Iams

```
*C:/AGEORGE/CSTAT/PETFOODS/IAMS/Iams2008Feb9.sas;
*SEE CORRECTION BELOW;

*IMPORT BEKINSINVENTORYDETAIL.xls (sorted) as a1a;

proc contents data=a1a; run;
*5297 observations  5305 with dummy records;
/*
BrandCode (PCode), ControlGroup(MDate), Description (ProductName),
Location (Pallet_ID), Quantity (CasesPP)
*/

*See 2/508 email from Laura Sanom;
*She forwarded Tom Robinson's email with the following;
*changes to be made to the file;
*All variety packs and multi packs have;
*units per case that are not evident from the description;
*Example IAMS DG PCH MX 1x127.2z VAR PK;
*that I imterpreted to be 1 unit per case;
*is actually 72 units per case;
*IAMS PPY1x79.2Z CN MLTPK W/BF&CKN;
*is 6 units per case!!!;
*INSTEAD of the code below;
*If index(ProductName, '1X')then percase=1;
*merge the Excel file;
*IamsDoubleCheckQuantities2008Feb6.xls as a1b;

*Change the vriable names so that they are similar to the Nestle Purina
programs;
data a1c; set a1a;
if location='ABCDEFG' then delete;
PCode=BrandCode;
MDate=ControlGroup;
ProductName=Description;
Pallet_ID=Location;
CasesPP=Quantity;
drop brandcode controlgroup description location quantity;
proc univariate data=a1c; var casespp; run;
*For the 5,297 pallets there are 593,293 total Cases ;
proc sort data=a1c; by pallet_id;
proc freq data=a1c; tables pallet_id; run;

proc sort data=a1c; by pcode mdate ;

run;
*FEBRUARY 7, 2008 noticed there are duplicate and in;
*some cases triplicate records;
```

```
*i.e. same Product Code and M Date Combination;
*and more than one record for a pallet id;
*2/8/08 email from Tom Robinson explained that there is an;
*overflow of product and they will not have a problem;
*selecting the items;
*I have decided to add a column to the excel sheet;
*that we send to them that indicates how many cases;
*there are in a given pallet;
*In that way if one pallet has 4 and another has 80;
*they will be selecting 1 case from the pallet with 4;
*and 2 from the pallet with 80;
