**UNITED STATES DISTRICT COURT
DISTRICT OF NEVADA**

ERINDIRA ESPERANZA
GUZMAN-IBARGUEN, *et. al.*,

Plaintiffs,

vs.

SUNRISE HOSPITAL AND MEDICAL
CENTER, *et. al.*,

Defendants.

Case No. 2:10-cv-1228-PMP-GWF
Consolidated with:
Case No. 2:10-cv-1983-PMP-GWF

ORDER

**Motion to Compel Answers to
Interrogatories and Requests for
Production - #50**

This matter is before the Court on Plaintiffs’ Motion to Compel Answers to Interrogatories and Requests for Production (#50), filed on March 28, 2011; Defendant’s Opposition to the Motion to Compel (#58), filed on April 14, 2011; and Plaintiff’s Reply to Response to Motion to Compel (#59), filed on April 14, 2011. The Court conducted a hearing in this matter on May 10, 2011.

BACKGROUND

These consolidated actions arise out of the suicide of Plaintiffs’ decedent Oscar Mejia-Estrada on July 27, 2008 at Sunrise Hospital and Medical Center in Las Vegas, Nevada. The Plaintiffs filed their complaint in the United States District Court, Case No. 2:10-cv-1228, against Defendant Sunrise Hospital and Medical Center (“Sunrise”) on July 22, 2010. The amended complaint in this action alleges a claim against Sunrise for violations of the Emergency Medical Treatment and Active Labor Act (“EMTALA”), 42 U.S.C. § 1395(d)(2)(A) et seq. Plaintiffs also filed an action in the Nevada District Court against Sunrise, certain nurses and other employees of Sunrise, and Southwest Emergency Associates and Fremont Emergency for medical malpractice

1 under Nevada law. The Defendants removed this action to federal court on November 12, 2010.
2 *See Notice of Removal (#1), Exhibit A*, Case No. 2:10-cv-1983. The two actions were consolidated
3 into Case No. 2:10-cv-1228 on December 6, 2010. *Order (#27)*. The allegations in both actions
4 are essentially the same.

5 On July 25, 2008, an ambulance was dispatched to Harrah's [Hotel/Casino] in regard to a
6 report that an individual later identified as Oscar Mejia-Estrada was "displaying suicidal and
7 homicidal ideation." The ambulance attendants transported Mr. Mejia-Estrada to the Sunrise
8 Emergency Room for evaluation. The doctor and nurse(s) who examined and evaluated Mr. Mejia-
9 Estrada concluded that he did not have an "acute/emergent medical condition" and was not a
10 suicide or homicide risk. Mr. Mejia-Estrada was discharged from the Sunrise Emergency Room
11 approximately 1 hour and 2 minutes after his arrival. *Amended Complaint (#8)*, Case No. 2:10-cv-
12 1228, ¶¶ 15-21. *See also Plaintiffs' Motion to Compel (#50), Exhibit 2, Affidavit of Plaintiff's*
13 *Expert Medical Witness Dr. Paul Bronston ("Bronston Affidavit"), ¶¶ 5-14.*

14 Mr. Mejia-Estrada returned to the Sunrise Emergency Room on July 27, 2008 at 12:40 A.M.
15 accompanied by family members. The hospital records stated that the reason for this return visit
16 was: "Depressed anxious here 2 day." *Bronston Affidavit*, ¶ 15. Mr. Mejia-Estrada was examined
17 and evaluated by a triage nurse and by a Dr. Weng. Mr. Mejia-Estrada appeared to have altered
18 thought processes, and reported restlessness and anxiety that was moderate in severity. He denied
19 suicidal ideation or plan. He also appeared agitated, had hyperactive body language and respiratory
20 distress was present. The hospital staff concluded that Mr. Mejia-Estrada did not have any physical
21 illness or injury, but based on his chief complaints of depression and anxiety, he was assessed as a
22 suicide risk. *Bronston Affidavit*, ¶ 23. Dr. Weng executed a form at 2:30 A.M. giving medical
23 clearance for Mr. Mejia-Estrada to have a psychiatric evaluation and also admitting him to the
24 hospital for appropriate medical care. The Emergency Room nurse initiated "suicide precautions"
25 at or about 5:25 A.M., which apparently required that Mr. Mejia-Estrada be checked at 15 minute
26 intervals. Mr. Mejia-Estrada was issued a hospital gown and socks and he remained in the hospital
27
28

1 emergency department awaiting a mental health evaluation. *Bronston Affidavit*, ¶¶ 25-26.¹

2 At 12:45 P.M. a nurse assistant found Mr. Mejia-Estrada lying face down with his hands
3 folded under him. He was unresponsive and had a faint pulse. The nurse assistant called security,
4 who in turned contacted an Emergency Room nurse. A respiratory technician examined Mr. Mejia-
5 Estrada and found two socks stuck in his mouth or throat. Efforts to revive Mr. Mejia-Estrada were
6 unsuccessful and he was pronounced dead at or about 1:00 P.M. *Bronston Affidavit*, ¶¶ 27, 33-39.
7 Plaintiffs allege that Defendants failed to properly monitor Mr. Mejia-Estrada or to timely initiate
8 efforts to revive him.

9 Plaintiffs' counsel sent a letter to Sunrise's risk management department on September 11,
10 2008, notifying it that his law firm represented all of the heirs of Mr. Mejia-Estrada arising out of
11 all claims for his death on July 27, 2008 and offering to settle the heirs' claims for Sunrise's
12 liability insurance coverage limits. *Defendants' Opposition to Motion to Compel* (#58), *Exhibit B*.
13 Plaintiffs' counsel also filed a complaint against Sunrise with the Nevada Department of Health
14 and Human Services (NV-DHHS) based on Sunrise's alleged violation of its emergency care
15 obligations under 42 CFR § 489.24.² The NV-DHHS conducted a survey of Sunrise on August 6,
16 2008 in regard to the allegation of noncompliance and thereafter reported its findings to the United
17 States Department of Health and Human Services/Centers for Medicare and Medicaid Services
18 ("HHS-CMS"). *See Motion to Compel* (#50), *Exhibit 3*, *HHS-CMS's October 19, 2008 letter to*
19 *Plaintiffs' counsel and HHS-CMS's October 19, 2008 letter to Sunrise Hospital*.

20 In its October 19, 2008 letter to Sunrise, HHS-CMS stated that it had preliminarily
21 determined that Sunrise had violated 42 CFR § 489.24 by failing to provided an appropriate
22 medical screening examination and that its Medicare program provider agreement was therefore

23
24 ¹ According to Defendant's Countermotion for Summary Judgment (##56, 57), page 3, Mr.
25 Mejia-Estrada was placed in the "Discharge and Observation Unit" at 5:25 A.M. to wait an
evaluation by the Southern Nevada Adult Mental Health agency.

26 ² This regulation incorporates the requirements of 42 U.S.C. § 1395dd which, as discussed
27 herein, requires hospital emergency departments to conduct a medical screening of all patients and,
28 if it is determined that the patient has an emergency medical condition, to stabilize that condition
before the patient is discharged or transferred to another facility.

1 subject to termination. HHS-CMS stated that Sunrise could avoid termination of its provider
2 agreement and public notice of the same by “providing credible allegation or credible evidence of
3 correction of the deficiencies or by successfully proving that the deficiencies did not exist.”

4 *Plaintiffs’ Exhibit 3.* Sunrise submitted a written response and plan of correction to HHS-CMS on
5 October 28, 2008. *Motion to Compel (#50), Exhibit 4.* In its response letter, Sunrise stated that
6 “[t]he actions taken to correct the deficiencies include review and revisions, when appropriate, to
7 the policies and procedures relating to EMTALA regulations, Medical Screening Examinations and
8 patient monitoring.” *Id.* In its responses on the HHS-CMS Statement of Deficiencies form,
9 Sunrise further stated:

10 The Hospital initiated an internal review and in depth root cause
11 analysis of this case on July 27, 2008. Sunrise Hospital and Medical
12 Center does not have licensed psychiatric beds. As the Hospital does
13 not provide psychiatric services, the Hospital does not have a
14 psychiatrist listed in the physician ED on call roster. All of the
15 Sunrise ED physicians are qualified and competent to perform a
16 Medical Screening Examination (MSE) to determine if an
17 Emergency Medical Condition (EMC) related to a psychiatric
18 condition is present.

15 Sunrise further stated:

16 A Medical Screening Exam was performed on this patient, and was
17 still in progress at the time of the patient’s death. The ED Physician
18 determined as required by NRS. 433A.170 (See Exhibit B1) and
19 noted on the Nevada Legal 2000 (L2K) R form (See Exhibit B2), the
20 patient had “no medical disorder or disease other than a psychiatric
21 problem that required hospitalization.” As part of the ongoing MSE,
22 monitoring was required. The patient was placed in the Emergency
23 Department Discharge Observation Unit (DOU) to await evaluation
24 by the County Mobile Crisis providers. Staff assigned to this
25 geographic location do not have responsibility for other patients.

22 *Plaintiffs’ Exhibit 4, Sunrise’s response to Statement of Deficiencies, pages 1, 3.*

23 Plaintiffs served Requests for Production of Documents on Defendant Sunrise which seek
24 practically every document in its possession, custody or control that contains information about Mr.
25 Mejia-Estrada’s visits to Sunrise Hospital, including any and all witness statements and
26 investigation reports. *See Motion to Compel (#50), Exhibit 5, Defendant Sunrise Hospital’s*

1 *Responses to Requests for Production Nos. 1, 2, 7, 15, 16, 21, 22, and 32.*³ Sunrise objected to
2 these requests on the grounds that they seek “information protected by the Peer Review Patient
3 Safety and Quality Assurance Committees Privilege pursuant to Nevada Revised Statute [NRS]
4 49.117, 49.119, 49.265, 439.860 and 439.875.” *Id.* Sunrise also objected to Request Nos. 1, 2, 7
5 and 15 on the grounds that the requests seek information protected by the attorney-client privilege
6 and attorney-work product doctrine. In addition to objections based on privilege, Sunrise objected
7 that the requests are over broad and ambiguous as to time and scope.

8 Plaintiffs argue that the Nevada statutory privileges do not apply in a federal action alleging
9 claims arising under federal law and that there are no comparable medical peer review or self
10 analytical privileges recognized under federal common law. Plaintiffs also argue that Defendants
11 have not provided a privilege log or other evidence to support their claims of attorney-client
12 privilege or work-product immunity.

13 **DISCUSSION**

14 **1. Scope of State Law privileges Asserted by Defendants**

15 The Court first addresses the Nevada statutory privileges asserted by Defendants and the
16 scope of those privileges under Nevada law. In their objections to Plaintiffs’ requests for
17 production, the Defendants asserted the medical peer review privilege under NRS 49.117, NRS
18 49.119 and NRS 49.265. NRS 49.117 and NRS 49.119 apply to the proceedings of a “review
19 committee” which includes an organized committee of a hospital responsible for evaluating and
20 improving the quality of care rendered by the parent organization or “a peer review committee of a
21 medical . . . society.” *See* NRS 49.117.1 and 2. Pursuant to NRS 49.119, a review committee has a
22 privilege to refuse to disclose and to prevent any other person from disclosing its proceedings and
23 records and testimony given before it.

24 NRS 49.265 more specifically grants a privilege in regard to the proceedings of organized
25 committees of hospitals and other organizations that provide emergency medical care which have
26

27 ³ Request No. 32 seeks reports relating to any other medical malpractice and EMTALA
28 cases which occurred during the five years preceding the incident involving Mr. Mejia-Estrada.

1 responsibility for evaluating and improving the quality of care. The Nevada Supreme Court has
2 stated that this statute should be narrowly construed and that it is “‘extremely limited’ in scope.”
3 *Columbia/HCA Health Care v. District Court*, 113 Nev. 521, 530, 936 P.2d 844, 848-849 (1997);
4 *Ashokan v. State, Dep’t. of Ins.*, 109 Nev. 662, 668, 856 P.2d 244, 247 (1993). The purpose of the
5 statute is to protect only the internal operations of peer review committees. *Columbia/HCA*, 113
6 Nev. at 530, 856 P.2d at 850. The Court quoted with approval the decision by the North Dakota
7 Supreme Court in *Trinity Medical Ctr. v. Holum*, 544 N.W.2d 148, 157 (N.D.1996) which stated
8 that the privilege is limited to protecting only the formal proceedings before the committee and the
9 internal records generated by the committee. This would include testimony given to the committee
10 at the hearing, the deliberations and discussions of the committee members, and the minutes of
11 committee meetings. The privilege does not include other information or data provided to the
12 committee or collected for the committee’s review by hospital departments and employees.
13 *Columbia/HCA*, 113 Nev. at 529, 856 P.2d at 849. Thus, “occurrence reports” prepared by the
14 hospital are not protected by the statute.

15 Although Defendants asserted the foregoing statutory privileges in their objections to
16 Plaintiffs’ discovery requests, they state in their opposition to the motion to compel that no *peer*
17 *review* investigation was actually conducted in regard to Mr. Mejia-Estrada’s suicide. They assert,
18 instead, that an investigation, which they characterize as a “Root Cause Analysis” or “RCA,” was
19 conducted pursuant to Nevada Revised Statutes (NRS) 439.800-439.890 and that the reports and
20 other documents and information compiled or disseminated as part of that investigation are
21 privileged under NRS 439.860.⁴ See *Opposition to Motion to Compel* (#58), page 7.

22 NRS 439.800 et seq. imposes certain reporting and investigation duties on hospitals and
23 other “medical facilities” concerning “sentinel events.” NRS 439.830 defines a sentinel event as

24
25 ⁴NRS 439.860 provides that “any report, document and other information compiled or
26 disseminated pursuant to the provisions of NRS 439.800 to 439.890, inclusive, is not admissible in
27 evidence in any administrative or legal proceeding conducted in this State.” As discussed herein,
28 the statutory privileges from disclosure during discovery or otherwise are actually set forth in NRS
439.840.2 and NRS 439.875.2.

1 “an unexpected occurrence involving facility acquired infection, death or serious physical or
2 psychological injury or the risk thereof.” NRS 439.837 requires the medical facility to conduct an
3 investigation concerning the causes or contributing factors of a sentinel event and implement a plan
4 to remedy them. NRS 439.870 requires a medical facility to designate an officer or employee to
5 serve as patient safety officer, whose duties include taking such action as the officer determines
6 necessary to ensure patient safety as the result of an investigation of a sentinel event.

7 Pursuant to NRS 439.835(1)(a), an employee of a medical facility is required to notify the
8 patient safety officer of a “sentinel event” within 24 hours after becoming aware of it. The patient
9 safety officer is required to report the date, the time, and a brief description of the sentinel event to
10 the state Health Division within 13 days after the officer is notified of the event. NRS
11 439.835.1(b). The patient safety officer is also required to report sentinel events that he or she
12 personally discovers. NRS 439.841.1 provides that upon receipt of a report pursuant to NRS
13 439.835, the Health Division may request additional information regarding the sentinel event or
14 conduct an audit or investigation of the medical facility.

15 NRS 439.843.1 also requires medical facilities to provide the Health Division with an
16 annual summary of the reports submitted by the medical facility to the Health Division during the
17 immediately preceding calendar year. The summary must include the total number and types of
18 sentinel events reported by the facility, a copy of the facility’s patient safety plan, a summary of the
19 membership and activities of the patient safety committee and “any other information required by
20 the State Board of Health concerning the reports submitted pursuant to NRS 439.835.”

21 NRS 439.840.2 states:

22 Except as otherwise provided in this section and NRS 239.0115,
23 reports received pursuant to NRS 439.835 and subsection 1 of NRS
24 439.843 and any additional information requested by the Health
25 Division pursuant to NRS 439.841 are confidential, not subject to
subpoena or discovery and not subject to inspection by the general
public.

26 The Nevada Supreme Court has yet to construe NRS 439.840.2. The Court has generally
27 stated that privileges should be narrowly construed because they are exceptions to the principle that
28 courts are entitled to “every man’s evidence” and are in derogation of the search for truth. *Ashokan*

1 v. *State, Dep't. of Ins.*, 109 Nev. at 668, 856 P.2d at 247, citing *United States v. Nixon*, 418 U.S.
2 683, 710 (1974). NRS 439.840.2 plainly provides that the reports received by the Health Division
3 pursuant to NRS 439.835 and NRS 439.843.1 are confidential and the Health Division cannot be
4 compelled to produce them by subpoena or other methods of discovery. The medical facility that
5 prepares reports and sends them to the Health Division pursuant to NRS 439.835 and NRS
6 439.843.1 should also be protected from being required to produce these reports. Otherwise, the
7 confidentiality accorded to such reports would be rendered meaningless.

8 NRS 439.840.2 also plainly provides that additional information requested by the Health
9 Division cannot be obtained from the Health Division by subpoena or other methods of discovery.
10 Consistent with *Columbia/HCA Health Care v. District Court*, however, this provision does not
11 provide a cloak of confidentiality to otherwise non-privileged documents or information in the
12 possession, custody or control of the medical facility. For example, a medical facility is not
13 shielded from being required to produce relevant medical records merely because it provided the
14 records to the state Health Division pursuant to a request under NRS 439.841.1.

15 NRS 439.875 also requires the medical facility to establish a patient safety committee
16 whose members must include the patient safety officer. Pursuant to NRS 439.870, the patient
17 safety officer is required to report to the patient safety committee any action he or she has taken to
18 ensure patient safety as a result of an investigation of a sentinel event. The patient safety
19 committee is required to evaluate the actions of the patient safety officer in connection with all
20 reports of sentinel events, review and evaluate the quality of measures taken by the medical facility
21 to improve the safety of patients, make recommendations to the executive or governing board of the
22 facility to reduce the number and severity of sentinel events and provide the executive or governing
23 board with a quarterly report regarding the number of sentinel events that have occurred during the
24 preceding quarter, and any recommendations to reduce the number and severity of sentinel events.

25 NRS 439.875.2 states as follows:

26 The proceedings and records of a patient safety committee are subject
27 to the same privilege and protection from discovery as the
28 proceedings and records described in NRS 49.265.

...

1 Because this statute incorporates the privilege granted in NRS 49.265, it should be given the
2 same narrow construction that the Nevada Supreme Court placed on NRS 49.265 in
3 *Columbia/HCA Health Care v. District Court* and *Ashokan v. State, Dep't. of Ins.* In order for
4 Sunrise to invoke the privilege under NRS 439.875.2, it must also show that it has appointed a
5 patient safety officer and established a patient safety committee in compliance with NRS 439.875.1
6 and that the documents and information it seeks to protect from disclosure were generated for the
7 proceedings of the patient safety committee. *See Zander v. Craig Hospital*, 743 F.Supp.2d 1225,
8 1232 (D.Colo. 2010) (in order to establish that information was privileged under the state's "quality
9 management privilege," the hospital was required to show, at minimum, that (1) it has a quality
10 management program which has been approved by the state agency and (2) the information claimed
11 to be privileged was obtained and maintained in accordance with the approved program.).

