Subject: [Icf-mnethost] Changes to MOREnet Filtering Categories - Action ByYou Required

Dear MOREnet Hosted Internet Content Filtering Contact:

Due to concerns that have recently been raised regarding the operation of the Netsweeper "Alternative Lifestyles" category filter, MOREnet has reviewed and modified its default category filters and setup process for all new MOREnet Hosted service activations. As of August 1, 2011, the default category filters activated by MOREnet will only include: "Adult Image," "Pornography," "Phishing," "Proxy Anonymizer" and "Viruses."

As part of this service change, MOREnet must receive your Institutional Representative's written approval to activate these default category filters and/or other Netsweeper category filters on your behalf. Because you may have modified your category filters since MOREnet initially set-up your software, it is important that you authorize in writing the category filters you would like MOREnet to activate for you. All new MOREnet Hosted subscribers will be asked to do the same.

Concerns have been raised by several organizations regarding the operation of the "Alternative Lifestyles" category filter, including the ACLU as part of its "Don't Filter Me" initiative and the American Library Association. While MOREnet does not decide the content of filters or which filters are used by MOREnet members, it has determined based on its review of the currently available information that "Alternative Lifestyles" is no longer a category filter that will be activated by MOREnet staff. Any activation of this category filter within the Netsweeper software may only be completed by your local staff. In addition, should you require future changes to your filtering categories, with the exception of the "Alternative Lifestyles" category, MOREnet Technical Support can only modify your selections upon receipt of an email from your Institutional Representative with the specific category change(s) requested. MOREnet is not responsible for local decisions regarding filtering block or allow configurations.

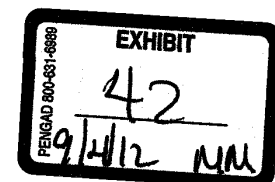

Action Required:

- Please print and complete the Category Configuration Form available at www.more.net/content/category-authorization-process-morenet-hosted. Instructions on how to review your current category filter settings are also available there.
- Fax the completed form, signed by your Institutional Representative, to MOREnet Technical Support at (573) 884-8917 no later than August 31, 2011.
- MOREnet Technical Support will modify your Netsweeper category filters to match *only* those selected on the signed form received from your organization.
- MOREnet Technical Support will notify you that the category filters have been updated to match your form.

It is important that MOREnet receive your written selection and authorization for the category filters as soon as possible. For your information, Netsweeper category definitions are also available at the link above.

Thank you for your prompt attention to this matter. For questions regarding this announcement, contact MOREnet Technical Support at help@more.net.

MOREnet-hosted Internet Content Filtering Order Form

Authorization for Category Configuration to Be Performed By MOREnet

Organization: Salem Public Library

Site: Salem, MO 65560

I understand that by default, MOREnet will activate the following content category blocks in Netsweeper that are among those designed to address CIPA-compliance and security practices:

- Adult Image
- Pornography
- Viruses
- Phishing
- Proxy Anonymizer

Further, I understand that upon request MOREnet will implement additional content filtering category blocks*, as per my organization's local policy and preference. (Place an "x" in the box next to each category you would like MOREnet to block for you.) See www.more.net/content/category-authorization-process-morenet-hosted for Netsweeper category definitions.

If at any time my organization should require changes to the MOREnet-hosted Internet Content Filtering service category configuration, I understand that these changes must either be configured locally or must be requested via an e-mail to MOREnet* at help@more.net from our organization's MOREnet Institutional Representative of record. My organization is responsible for determining the categories and individual websites that are allowed or blocked. MOREnet is not responsible for local decisions regarding filtering block or allow configurations.

*The Netsweeper *Alternative Lifestyles* filtering category may only be blocked or unblocked locally by your organization. MOREnet staff will not activate changes to this category on behalf of your organization.

Signature indicates authorization for MOREnet to proceed to activate the MOREnet-hosted Internet Content Filtering service with the default content filtering category blocks and any additional category blocks, as may be specified above.
