**DECLARATION OF WILLIE PARKER IN SUPPORT OF PLAINTIFFS’ MOTION FOR
TEMPORARY RESTRAINING ORDER AND/OR PRELIMINARY INJUNCTION**

Willie Parker, M.D., M.P.H., M.Sc., declares and states the following:

Background and Expertise

1. I am a board-certified obstetrician-gynecologist “(ob/gyn)” with over 20 years of experience in women’s health. I recently joined the Jackson Women’s Health Clinic (the “Clinic”) in order to provide abortions and contraceptive services, and I have been providing medical care there since June of 2012. I am currently licensed to practice medicine in

Mississippi, Alabama, the District of Columbia, Maryland, New Jersey, Pennsylvania and Virginia.

2. The information provided in this declaration is based on my personal knowledge, unless otherwise noted. The opinions in this declaration are my expert opinions as an ob/gyn and abortion provider. My expert opinions are based on my education, training, professional experience, review of relevant medical literature, and attendance at professional conferences.

3. As part of the ob/gyn care that I have provided to women over the past twenty years, I regularly delivered babies until 2009. Over the course of my career, I have delivered approximately 3,000 babies.

4. I began performing abortions in 2002, after listening to a sermon by Dr. Martin Luther King, Jr. about concern for the well-being of others, and grappling with my own spirituality and religious upbringing. I came to realize that many of my female patients needed my help due to their own serious health issues, discovery of fetal abnormalities, or other life circumstances. I have a decade of experience providing abortions, teaching evidence-based methods, and supervising the provision of abortion services in outpatient settings.

5. I received my undergraduate degree from Berea College in 1986, and my M.D. from the University of Iowa College of Medicine in 1990. I completed my residency in ob/gyn at the University of Cincinnati College of Medicine and Medical Center in 1994, and my residency in preventative medicine at UCSF School of Medicine in 2001. In 1998, I received a Master's of Public Health from the Harvard School of Public Health and a Master's of Science degree in health services research from the University of Michigan.

6. I received my board certification in ob/gyn in 1996 and I renewed my certification again in 2006. My certification is renewed annually, and was last renewed in December of 2011.

7. I have served as the Medical Director of Planned Parenthood of Metropolitan Washington and the Director of Family Planning at Washington Hospital Center. I currently have hospital admitting privileges at the Washington Hospital Center. I have taught at the University of Hawaii School of Medicine as an Assistant Professor of Obstetrics and Gynecology and as a Clinical Instructor at the University of Michigan Health Systems. I also have worked as an Epidemic Intelligence Service Officer with the Centers for Disease Control and Prevention and as the Chief of Policies and Programs in the Maternal Child Health Branch of the California Department of Health Services.

8. My experience and credentials are more fully set forth in my curriculum vitae, a true and accurate copy of which is attached hereto as Exhibit A.

9. Based on my clinical and academic experience, I am familiar with the professional norms and standards that govern the provision of abortion services in medical offices and clinics.

Abortion Care

10. At the Clinic, I currently provide medication abortions up to 8 weeks, as measured from the first day of the woman's last menstrual period ("LMP"), and surgical abortions up to 16 weeks LMP. In addition, I provide women with contraceptive services, including hormonal contraception. I also have training in providing vasectomies, tubal ligations, insertion of IUDs, and the Essure procedure, which I have provided to patients in other medical settings.

11. Women seek abortion services for a variety of medical, familial, economic and personal reasons. Most are mothers who have decided that they cannot parent another child at this time, and some are young women who do not feel ready to carry a pregnancy to term.

Others face serious health issues that make it dangerous to carry a pregnancy to term; are coping with abusive relationships; are pregnant as a result of rape, sexual assault, or incest; or have received a diagnosis of a fetal anomaly. Last week, I provided abortions at the Clinic to several women with health issues, including a patient with diabetes. A number of women I saw had traveled great distances in order to receive abortion care at the Clinic.

12. Legal abortion is an extremely safe medical procedure; it is one of the safest medical procedures performed in the United States. Because the risk of complication is so low, the vast majority of all abortions can be performed safely and effectively in an outpatient setting. Approximately 88% of women who obtain abortions in the United States do so before 13 weeks LMP.