12 Before determining whether the documents and information withheld by Defendants are
13 within the scope of these privileges, the Court must first determine whether there is a comparable
14 privilege under federal law or whether the foregoing state law privileges should be applied in this
15 action.

16 **2. There is No Medical Peer Review or Self Critical Analysis Privilege**
17 **Under Federal Common Law.**

18 Rule 501 of the Federal Rules of Evidence provides that the federal law of privilege applies
19 unless state law supplies the rule of decision as to the claim or defense, in which case the state law
20 of privilege applies. Where the complaint alleges both substantive federal and state law claims
21 concerning the same alleged conduct, the federal law of privilege controls. *Agster v. Maricopa*
22 *County*, 422 F.3d 836, 839-40 (9th Cir. 2005), citing *Wm. T. Thompson Co. v. Gen. Nutrition Corp.*,
23 671 F.2d 100, 104 (3d Cir. 1982). *See also Williams v. University Medical Center*, — F.Supp.2d
24 —, 2010 WL 5564639, *2, (D.Nev. 2010), citing *Religious Technology Center v. Wollersheim*, 971
25 F.2d 364, 367 n.10 (9th Cir. 1992).

26 In *Agster v. Maricopa County*, 422 F.3d 836 (9th Cir. 2005), the plaintiffs' decedent died
27 after being placed in a "restraint chair" while incarcerated in the county jail. The entity, whose
28 employees had given medical care to the decedent, was obligated to undertake a mortality review

1 by its own policies and by the standards of “the National Commission on Correctional Health Care
2 Standards for Health Services in Jails.” The review was designated a “Critical Incident Report”
3 and was intended to be and was kept confidential. The plaintiffs brought suit in state court against
4 the county, the sheriff’s office and certain individuals. Although the decision does not state what
5 specific legal claims were alleged, the plaintiffs presumably alleged a federal civil rights claim.
6 The county removed the action to federal court. During discovery, the district court overruled the
7 defendants’ objection to producing the “Critical Incident Report” based on Arizona’s statutory peer
8 review privilege.

9 In affirming the district court’s order, *Agster* noted that no case in the Ninth Circuit had
10 recognized a federal “peer review privilege.” *Agster*, 422 F.3d at 839. The court acknowledged
11 that it has the power to create a new privilege as a matter of federal common law where a public
12 good transcending the normally predominate principle disfavoring testimonial privileges justifies
13 recognizing a new privilege. *Id.* citing *Jaffee v. Redmond*, 518 U.S. 1, 9, 116 S.Ct. 1923, 135
14 L.Ed.2d 337 (1996). The court, however, declined to recognize a federal peer review privilege
15 based on two considerations. First, the court stated that it was reluctant to recognize a privilege in
16 an area where it appears that Congress has considered the relevant competing concerns, but has not
17 provided the privilege itself. *Id.* citing *Univ. of Pennsylvania v EEOC*, 493 U.S. 182, 189, 110
18 S.Ct. 577, 107 L.Ed.2d 571 (1990). The Court noted that the federal Health Care Quality
19 Improvement Act, 42 U.S.C. § 11101, et seq., grants immunity to participants in medical peer
20 reviews, but does not “privilege the report resulting from the process.” Congress also did not grant
21 a privilege when it later amended that Act to make clear that it does not preempt state peer review
22 laws. The court concluded: “As Congress has twice had occasion and opportunity to consider the
23 privilege and has not granted it either explicitly or by implication, there exists a general objection
24 to our doing so.” *Id.*

25 *Agster* also declined to recognize the privilege in the circumstances of that case which
26 involved a report bearing on the death of a prisoner in state custody. The court stated that in the
27 ordinary hospital it may be that the first object of all involved in patient care is the welfare of the
28 patient. In the prison context, however, the safety and efficiency of the prison may operate as goals

1 that affect the care offered, and “it is peculiarly important that the public have access to the
2 assessments by peers of the care provided.” *Id.*

3 In *Williams v. University Medical Center*, — F.Supp.2d —, 2010 WL 5564639 (D.Nev.
4 2010), the court also declined to recognize a federal medical peer review privilege. The plaintiff in
5 *Williams* alleged that the county hospital and other defendants wrongfully revoked his medical staff
6 privileges. His complaint alleged federal causes of action for violation of his Fourteenth
7 Amendment rights under 42 U.S.C. §1983 and for violation of the Sherman and the Clayton Acts.
8 The complaint also alleged pendent state law claims. In declining to recognize a federal peer
9 review privilege, the court cited *Agster*’s statement that no case in the Ninth Circuit has recognized
10 a federal medical peer review privilege and that Congress did not create such a privilege when
11 given the opportunity to do so. *Williams* also noted that although at least forty-six states have
12 enacted laws prohibiting the disclosure of peer review materials, the vast majority of federal courts
13 have rejected the creation of a federal common law medical peer review privilege. *Id.* at *4, citing
14 *Virmani v. Novant Health Inc.*, 259 F.3d 284 (4th Cir. 2001) and *Memorial Hospital for McHenry*
15 *County v. Shadur*, 664 F.2d 1058 (7th Cir. 1981). *Williams* also cited numerous federal district
16 court decisions that have declined to recognize the privilege.

17 Defendants argue that the “root cause analysis” privilege they seek to assert in this case is
18 different from a “peer review” privilege relating to the granting or revoking of medical staff
19 privileges—which Congress did not grant when it enacted the Health Care Quality Improvement
20 Act. Accordingly, they argue that *Agster* does not preclude the recognition of a common law “root
21 cause analysis” or critical self analysis privilege. The investigation at issue in *Agster*, however,
22 was substantially similar to the type of investigation at issue in this case—i.e, an investigation
23 relating to the adequacy of the medical care provided to a particular patient. *Agster* is therefore not
24 distinguishable from this case based on the type of investigation or report involved. Secondly,
25 although the specific focus of medical peer review and “root cause” analysis investigations may be
26 different, their basic purpose is the same—patient safety and the quality of medical care.

27 This Court finds no reason to distinguish or depart from *Agster*, *Williams* and the majority
28 of federal court decisions that have refused to recognize federal common law privileges in this area.

1 The Court, therefore, declines to recognize a federal medical peer review privilege or a federal
2 privilege relating to a hospital’s investigation concerning the adequacy of medical care provided to
3 a particular patient. Accordingly, Sunrise’s Root Cause Analysis (RCA) report is not privileged
4 from discovery under federal common law.

