A. BACKGROUND

GCA filed its complaint for patent infringement and federal and state unfair competition and tort claims on May 1, 2015. (Dkt. # 1.) An investigation pending before the International Trade Commission (ITC) entitled *In the Matter of Certain Automated Teller Machines and Point of Sale Devices and Associated Software Thereof*, Case No.: Inv. No. 337-TA-958, and a petition for Covered Business Method review of U.S. Patent No. 6,081,792 (CBM 2015 00167) filed with the Patent and Trial Appeal Board of the United States Patent and Trademark Office both involve the same patent-in-suit for this matter and, in the case of the ITC investigation, certain of the unfair competition claims. On June 22, 2015, NRT filed a motion to dismiss challenging the existence of statutory subject matter in the asserted patent. (Dkt. # 5.)

B. ITC PROCEEDINGS

In the original scheduling order, both the parties and the Court anticipated that the parties' claim construction briefing in this case would follow the issuance of the ITC claim construction order and that any claim construction hearing in this case would occur after the evidentiary hearing for the ITC then scheduled for March 2016. (*See* Dkt. # 38, Scheduling Order § G.)

On December 22, 2015, the ITC Administrative Law Judge issued a claim construction order finding the term "processor" indefinite and declining to construe the remaining disputed claim terms.

On December 29, 2015, Everi Payments, Inc. (the new name/successor entity to GCA) filed a motion for reconsideration or, alternatively, for certification for interlocutory appeal to the Commission.

The evidentiary hearing previously scheduled for March 2016 has, in light of the aforementioned claim construction, been stayed pending further motion practice at the Commission.

C. NEW PROPOSED DISCOVERY DEADLINES

1) Completed Discovery

The parties exchanged initial disclosures on September 11, 2015. Plaintiff served its infringement contentions on September 11, 2015. Defendants served their noninfringement and

invalidity contentions on October 23, 2015. Plaintiff served its response to Defendants' noninfringement and invalidity contentions on November 6, 2015. The parties exchanged lists of proposed terms for claim construction on December 1, 2015.

2) Discovery That Remains to Be Completed

The parties have yet to exchange proposed claim constructions with supporting intrinsic and extrinsic evidence. The parties have not yet filed a joint claim construction and prehearing statement, nor have they engaged in claim construction briefing. Phase II discovery has not yet been initiated.

3) Reasons for Extending the Time Limits Set by the Original Discovery Plan

The parties submit that in the interests of efficiency and a conservation of resources by both the parties and the Court, further claim construction exchanges and briefing should occur after motions regarding the ITC claim construction order have been decided.

4) Proposed Schedule for Completing All Remaining Discovery

The parties propose that all remaining deadlines in the current scheduling order be extended to accommodate motion practice before the ITC relating to claim construction. The parties note that they may seek to further extend the claim construction and other deadlines pending the outcome of the events at the ITC, including review by the Commission, by way of status reports filed every 90 days or within 5 court days of any order issued by the ITC. For now, the parties propose the following schedule:
