Employee was able to shoot, kill would-be robber (NV)

[Las Vegas Review Journal](#) ^ | 17 May, 2010 | MIKE BLASKY and BRIAN HAYNES

Posted on **Wednesday, May 19, 2010 5:20:18 AM** by [marktwin](#)

He was known as "Bill" to his friends, but to his wife, he was always "Chilly Willy."

"He was ripe, but he was getting better, like a bottle of wine," said Christine Burhoe, 58. "We didn't have kids. Neither of us could have any, but we always had each other. And I'm going to miss him."

William L. Burhoe, her husband of 16 years, was gunned down late Saturday night at the Super Mart convenience store where he worked as a clerk. But before he died, the 77-year-old shot and killed the would-be robber.

The coroner's office identified that man as Yendy Quinones, a 28-year-old who was paroled in October after serving 26 months for assault with a deadly weapon, according to prison records.

Las Vegas police said the gunman entered the store about 11:40 p.m. and placed a beer on the counter just before an altercation broke out and shots were exchanged.

Christine Burhoe said detectives told her that the robber, upon discovering he did not have enough money for beer, left the store. When he came back inside, he brought a gun and shot her husband, she said.

Christine Burhoe called the act "senseless" and said her husband would have paid for the man's beer had he asked.

"He would have paid for it and put his own money back in the drawer," she said. "All this, over a bottle of beer?"

America faces a big, fat Greek-style bankruptcy

[Las Vegas Review-Journal](#) ^ | May. 23, 2010 | WAYNE ALLYN ROOT

Posted on **Sunday, May 23, 2010 6:03:48 PM** by [neverdem](#)

Have you read the news lately? Greece is bankrupt. The entire country was poised to default on its debt when the European Union (led by Germany) and the IMF (led by the United States) decided to bail it out -- or risk the collapse of the entire EU and their currency, the euro.

As always happens anytime government is involved, the dollar figure necessary to save Greece keeps rising. First it was \$50 billion ... then \$100 billion ... now \$145 billion, the biggest loan to a country ever. Trust me, within a year it will become clear that \$145 billion is not nearly enough. Just like with AIG, GM, Fannie Mae, Freddie Mac and the failing public school system in America, the money we give Greece will never be enough. It's a bottomless pit.

But Greece is the EU's smallest problem. The other PIIGS (Portugal, Italy, Ireland and Spain) are in far deeper trouble. But those debts are all small when compared to the problems of France and the United Kingdom. There isn't enough money in the world to bail out the rest of Europe. We are staring at economic Armageddon.

So what caused this? Big government and government employee unions. Greece's problem is Europe's problem ... and following closely behind, America's problem, too. We're all Greeks now. Quite simply, Greece's problem starts and ends with government employee unions. There are too many government employees (one of every three Greek citizens works for government); their salaries are way too high; their bonuses can be described only as insane (2 months for each public employee); their pensions are ridiculous (retirement far too young and free health care for life); and their government jobs are guaranteed for life.

Sounds crazy, right? Sounds like in Greece the inmates must be running the asylum. Except America has the exact same problem. California, New York, New Jersey and Illinois are our very own homegrown versions of Greece. These states are bankrupt, insolvent and desperately need a bailout. Why? For the same reasons as Greece. Far too many government employees; bloated salaries for civil servants; bonuses and raises are contractually obligated even during an economic crisis; sky high pensions; and jobs guaranteed for life. The only difference is that we are a nation of 300 million, so the debt is far bigger than Greece. It turns out that we are Greece squared.

The solution to save America from economic Armageddon? Simple. Use the same "austerity measures" imposed upon Greece, in return for this \$145 billion loan, to dramatically cut spending on government employees:

- Freeze government hiring for the next three years.
- Eliminate bonuses and raises for the foreseeable future.
- Institute layoffs and across the board wage cuts. Why should government employees enjoy "privileged status" that no employee in the private sector enjoys?

- Change pensions from "defined benefit" to "defined contribution" pension plans, meaning retirees receive only what has been built up in their 401K type retirement accounts.
- Raise the retirement age. In Greece it is going from age 53 to 67. Gold-plated pension plans are the single biggest factor that bankrupted Greece. The same problem bankrupted U.S. automakers GM and Chrysler.
- Require government employees to pay more of their health care (through co-pays and deductibles).
- Change the way pensions are calculated by eliminating overtime and raises in the last years of employment to "game the system."

The real global threat to our existence isn't global warming -- it's catastrophic government spending and, more specifically, spending on government employees. Our government's unfunded liabilities are now estimated at \$60 trillion to \$75 trillion over the coming decades. To give you some perspective, the New York Post recently reported that one New York firefighter is retiring on a pension of \$240,000 per year. If he lives 40 years beyond retirement, that will cost the taxpayers almost \$10 million. That's for one single government employee.

There are millions of them on the federal, state and local level. It can only be described as a ticking time bomb that threatens to destroy our children's and grandchildren's future.

Nevada's economic future is clouded by this same crisis.

Government employees should be cheering the solutions I have laid out above. This plan might actually save their jobs and pensions. But keeping the status quo of unsustainable spending will sink this country -- in which case government employees will lose their jobs and pensions. Anything that saves our economy, will be healthier for them (as well as the rest of us) in the long run.

Government employees must wake up before they go for broke, and wind up broke. As usual, unions stand in the way of a sane solution.

It turns out that the Greek model is the American model. It turns out that we need saving too. We're all Greeks now. We either stop the insanity, or we wind up with our own big fat Greek bankruptcy.

Wayne Allyn Root, the 2008 Libertarian vice presidential nominee, writes from Henderson.

The libs assert that we are crying wolf with these doomsday scenarios. They say that only a little tweaking is necessary to fix Social Security. The new health care bill will fix Medicare and Medicaid. They do not have fix yet for ballooning federal and state pensions. However, the uniform fix for all excess government spending is confiscatory taxation. Our dear leader said that Social Security could be fixed by lifting the payroll tax ceiling.

The left's assertion is basically that the basic laws of economics no longer apply. The supply of a good (dollars and US bonds) will not impact their prices. I need some reprogramming as my economic education did not have an exception any good. I suppose that our dear leader can will this exception with his superior intellect, wit, and force of personality.

At some point, our too big to fail bubble will burst. Either our economic collapse will take most of the rest of the world with us or other nations will slowly become less dependent on our trade and their need for dollars.

The Greek tragedy is eerily similar to the Ohaha MO.

ITEM Non-stop socialism

ITEM Nationalized healthcare that broke the bank

ITEM Witness the extensive political power of dominant public sector unions....rioting in the streets, bringing the gov't down.

ITEM Ohaha reflexively bails out anything that has a union.

ITEM Greece paid Goldman Sachs \$300 million in fees for arranging the toxic 2001 transactions, according to several bankers.

ITEM "Professor Ohaha" knows nothing about int'l finance. But Wall Street Rahm Emanuel sits in OUR WH.....AND Rahm is a G/S toadie.

Goldman Sachs Will Be Sitting Pretty With Emanuel in the Obama White House

Timothy P. Carney, Examiner Columnist, November 21, 2008

EXCERPT Goldman Sachs always has clout in Washington, as evidenced by the firm's alumni serving as Treasury secretaries under both Presidents Bush and Clinton. Today, in these tumultuous times of bailouts and meltdowns when the investment banking leviathan needs Washington more than ever before, Goldman can leverage its most valuable asset yet—incoming White House chief of staff Rahm Emanuel. Traditionally a Democratic booster, and one of Barack Obama's top sources of funds in this past election, Goldman has always had some particularly strong allies within government.

Emanuel is one such ally.

An interesting early chapter in the Goldman-Rahm Emanuel relationship occurred during Bill Clinton's 1992 presidential campaign. Clinton hired Emanuel as his chief fundraiser. At the same time, however, Emanuel was on the payroll of Goldman Sachs, at \$3,000 per month to "introduce us to people," in the words of one Goldman partner at the time.