5 **3. Application of State Law Privileges in a Federal Civil Action.**

6 Defendants assert that the sentinel event investigation or RCA “is clearly a state created
7 issue that requires the application of state law.” *Opposition* (#58), page 9. In support of this
8 assertion, Defendants cite *Zander v. Craig Hospital*, 743 F.Supp.2d 1225 (D.Colo. 2010) and
9 *William Beaumont Hospital v. Medtronic, Inc.*, 2010 WL 2011495, *4 (E.D.Mich. 2010). *Zander*
10 *v. Craig Hospital*, however, clearly involved the application of a state privilege to claims governed
11 by state law. In construing and applying Colorado’s statutory “quality management privilege,” the
12 court explicitly stated that plaintiff’s claim was ““based upon a state cause of action as to which
13 state law controls the determination of privilege.”” *Zander*, 743 F.Supp.2d. at 1230, citing *White v.*
14 *American Airlines*, 915 F.2d 1414, 1424 (10th Cir. 1990). In *William Beaumont Hospital v.*
15 *Medtronic, Inc.*, the court construed and applied Michigan’s statutory peer review privilege. The
16 case did not discuss Fed.R.Evid. 501 or even describe the specific legal claims in the action. There
17 is no reason to believe that the court applied the Michigan peer review privilege to claims arising
18 under and governed by federal law.

19 A number of federal district court decisions have addressed the issue of whether state law
20 peer review or similar privileges apply in an action alleging a claim under EMTALA and state
21 claims for negligence or medical malpractice. *Bennett v. Kent County Memorial Hospital*, 623
22 F.Supp.2d 246 (D.R.I. 2009); *Moses v. Providence Hospital and Medical Centers, Inc.*, 2007 WL
23 1806376 (E.D.Mich. 2007); *Guzman v. Memorial Hermann Hospital System*, 2009 WL 427268, *5
24 (S.D.Tex. 2009) and *Atterberry v. Longmont United Hospital*, 221 F.R.D. 644 (D.Colo 2004). As
25 these cases demonstrate, a cause of action under EMTALA is not equivalent to a common law
26 claim for medical malpractice. In deciding whether state law privileges applied, the courts in these
27 cases considered whether the documents or information withheld by defendants on privilege
28 grounds were relevant to the plaintiffs’ EMTALA claims, or were instead only relevant to the

1 negligence or malpractice claims governed by state law. This Court therefore begins with a
2 discussion of the scope of a claim pursuant to EMTALA.

3 In *Baker v. Adventist Health, Inc.*, 260 F.3d 987, 993, (9th Cir. 2001), the Ninth Court stated
4 that “Congress enacted EMTALA to respond to the specific problem of hospital emergency rooms
5 refusing to treat patients who were uninsured or who could otherwise not pay for treatment. In
6 such situations, emergency rooms would either decline to provide treatment or transfer patients in
7 an unstable condition to other hospitals, thereby jeopardizing patients’ health.” The EMTALA
8 statute imposes two duties on hospital emergency rooms. The first duty is to screen a patient for an
9 emergency medical condition, and if an emergency condition is found, the hospital has a duty to
10 stabilize the patient before transferring him to another medical facility or discharging him. *Id.* at
11 992.

12 The statute defines an “emergency medical condition,” in part, as “a medical condition
13 manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the
14 absence of immediate medical attention could reasonably be expected to result in (i) placing the
15 health of the individual in . . . serious jeopardy.” Under applicable regulations, a psychiatric
16 disturbance may constitute an emergency medical condition. *Baker*, 260 F.3d at 992, n. 1, citing 42
17 U.S.C. §1395dd(e)(1)(A) and 42 CFR §489.24(b)(i). The hospital’s duty to stabilize arises only
18 when it actually detects an emergency medical condition. “Stabilize means . . . to provide such
19 medical treatment of the condition as may be necessary to assure, within reasonable medical
20 probability, that no material deterioration of the condition is likely to result from or occur during
21 the transfer of the individual from a facility[.]” 42 U.S.C. §1395dd(e)(3). If the patient’s
22 condition has not been stabilized, the hospital may not transfer the patient to another medical
23 facility unless the patient or his proxy requests the transfer in writing or a physician or other
24 medical professional certifies that the medical benefits available at the other facility outweigh the
25 risks of transfer. *Baker*, 260 F.3d at 993.

26 The statute specifically limits the screening examination that the hospital is required to
27 provide to one that is “within the capability of the hospital’s emergency department, including
28 ancillary services routinely available to the emergency department. *Baker*, 260 F.3d at 993; 42

1 U.S.C. §1395dd(a). *Baker* further states, that “[t]he statute is not intended to create a national
2 standard of care for hospitals or to provide a federal cause of action akin to a state law claim for
3 medical malpractice.” *Id.* citing *Eberhardt v. City of Los Angeles*, 62 F.3d 1253, 1258 (9th Cir.
4 1995).

5 In *Jackson v. East Bay Hospital*, 246 F.3d 1248, 1256-57 (9th Cir. 2001), the court held that
6 a hospital did not violate EMTALA even though it misdiagnosed an emergency condition as a
7 psychiatric rather than a medical condition. The hospital diagnosed decedent as suffering from a
8 psychiatric problem and arranged for him to be transferred to an in-patient mental health treatment
9 facility. The decedent, in fact, was suffering from drug toxicity which the hospital failed to
10 diagnose prior to transfer. Although such misdiagnosis potentially supported a state law medical
11 malpractice claim, it did not constitute a violation of EMTALA. *Jackson* cited decisions from
12 other circuits in describing the distinction between a claim under EMTALA and a state law claim
13 for medical malpractice:

14 Seven of our sister circuits have held that to comply with this
15 requirement, a hospital only must provide a screening examination
16 that is comparable to that offered to other patients with similar
17 symptoms. *See Correa v. Hosp. San Francisco*, 69 F.3d 1184,
18 1192-93 (1st Cir.1995) (“[F]aulty screening, in a particular case, as
19 opposed to disparate screening or refusing to screen at all, does not
20 contravene the statute.”); *Baber v. Hosp. Corp. of Am.*, 977 F.2d 872,
21 879 (4th Cir.1992) (“[W]hile EMTALA requires a hospital
22 emergency department to apply its standard screening examination
23 uniformly, it does not guarantee that the emergency personnel will
24 correctly diagnose a patient's condition as a result of this
25 screening.”); *Marshall v. E. Carroll Parish Hosp. Serv.*, 134 F.3d
26 319, 323-24 (5th Cir.1998) (“[A] treating physician's failure to
27 appreciate the extent of the patient's injury or illness ... may
28 constitute negligence or malpractice, but cannot support an
EMTALA claim for inappropriate screening. . . . It is the plaintiff's
burden to show that the Hospital treated her differently from other
patients”); *Cleland v. Bronson Health Care Group, Inc.*, 917 F.2d
266, 272 (6th Cir.1990) (“If [the hospital] acts in the same manner as
it would have for the usual paying patient, then the screening
provided is ‘appropriate’ within the meaning of the statute.”);
Summers v. Baptist Med. Ctr. Arkadelphia, 91 F.3d 1132, 1139 (8th
Cir.1996) (en banc) (“[W]e hold that instances of ‘dumping’ or
improper screening of patients for a discriminatory reason, or failure
to screen at all, or screening a patient differently from other patients
perceived to have the same condition, all are actionable under
EMTALA. But instances of negligence in the screening or diagnostic
process, or of mere faulty screening, are not.”); *Holcomb v.*
Monahan, 30 F.3d 116, 117 (11th Cir.1994) (“As long as a hospital

1 applies the same screening procedures to indigent patients which it
2 applies to paying patients, the hospital does not violate this section of
3 the Act.”); *Gatewood v. Wash. Healthcare Corp.*, 933 F.2d 1037,
4 1041 (D.C.Cir.1991) (“[A] hospital fulfills the ‘appropriate medical
5 screening’ requirement when it conforms in its treatment of a
6 particular patient to its standard screening procedures.”).

7 The Ninth Circuit in *Jackson* adopted this comparative test as the standard for compliance
8 with EMTALA. Although *Jackson* dealt with EMTALA’s medical screening requirement, it is
9 clear that the comparative test also applies to a hospital’s duty to stabilize the patient’s emergency
10 medical condition before transferring him to another facility or discharging him. Thus, evidence
11 that the hospital was negligent in failing to properly stabilize the patient’s emergency medical
12 condition before transfer or discharge does not establish a claim under EMTALA unless it is also
13 shown that the failure to stabilize was the result of disparate treatment provided to patients who are
14 unable or less able to pay for medical care.

15 The Court now analyzes the federal district court decisions which have addressed whether
16 state peer review or similar privileges apply in actions which allege claims under EMTALA and
17 also under state law for medical malpractice. In *Bennett v. Kent County Memorial Hospital*, 623
18 F.Supp.2d 246 (D.R.I. 2009), the hospital emergency department performed a medical screening
19 examination, and diagnosed and treated the decedent patient’s medical and psychological
20 conditions before discharging her. The emergency room physician, however, did not order a CAT
21 scan which would have arguably revealed that the patient had an acute subarachnoid hemorrhage
22 from which she subsequently died. The hospital’s emergency department review group reviewed
23 the case and made certain findings regarding the standard of care the patient received. The
24 plaintiff’s attorney attempted to question the physician-chairman of the review group at deposition
25 about the standard of care regarding the treatment provided to the patient. The physician-chairman
26 had not participated in the patient’s treatment and his knowledge was derived only from his
27 participation on the review committee. In holding that the information was privileged under the
28 Rhode Island peer review privilege, the court stated that it appeared from the pleadings that the
essence of the case lay in medical malpractice—specifically the alleged failure of the attending
physician to order a CAT scan during the decedent’s initial visit. The court further stated:

1 Kent's liability under EMTALA attaches only if Hall was not
2 afforded appropriate screening to detect an emergency condition
3 and/or she was discharged while she was medically unstable.
4 *Correa*, 69 F.3d at 1190. To support her EMTALA claim, Bennett
5 will have to show that Dr. Quas failed to administer medical tests to
6 Hall or provide her with care that he deemed necessary for Hall's
7 diagnosis or treatment and that he had, or would have, administered
8 such tests to other patients exhibiting the same or similar symptoms
as Hall. In other words, Bennett must demonstrate that Hall received
disparate treatment when compared to treatment received by other,
similarly situated patients. Bennett now seeks to discover from the
Director of the Kent E.D. whether treatment of Hall by Dr. Quas met
Kent E.D. standards. This Court concludes that the information
Bennett seeks to elicit from Dr. Dinwoodie is irrelevant with respect
to her EMTALA claim.

9 *Bennett*, 623 F.Supp.2d at 254-5.

10 In *Moses v. Providence Hospital and Medical Centers, Inc.*, 2007 WL 1706376 (E.D.Mich.
11 2007), the decedent took her husband to the hospital emergency room. The husband had signs and
12 symptoms of acute mental illness, including high blood pressure, disorientation, nausea, vomiting,
13 and severe emotional and psychiatric changes. The husband received treatment in the ER for his
14 physical complaints and was then admitted to the hospital for treatment of his psychiatric problems
15 where he remained for 6 days until discharge. Ten days after his discharge, the husband murdered
16 his wife. The plaintiff alleged that the decedent's death was caused by the hospital's EMTALA
17 violation and the negligence of the hospital and the physician. The plaintiff sought production of
18 materials related to the hospital's peer review investigation. The plaintiff asserted that it was
19 seeking the peer review documents only for purposes of the EMTALA claim to which the state peer
20 review privilege was inapplicable. The court, however, was not persuaded that the documents were
21 relevant to the EMTALA claim. The court stated that "[t]he sole issue in this EMTALA claim is
22 whether Mr. Howard was diagnosed with an emergency condition, a fact which can be established
23 from the medical records, and if so, whether the hospital transferred (i.e. discharged) him when he
24 was not stable." *Id.* at *2. The court held that the peer review materials, which may have included
25 a post-mortem conference designed to address whether staff should have known of some
26 underlying condition or should have diagnosed something different, may have been relevant to the
27 malpractice claim, but were not relevant to the EMTALA claim. The court therefore applied the
28 state peer review privilege and upheld the defendant's objection to production of the peer review

1 materials.