13. In terms of the risk of maternal mortality, which is thankfully a rare occurrence in this country, abortion is dramatically safer than continuing a pregnancy to term. The overall risk of death following an abortion is a fraction of the risk incurred when continuing a pregnancy to term, and the risk is especially low prior to 16 weeks LMP.

14. The risk of a woman experiencing some type of complication after an abortion is also extremely low; less than 1% of women obtaining abortions experience a serious complication. The risk of a woman experiencing a complication that requires hospitalization is even lower, approximately 0.3%. Like the risk of mortality, the risk of a serious complication increases as a woman's pregnancy advances; therefore, the risk that a woman who is less than 16 weeks LMP will experience a complication requiring hospitalization is even lower than 0.3%.

15. The types of complications that may occur following an abortion include infection, non-threatening bleeding, uterine perforation, and retained tissue. In the vast majority

of cases, these types of complications can be handled in an outpatient office setting without the need for any hospitalization.

16. My complication rate for abortion patients requiring hospitalization over the past year was approximately 0.1%, which is lower than the national average. This rate is typical of my practice over the past 10 years.

Hospitalization and Admitting Privileges

17. House Bill 1390, which singles out doctors who perform abortions in an outpatient setting and requires them to have admitting privileges and staff privileges at a local hospital, imposes requirements that are not medically necessary and will not promote the health of women seeking abortions.

18. Multiple medical specialties, including ob/gyn, have adopted a hospitalist-ambulatory care model. Under this model, a patient who receives care in an ambulatory, i.e. outpatient setting, may be transferred, if medically indicated, to the care of a physician who can oversee the patient's care in a hospital setting, should that level of care become warranted.

19. In the event that a doctor makes the decision, using his/her medical judgment, to transfer a patient under his/her care to the care of another doctor who can treat the patient in a hospital setting, the accepting doctor then takes over the care of that patient. Typically, the accepting doctor would stay in regular contact and communication with the transferring doctor regarding the patient's care, regardless of whether the transferring doctor has admitting privileges at the accepting hospital. The Clinic's current system of having a backup physician available who could manage a patient's care in a hospital setting is more than what is medically required to address our patients' needs.

20. In the even more unlikely event that a patient was experiencing a serious complication while at the Clinic that required immediate hospitalization, the patient would be transferred by ambulance to a nearby hospital. For example, in the extremely rare case that a patient was experiencing an anaphylactic reaction to anesthesia and was not responding to acute measures, that patient's needs would best be met by being stabilized by the critical care team at the nearest emergency room who are trained to respond to such emergency situations.

21. Many of the Clinic's patients travel from great distances in order to be seen, and some even travel from out of state. Therefore, the nearest hospital or emergency room may not be in Jackson, and might not even be in the State. The fact that the doctor who performed an abortion on a patient has admitting privileges at a local Jackson hospital – which in many instances would not be the hospital nearest to the patient – would neither improve the quality of medical care that the patient receives nor increase patient safety. To the contrary, requiring a woman experiencing a medical emergency to return to Jackson in order to be admitted to a local hospital by the physician who performed her abortion would be medically inadvisable and counter to the patient's best interests.

22. Given the nature of the abortion care provided at the Clinic, and the current trend in health care to divide ambulatory and hospital care, House Bill 1390's requirement that all doctors associated with an abortion clinic hold hospital privileges is medically unnecessary, and will only harm women's health by decreasing or eliminating access to abortion services.

Harms Imposed by Mississippi House Bill 1390

23. I do not reside in Mississippi, but I travel to the Clinic approximately one week per month to perform abortions. I do not have hospital privileges at any hospital located within the State.

24. I am currently in the process of applying for privileges at local hospitals in Mississippi. I expect to submit all of the required paperwork and documentation within the next week. However, I do not expect that I will be granted any privileges on or before July 2, 2012.

25. Because I do not currently have privileges at a local hospital, as required by the recently-enacted House Bill 1390, I will soon be forced to stop providing the women of Mississippi with safe, legal abortion care unless this Court grants the Clinic emergency relief.