In his four terms in Congress, Emanuel raised \$74,750 from Goldman, making the firm his number four source of funds.

How has Emanuel helped Goldman? The most obvious answer, as mentioned in this column two weeks ago, is in Emanuel's lead role in shepherding the "\$700 billion" bailout—first proposed by former a Goldman CEO, Bush Treasury Secretary Henry Paulson—through the skeptical House.

In the Clinton days, Goldman benefited from NAFTA and the bailout of the Mexican currency, with Emanuel pushing NAFTA through Congress, and Rubin hammering out the peso bailout.

Did Goldman improperly funnel money to the Clinton campaign by subsidizing Emanuel's salary in 1992? Did Goldman's help to Clinton spur the Democratic president to push NAFTA and the Mexican bailout? The answers to these questions are opaque, and with Emanuel burrowed deep

within the Obama White House, the continued relationship between Goldman Sachs and Obama's right hand man won't be easy to follow.

CLUES Watch which regulations of Wall Street Obama fights for. Watch where the bailout money goes.

To: **All**

KEEP IN MIND Greece paid Goldman Sachs \$300 million in fees for arranging the toxic 2001 transactions that exploded the EU, according to several bankers familiar with the deal.

Here's how the G/S Wall Street predators operate domestically:

COMING TO A TOWN NEAR YOU Mother Jones magazine circa Feb 2007 reported on the activities of Mark Florian, Chief Operating Officer of Goldman Sachs' municipal finance division. According to the report, Florian was traveling to statehouses across the US to convince state officials that selling state assets would be "mutually beneficial." One of the scams involved "monetizing state roads. **NOTE WELL: Monetizing means G/S bonding (AKA taxpayer debt)---which earns \$billions for G/S til the end of time.**

Then-NJ Gov Corzine (ex-Goldman head) stationed Goldman Sachs functionaries in state government as the issue of road monetization surfaced. Corzine hired four G/S buddies, including G/S alumnus Bradley Abelow as state Treasurer. Corzine took a road show across the state to sell the monetization deal. However, monetizing NJ roads hit a large pothole and collapsed like a flat tire---b/c taxpayers were onto the G/S bonding-debt scam.

REFERENCE Goldman Sachs opened an office in Princeton NJ 2006 when Corzine was elected governor (the better to loot the NJ Treasury).

Goldman Sachs Hedge Fund Partners
701 Mount Lucas Rd
Princeton, NJ 08540-1911

G/S Hedge Fund Partners advertises it seeks investments in traditional infrastructure sectors including transport infrastructure such as "monetizing" toll roads, airports and ports as well as "monetizing" regulated gas, water and electrical utilities.

GOOD FOR GOLDMAN, BAD FOR AMERICA (G/S the major toll collector on govt's red-ink railroad)

BY TERRY KEENAN, anchor of Cashin' In, Fox News Sat 11:30 AM.

EXCERPT G/S morphed into a commercial bank to take advantage of gov't handouts, yet Goldman is really a hedge fund on steroids, with trading accounting for 69% of gross revenue in the first

quarter..... a big chunk of its trading involves US govt debt -- federal, state and local..... G/S has a huge vested interest in the US digging a deeper and deeper hole.....trading govt IOUs is big business.....one of the few growth markets on Wall Street. IPO's, M&A's, etc, have yet to recover but the US will borrow a record \$3.25 trillion in the current fiscal year -- four times as much as in 2008.

With its biggest competitors out of business, G/S is a major toll collector on Washington's red-ink railroad.....a "debt tsunami" that will lift Goldman's fortunes. G/S plays on the bankrupting of America -- the more we borrow, the more they make..... but the American public should know this side of the G/S profit miracle.

Through savvy trading and management, G/S set aside \$11.4B this year to compensate its employees on a playing field cleared of its top competitors and soon after Uncle Sam bailedout G/S with \$10B TARP -- and millions more through AIG, all paid for by taxpayers.

G/S benefits nicely from the govt borrowing binge that was triggered in part by the banking crisis that started in Wall Street's own backyard.