2 In *Guzman v. Memorial Hermann Hospital System*, 2009 WL 427268, *5 (S.D.Tex. 2009),
3 an emergency room physician examined an ill seven year old patient and ordered several laboratory
4 tests, including a complete blood count (CBC), which included a white blood cell differential test.
5 The physician diagnosed the patient with a viral syndrome and discharged him with instructions
6 that his parents should bring him back within 24 hours if he did not improve. The physician
7 allegedly failed to review the results of the white blood cell differential test which would have
8 revealed that the patient had pneumonia and sepsis. The court cited several district court decisions
9 which hold that if the evidence sought is relevant only to the state law claims, then the federal court
10 will apply state law privilege. *Guzman* at *5. The court noted, however, that a few cases,
11 including *Burrows v. Redbud Community Hospital District*, 187 F.R.D. 606 (N.D.Cal. 1998), have
12 held that federal privilege law controls even if the evidence sought is relevant only to the pendent
13 state law claim.⁵ The *Guzman* court agreed with those courts which hold that where the evidence
14 sought is relevant only to the state law claims, the state law privilege should govern. The court
15 reviewed the hospital's "root cause analysis" report *in camera* and found no indication in the report
16 that the patient's post-discharge medical problems were due to disparate medical care by provided
17 by the hospital. The court therefore held that the information was not relevant to the EMTALA
18 claim and that the state law privilege applied.

19 In contrast to the foregoing cases, the court in *Atteberry v. Longmont United Hospital*, 221
20 F.R.D. 644 (D.Colo. 2004), found that the hospital's peer review or quality assurance reports were
21 relevant to plaintiff's EMTALA claim and therefore discoverable under federal law. The plaintiff's
22 decedent was taken to the hospital emergency room following a motorcycle accident. Upon arrival,
23

24 ⁵ The court in *Burrows v. Redbud Community Hospital District*, 187 F.R.D. 606, 610-11
25 (N.D.Cal. 1998), stated as a general rule that state law claims which are pendent to federal
26 questions claims are governed by federal privilege law. The court also held, however, that the
27 evidence sought in that case was relevant both to the plaintiffs' EMTALA claim and state law
28 claim. The decision did not elaborate on the underlying facts of the case, but indicated that
plaintiff's infant child died after being transferred from defendant's hospital to another medical
facility.

1 the decedent was in hypovolemic shock from internal hemorrhages, with no blood pressure on
2 oxygen saturation readings that could be obtained. The plaintiff alleged that the hospital trauma
3 surgeon should have operated on plaintiff within one hour of his arrival in order to stop his
4 bleeding and save his life. Instead, the trauma surgeon allegedly allowed the decedent to continue
5 to bleed, to remain unstable and to further deteriorate during the three hours he was in the
6 emergency room. He was then transferred to another hospital by flight for life helicopter, but died
7 enroute. Plaintiff requested production of quality assurance reports, peer review reports and
8 morbidity/mortality reports relating to decedent's medical care. The defendant objected to these
9 requests based on the Colorado state peer review privilege and quality management privilege. The
10 court held that the information sought by plaintiff was relevant to the EMTALA claim. It also
11 stated that "the federal law of privilege governs even where the evidence sought also may be
12 relevant to pendent state law claims." *Atteberry*, 221 F.R.D. at 646-7 (citations omitted).

13 The approach taken by the courts in the foregoing cases is consistent with the Ninth
14 Circuit's analysis of the legal distinction between a claim under EMTALA and a state law claim for
15 medical malpractice. This Court agrees with *Guzman* and the apparent majority of courts that a
16 federal district court should not refuse to apply state law privileges where the information sought is
17 relevant only to a claim or defense to which state law supplies the rule of decision. It may also be
18 appropriate in certain circumstances for the court to conduct an *in camera* review of the allegedly
19 privileged materials to determine whether or not they are relevant to the plaintiff's EMTALA
20 claim.

21 In this case, the Sunrise Emergency Room medical staff performed a medical screening
22 examination on Mr. Mejia-Estrada when he returned to the hospital on July 27, 2008. The hospital
23 determined that Mr. Mejia-Estrada did not have a physical illness or injury, but that he was
24 suffering from a psychiatric disturbance and was a risk of suicide. There appears to be no dispute
25 that Sunrise does not provide in-patient mental health treatment. Pursuant to EMTALA, however,
26 Sunrise was required to stabilize Mr. Mejia-Estrada's emergency medical condition, which in this
27 case was a psychiatric disturbance, before it discharged him or transferred him to a mental health
28 treatment facility. In the context of Mr. Mejia-Estrada's condition, stabilization meant that the

1 hospital was required to either adequately treat or monitor Mr. Mejia-Estrada to prevent him from
2 harming or attempting to harm himself until he could be evaluated by the state mental health
3 agency and, if necessary, safely transferred to a mental health treatment facility.

4 Unlike *Atteberry*, the factual allegations in this case do not indicate, on their face, a
5 violation of EMTALA. The fact that Mr. Mejia-Estrada was able to commit suicide while under
6 Defendant's care, and while he was allegedly being monitored, raises an issue of medical
7 malpractice under state law. It does not indicate an EMTALA violation, however, unless Plaintiffs
8 also produce evidence that the medical care that Sunrise provided to Mr. Mejia-Estrada was
9 different from the type or level of care that Sunrise provides to other similarly situated patients.
10 While it is possible that discovery may lead to evidence supporting a claim under EMTALA, the
11 facts of this case, as they presently stand, do not necessarily support a finding that Sunrise's "root
12 cause analysis" report contains information relevant to Plaintiff's EMTALA claim.

13 There is, however, an additional factor that the Court must consider in deciding whether the
14 state law privileges should be applied in this case. On October 19, 2008 HHS-CMS notified
15 Sunrise of its preliminary finding that Sunrise had violated 42 CFR § 489.24 which incorporates
16 the requirements of EMTALA. In its October 28, 2008 response to HHS-CMS's preliminary
17 finding, Sunrise stated that it had "initiated an internal review and in depth root cause analysis of
18 this case on July 27, 2008." *Plaintiffs' Exhibit 4, Sunrise's response to Statement of Deficiencies,*
19 *page 1.* Sunrise went on to state that it had not violated the requirements of 42 CFR § 489.24 or
20 EMTALA and had taken necessary steps to correct deficiencies in its record keeping relating to the
21 monitoring of Mr. Mejia-Estrada. *Id., pages 1, 3.* While Sunrise's response also does not
22 necessarily indicate that its root cause analysis dealt with its compliance with EMTALA, if it did,
23 then information in the report relating to that issue is discoverable, notwithstanding the privilege
24 under NRS 439.875.2.

