Subject: Internet Content Filtering Service for MOREnet Changes Vendors

Internet Content Filtering Service for MOREnet Changes Vendors

You are receiving this e-mail because your organization is a current subscriber of MOREnet's Internet Content Filtering (ICF) Service and this change will affect you.

Effective July 1, 2009, MOREnet filtering will use Netsweeper instead of the current provider, SmartFilter. This change means that current subscribers will need to make modifications to take advantage of Netsweeper filtering and to ensure continued filtering when SmartFilter expires June 30, 2009.

In early April, service renewal notices will be sent via e-mail to all organizational Institutional Representatives. Included in that e-mail will be a request to renew your ICF service with MOREnet. You *must* respond to this request to continue to receive filtering through MOREnet after June 30. Once your response is received, MOREnet staff will work with your organization to migrate to Netsweeper.

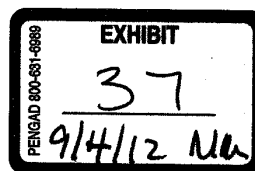

MOREnet will provide training and support for the Netsweeper solution, and conference sessions are already on the schedule for the Connections 2009 conference March 19-20 at Tan-Tar-A. Sessions are planned for both member-hosted and MOREnet-hosted solutions. Netsweeper will also be present at the conference to answer any questions.

For training sessions outside of the conference, please see our training schedule at <http://solutions.more.net/apps/training/schedule/>.

If you are unsure who is the Institutional Representative for your organization, go to Find My Contact at http://solutions.more.net/apps/find_contact/ncontact.html.

For more information about content filtering via Netsweeper, pricing and FAQ, go to www.more.net/netsweeper or contact MOREnet Technical Support.