26. The burdensome requirements of House Bill 1390 will likely force the Clinic to close. If the Clinic is forced to shut down, many Mississippi women will be prevented from receiving safe and legal abortions. Others, including the Clinic's patients who have already been scheduled for procedures the week of July 2, 2012, will be forced to delay their abortions while seeking another licensed provider, if they can find one. To my knowledge, there are no other licensed providers within the state of Mississippi providing abortion services. Although abortion is a very safe procedure, its risks increase with gestational age; therefore, any delay in a woman's ability to obtain abortion care as a result of House Bill 1390 will expose her to unnecessary, increased health risks.

27. The requirements of House Bill 1390 are not necessary for the Clinic to continue providing safe, high-quality abortion care to its patients.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge.

Dated: June 26 2012

EDUCATION

- 9/2006-5/2008 **University of Michigan School of Medicine, Ann Arbor, Michigan.**
Masters of Health and Health Care Research. Degree awarded December, 2008.
- 7/1997-6/1998 **Harvard School of Public Health, Boston, Massachusetts.**
Master's of Public Health. Degree awarded June, 1998
- 6/1986-5/1990 **The University of Iowa College of Medicine, Iowa City, Iowa.**
Doctor of Medicine. May, 1990.
- 9/1981-5/1986 **Berea College, Berea, Kentucky.**
Bachelor of Arts. May, 1986. Major-Biology.
- 6/1984-8/1984 **Harvard University, Cambridge, Massachusetts.**
No degree. Summer, 1984.

POST DOCTORAL TRAINING

- 7/2006-6/2008 **Family Planning Fellowship, The University of Michigan, Ann Arbor MI,**
Department of Obstetrics & Gynecology.
- 7/ 2000- 6/2001 **Preventive Medicine Residency. University of California, San Francisco-
University of California, Berkeley Joint Program, San Francisco, CA.**
Residency in Preventive Medicine. Diplomate.
- 7/1998-6/2000 **Centers for Disease Control: Epidemic Intelligence Service, Atlanta,
Georgia.**
Placement Site: CA Department of Health Services, Maternal Child Health Branch, Sacramento CA. EIS Officer. Conducted acute disease outbreak investigation, analytic research, and provided technical assistance to local and regional health departments.
- 7/1990-6/1994 **The University of Cincinnati College of Medicine, Cincinnati, Ohio.**
Residency in Obstetrics and Gynecology.

ACADEMIC APPOINTMENTS

- 8/2008-5/2009 **Washington Hospital Center Residency in Obstetrics & Gynecology.**
Director, Division of Family Planning and Preventive Services.

- 7/2006-6/2008 **The University of Michigan, Ann Arbor MI.** Clinical Lecturer, Department of Obstetrics & Gynecology.
- 1/2002-5/2006 **John A Burns School of Medicine, University of Hawaii, Honolulu, Hawaii.** Assistant Professor, Department of Obstetrics and Gynecology.
- 4/1999-12/2001 **University of California-Davis Medical Center Obstetrics and Gynecology Residency Program, Sacramento, California..**
Volunteer Faculty appointment.

ACADEMIC ADMINISTRATIVE APPOINTMENTS

- 1/2003-4/2006 **Queen’s Medical Center, Honolulu, Hawaii**
OB-Gyn Peer Review Committee.

CLINICAL/HOSPITAL APPOINTMENTS

- 8/2008-present **Washington Hospital Center Residency in Obstetrics & Gynecology.**
Director, Division of Family Planning and Preventive Services.
- 7/2006- 6/2008 **University of Michigan Health Systems, Ann Arbor Michigan.**
Clinical Instructor, Department of Obstetrics and Gynecology.
- 1/2002-4/2006 **Queen’s Medical Center, Honolulu, Hawaii**
Attending Physician, Queen Emma Clinics.
- 6/2003-6/2006 **Sex Abuse Treatment Center, Kapiolani Medical Center for Women and Children, Honolulu, Hawaii.** Examiner for sexual assault in the community as part of a team response. Performed injury assessment, disease and pregnancy prevention screening and treatment, forensic examination, and expert testimony.
- 7/1994-6/1997 **Merced Community Medical Center, Merced California**
Staff Physician.
- 7/1994-6/1997 **Mercy Hospital, Merced, California**
Staff Physician.