25 Although neither party has requested that the Court conduct an *in camera* review of the
26 Sunrise root cause analysis report(s), such review is appropriate in this case. A district court may
27 conduct an *in camera* review of allegedly privileged documents if the party seeking production
28 provides a factual basis adequate to support a good faith belief by a reasonable person that *in*

1 camera review may reveal that documents are not privileged or that an exception to the privilege
2 applies. See *United States v. Zolin*, 491 U.S. 554, 571-72, 109 S.Ct. 261, 105 L.Ed.2d 469 (1989)
3 and *In re Grand Jury Investigation*, 974 F.2d 1068, 1074-5 (9th Cir. 1992). Sunrise's reference to
4 the report in response to the HHS-CMS's preliminary finding is sufficient to satisfy the threshold
5 standard for *in camera* inspection. In addition, Sunrise has not expressly represented that the root
6 cause analysis report does not discuss the hospital's compliance or non-compliance with
7 EMTALA. Accordingly, the Court will order that Sunrise provide its internal review and root
8 cause analysis report regarding Mr. Mejia-Estrada to the Court for *in camera* inspection to
9 determine the applicability of the privilege under NRS 439.875.2. Sunrise is also required to show
10 by affidavit or otherwise that its internal review and root cause analysis and the report(s) resulting
11 therefrom, was conducted pursuant to an investigation for the hospital's patient safety committee.

12 It is unclear from Sunrises's Opposition (#58) whether it submitted reports concerning Mr.
13 Mejia-Estrada's suicide to the State of Nevada Health Division pursuant to NRS 439.835 and NRS
14 439.843.1. Because the state statutes specifically require that such reports be prepared and
15 submitted to the Health Division, it is perhaps arguable that the privilege under NRS 439.840.2
16 should apply even if the reports contain information relevant to EMTALA. The Court need not
17 decide this question, however, if the reports contain no information relevant to EMTALA. The
18 Court therefore orders that these reports also be submitted for *in camera* review.⁶

19 ...

20 ...

21
22 ⁶ Plaintiff's Request for Production No. 32 requested any and all reports relating to any
23 other medical malpractice and EMTALA cases which occurred during the five years preceding the
24 incident involving Mr. Mejia-Estrada. Defendants objected to this request on the grounds that it is
25 vague and ambiguous as to scope and also based on the state law privileges. Although Defendants
26 failed to object to this request based on lack of relevance, the Court will not require Defendants to
27 respond to this request. First, Plaintiff's motion to compel does not specifically move to compel a
28 response to this request. Second, the request seeks medical information about non-parties who
have legitimate privacy interests in their medical records and which are also protected from
disclosure under HIPAA. Plaintiffs also made no attempt to limit the request to substantially
similar incidents.

1 **4. Defendants' Objections Based on the Attorney-Client Privilege and Work-**
2 **Product Doctrine.**

3 Defendants also objected to Plaintiffs' Requests for Production Nos. 1, 2, 7 and 15 on the
4 grounds that the requests seek documents protected from disclosure by the attorney-client privilege
5 and attorney-work product doctrine. The attorney-client privilege protects confidential disclosures
6 made by a client to an attorney in order to obtain legal advice, as well as an attorney's advice in
7 response to such disclosures. *Diamond State Ins. Co. v. Rebel Oil Company, Inc.*, 157 F.R.D. 691,
8 698 (D. Nev. 1994), citing *In re Grand Jury Investigation*, 974 F.2d at 1070. The work-product
9 doctrine protects from discovery documents and tangible things prepared by a party or its
10 representative in anticipation of litigation. *Id.* 157 F.R.D. at 698-9, citing *Admiral Insurance*
11 *Company v. United States District Court, District of Arizona*, 881 F.2d 1486, 1494 (9th Cir.1989);
12 *Schmidt v. California State Automobile Association*, 127 F.R.D. 182, 183 (D.Nev.1989). The
13 party asserting the attorney-client privilege or the work-product doctrine has the burden of proving
14 that the privilege or doctrine applies for each document as to which it is asserted.

15 The Court construes Plaintiffs' Requests for Production as seeking documents relating to
16 Mr. Mejia-Estrada's medical treatment that were generated prior to the commencement of this
17 lawsuit. Plaintiffs' counsel sent a letter to Defendant Sunrise's risk management department on
18 September 11, 2008 in which he stated that he represented Mr. Mejia-Estrada's heirs in regard to
19 all claims arising out of his death and offering or demanding settlement for the limits of Sunrise's
20 liability insurance coverage. It is reasonable to infer that Defendants were in anticipation of
21 litigation once they received Plaintiffs' counsel's letter. It is also possible that Defendants were in
22 anticipation of litigation prior to that date, but it is Defendants' burden to demonstrate that they
23 were.

24 Fed.R.Civ.Pro. 26(b)(5) states that when a party withholds relevant documents on the basis
25 of privilege, the party must describe the nature of the documents, communications, or tangible
26 things not produced or disclosed—and do so in a manner that, without revealing information itself
27 privileged or protected, will enable other parties to assess the claim. This may be accomplished by
28 providing a privilege log and affidavits or other documents that may be necessary to establish the

1 applicability of the privilege or doctrine. Affidavits or other evidence besides the privilege log may
2 be particularly necessary to prove that the work-product doctrine applies. *See Diamond State Ins.*
3 *Co. v. Rebel Oil Company, Inc.*, 157 F.R.D. 691, 698 (D. Nev. 1994). At the hearing of this matter,
4 the Court ordered Defendants to provide appropriate privilege logs and/or affidavits as necessary to
5 support their assertions of attorney-client privilege or the work-product doctrine. Once Defendants
6 have provided their privilege logs and affidavits or other documents to support their assertions of
7 the attorney-client privilege or the work-product doctrine, the parties' counsel should meet and
8 confer to resolve any disputes regarding the assertion of privilege. If the parties are unable to
9 resolve their differences, then Plaintiffs may again move to compel production of those documents
10 that they believe are not privileged.

11 Based on the foregoing,

12 **IT IS HEREBY ORDERED** that Plaintiffs' Motion to Compel Answers to Interrogatories
13 and Requests for Production (#50) is **granted**, in part, as follows:

14 1. Defendants shall, on or before **June 10, 2011**, serve and file an affidavit or
15 documents which demonstrate that the internal review and "root cause analysis" investigation and
16 the report(s) resulting therefrom, were conducted and prepared pursuant to the proceedings of the
17 hospital's patient safety committee established in accordance with NRS NRS 439.875.

18 2. Defendants shall, on or before **June 10, 2011**, deliver to the Court for *in camera*
19 review their "root cause analysis" report(s) and reports provided to the Nevada Health Division
20 pursuant to NRS 439.835 and NRS 439.843.1, relating to the decedent Oscar Mejia-Estrada. The
21 Court will review these reports to determine whether they contain discoverable information relating
22 to Plaintiffs' EMTALA claim and shall enter a further order as to whether the reports should be
23 produced.
