Counsel for Plaintiff Angela Biggins (“Plaintiff”) in the above-named action and counsel for Defendants Biomet, Inc.; Biomet Orthopedics, LLC; and Biomet U.S. Reconstruction, LLC (collectively, “Biomet,” and together with Plaintiff, the “Parties”) hereby submit this Rule 26(f) Report, which includes a discovery plan and scheduling order as requested by the Court. (ECF No. 11)

## I. OVERVIEW

This case involves a variety of product liability claims against Biomet stemming from implantation of the Biomet M2a Metal-on-Metal Hip Replacement System (“M2a Hip Replacement System”) into Plaintiff. Plaintiff asserts five causes of action against Biomet in her Complaint: (1) Negligence; (2) Negligent Misrepresentation; (3) Strict Liability Design Defect; (4) Strict Liability for Inadequate Warning; and (5) Strict Liability for Manufacturing Defect.

The M2a Hip Replacement System at issue in this case is the subject of a currently pending federal multidistrict litigation at the United States District Court for the Northern District of Indiana in the South Bend Division, where Judge Robert L. Miller, Jr. presides over *In Re: Biomet M2a Magnum Hip Implant Products Liability Litigation* (MDL 2391), cause number: 3:12-MD-2391 (“Biomet M2a MDL”), centralized as an MDL on October 2, 2012.

Plaintiff filed this suit on December 11, 2020, and Biomet filed its Answer on March 12, 2021. The Parties met and conferred to create a discovery plan and scheduling order. They now file this report pursuant to Fed. R. Civ. P. 26(f).

## II. FRCP 26(f) DISCOVERY ISSUES

**A. Anticipated Scope of Discovery (FRCP 26(f)(3)(B))**

The Parties seek a reasonable framework to complete discovery and work this case up for trial. While this case was not a part of the Biomet M2a MDL, Biomet must still coordinate with the Biomet M2a MDL and similar cases filed across the country. Biomet

1 anticipates that extensive case-specific discovery and pretrial efforts remain in this case  
2 due to MDL coordination and the complexities of Plaintiff's case.

3 In the Biomet M2a MDL, extensive generic discovery has been completed,  
4 including production of documents, witnesses and written discovery. Upon the entry by  
5 this Court of an agreeable Protective Order as to confidentiality and which restricts  
6 sharing of the confidential documents, Biomet agrees to produce the common-issue  
7 written discovery and documents, and common issue depositions provided in the MDL  
8 and state courts before March 12, 2020. Due to the burdens of duplicating these  
9 exhaustive efforts, Biomet requests that this Court limit discovery only to case-specific  
10 issues that have not yet been addressed as part of the Biomet M2a MDL or other common  
11 issue discovery in other jurisdictions.

12 As to the case-specific portion of this litigation, both Parties must identify and  
13 retain case-specific experts to prove causation and/or to address alternative causation, as  
14 well as fact and expert witnesses qualified to evaluate Plaintiffs' specific claims for  
15 damages. Biomet requires deeper investigation into Plaintiff's significant medical history  
16 to address alternative causation, including but not limited to her history and progression of  
17 osteoarthritis and degenerative disc disease, her knee arthroplasties in 2007 and 2018,  
18 degenerative changes throughout her cervical spine, spinal stenosis, the anterior cervical  
19 disectomy and fusion surgery that occurred in 2019, and gastritis, among other health  
20 conditions and procedures. Biomet cannot properly evaluate Plaintiff's specific claims for  
21 damages without being afforded an opportunity to investigate Plaintiff's medical history  
22 that extends beyond her hip issues with the M2a device. In addition, since this case was  
23 not part of the MDL, Biomet must begin medical record collection and continue to  
24 identify all of Plaintiff's treating physicians and facilities in order to notice the appropriate  
25 and relevant depositions. This process takes time, especially during the current COVID-  
26 19 pandemic, as Biomet has experienced significant delay in collecting records due to  
27 medical facilities' limited personnel and administrative availability.

1           Thus, Biomet's remaining preparation includes case-specific: (i) written discovery;  
2           (ii) collection of additional documents and medical records, likely including x-ray and/or  
3           MRI images and pathology slides; (iii) fact witness depositions, including Plaintiff's own  
4           deposition, her spouse's deposition (to address her request for loss of consortium  
5           damages), her treating physicians, and implanting and revising surgeons, among others;  
6           and (iv) Plaintiff's expert discovery. Lastly, Biomet will need to retrieve the explanted  
7           device so that its experts may complete an inspection, which is a particularly lengthy  
8           process, as scheduling the required reservations at the facilities where inspection occurs  
9           has been limited, difficult, and protracted as of late due to the obstacles presented by the  
10           COVID-19 pandemic. Moreover, while certain of Biomet's generic testifying experts,  
11           such as physicians, may be required to supplement their reports based on case-specific  
12           records, generic experts alone will not be sufficient, given Plaintiff's medical history.  
13           Biomet must also identify and retain case-specific potential testifying experts.

14           Although the Parties agree to work together to discuss and schedule treating  
15           physician depositions, Biomet requests the necessary time to complete these laborious  
16           case-specific discovery efforts.

17           **B.       Electronically Stored Information (FRCP 26(f)(3)(C))**

18           The scope of ESI discovery will be agreed upon in a stipulated protective order.  
19           Biomet will produce its ESI discovery produced in the Biomet M2a MDL and state courts  
20           before March 12, 2020, as to the generic portion of this litigation upon the entry of an  
21           agreeable Protective Order.

22           **C.       Privilege and Protection Issues (FRCP 26(f)(3)(D))**

23           The parties intend to enter into a stipulated protective that will govern the exchange  
24           of confidential information in this case.

25           **D.       Changes to Discovery Limitations (FRCP 26(f)(3)(E))**

26           Any additional discovery not addressed by the Court should be done consistent  
27           with the Federal Rules of Civil Procedure and the local rules.

## E. Other Discovery & Scheduling Orders (FRCP 26(f)(3)(F))

Biomet asserts that Plaintiff's discovery should be limited to case-specific written requests and depositions that are not duplicative of those taken in the Biomet M2a MDL. If Plaintiff agrees to limit discovery here to case-specific discovery, Biomet will agree to produce the common issue written discovery and documents, and common issue depositions provided in the MDL and state courts before March 12, 2020 upon the Parties' entrance of a stipulated protective order for confidentiality and an agreement not to share the confidential discovery outside of this litigation.

### III. SETTLEMENT

The Parties have begun to discuss resolution of this case and request adequate time to complete good-faith settlement discussions without the pressure of running up against case management deadlines. It is not currently necessary for the Parties to participate in any alternative method of dispute resolution.

#### **IV. PARTIES' PROPOSED SCHEDULE:**

The Parties request that the Court consider the proposed schedule in light of the extensive discovery to be completed in this case, ongoing discussion to resolve this matter, and the approximately 13 M2a-related trials already confirmed for 2021 through 2022 across the country.

The parties anticipate a trial of approximately three weeks.

<b>Event</b>	<b>Proposed Date</b>
1. Last day to exchange Initial Disclosures	June 18, 2021
2. File motions to amend and/or add parties	July 16, 2021
3. Completion of fact discovery	January 14, 2022
4. Plaintiff's designation and service of expert witness reports for case-specific experts	April 15, 2022
5. Biomet's designation and service of case-specific expert witness reports	May 31, 2022
6. Expert Rebuttal	June 29, 2022

Event	Proposed Date
7. Completion of case-specific expert discovery	August 5, 2022
8. Filing of <i>Daubert</i> motions and dispositive motions	November 18, 2022
