Excapsa Subsidiary Latest Licensee for Advanced Multimedia Technology; Industry Leader Gains Access to 1st Technology Patents

Business Wire, August 19, 2005

TORONTO -- Excapsa Software Inc., through its subsidiary Game Theory Ltd, a leading developer in the global gaming industry, announced today the signing of a license agreement with 1st Technology LLC covering core multimedia patents for advanced gaming products. The patents, developed by early multimedia pioneer Dr. Scott Lewis, CEO of 1st Technology, are targeted at providing enhanced interactivity and optimized delivery of high quality multimedia information over various bandwidth networks including narrowband and broadband telephone, cable, and wireless Internet.

gaming industry to assist in achieving both the advancement of technology compatible with 1st Technology's intellectual property and a superior level of multimedia performance and enjoyment for our licensee's customers."

"This technology license will enhance our intellectual property base providing us with the ability to deliver the highest quality multimedia information to our customers," said Robert DeMarco, Game Theory's General Manager. Dr. Lewis emphasized the importance of the relationship, stating, "We are pleased to have industry leader Game Theory as a technology licensee thereby providing technology to develop superior gaming products using 1st Technology's internationally recognized premier patent portfolio." In concluding the licensing agreement, Game Theory joins an elite list of the global gaming industry leaders who have agreements with 1st Technology LLC. Dr. Lewis added, "We look forward to working with other leading companies in the
