
Jack Henderson  
President