EMPLOYMENT

6/ 2009- 7/2011

Planned Parenthood, Metropolitan Washington, Washington DC.

Medical Director. Responsible for clinical and laboratory services for this Affiliate operating five clinics in Maryland, Virginia, and the District of Columbia. Duties include family planning services, resident education, and conduct abortion care in the District of Columbia.

8/ 2008- 5/2009

Washington Hospital Center Residency in Obstetrics & Gynecology.

Director, Division of Family Planning and Preventive Services. Established family planning services, resident education, and conduct abortion care in the District of Columbia.

7/ 2006- 6/2008

University of Michigan Health Systems, Ann Arbor Michigan.

Clinical Instructor, Department of Obstetrics and Gynecology. General obstetrics and gynecology, resident education, and family planning/abortion care .

1/ 2002- 5/2006

John A Burns School of Medicine, University of Hawaii, Honolulu, Hawaii.

Assistant Professor, Department of Obstetrics and Gynecology. General obstetrics and gynecology, resident education, and family planning/abortion care .

5/ 2001- 11/ 2001

California Department of Health Services, Sacramento, California. Chief, Policy and Programs, Maternal Child Health Branch. Coordinated statewide identification and monitoring of resources associated with care of women and children; supervised a staff of 30 and accountable for a multimillion dollar budget; wrote reports as required by legislature.

- 8/1999-8/2000 **Sacramento Birthing Project: Sacramento CA.**
 Volunteer Clinician. Provided ambulatory, prenatal clinical services to high-risk/at-risk mothers in an urban setting with culturally sensitive interventions.
- 7/1994-6/1997 **National Health Service, Merced, California.**
 Placement Site: Golden Valley Health Centers Inc..
 Staff Obstetrician and Gynecologist. Practiced full range of general obstetrics and gynecology in a medically under-served area. Range of responsibilities clinically included limited “high risk” obstetrics and basic infertility evaluation and treatment.
- 8/1995-6/1997 **UC-Davis Affiliated Family Practice Residency Program, Merced, California.**
 Independent contractor. Taught obstetrics and gynecology to Family Medicine residents. Provided consultation, staffed gynecology outpatient clinics, provided intrapartum consultation and management.
- 8/1992-6/1994 **Our Ladies of Mercy Hospital, Anderson, Ohio.** House Physician. Duties involved assessment of obstetric patients, surgical assisting, and fetal monitoring interpretation.
- 6/1992- 6/1994. **The Jewish Hospital, Cincinnati, Ohio.** Duties identical to duties at Mercy Hospital, Anderson.

HONORS

Citizen of the Year, Men’s March Against Violence, Honolulu, Hawaii. 10/2004.

Berea College Outstanding Young Alumnus Award, 11/2001.

NAACP Freedom Fund Banquet, Community Service Award, Merced County.10/1996.

National Health Service Corps Director's Award. 10/1995.

V. Bradley Roberts Award, The Christ Hospital, Cincinnati, Ohio. 6/1994.

University of Cincinnati Esprit de Corps Award, 6/1994.

University of Cincinnati Resident Research Day, Third Place, 6/1993.

Executive Chief Resident, Department of OB-GYN 1993-94.

J. Bates Henderson Medicine Scholarship. Berea College, 1986.

E.R. Brann Good Citizenship Award and the Homer E. Williams Award for Promoting Interracial Understanding, Berea College, 1984.

TEACHING ACTIVITIES

Assistant Professor, Medstar/Washington Hospital Center Obstetrics and Gynecology Residency Program.

Clinical Instructor, University of Michigan School of Medicine, OB-Gyn Dept. 2006-2008

Faculty Advisor, Fourth Year Resident Class University of Hawaii Residency Training Program. 2004-2006.

Presenter, Merced County African-American Educators Association's Booker T. Washington Revisited Minority Student Career Fair. September, 1994, 1995, 1998.

Consultant, Merced County School Board Sex Education Curriculum Review Committee. 12/1995
