Eileen,

This is the last correspondence I had with Terry regarding the Intel Professorship.

Regards,
Bruce

Thanks, Bruce. You have definitely helped me to understand how important the Intel professorship is for your position. I agree that their support goes beyond the \$50K affiliate dues, so we should leave well enough alone.
Thanks again.

Terri

Terri:

I didn't receive anything forwarded by you from Intel, maybe you can try again. Intel's support goes well beyond the \$50K affiliate dues. They have hired three of the Microsystems Ph.D. students, more than any other company and nearly 1/2 of all graduates from the program. Intel has asked me to work with them to develop engineering courses in lithography and processing for their internal purposes. And most recently, they have directed customization funding from the Semiconductor Research Center (SRC) to our Evanescent Wave Lithography research for over \$300K for 2007-2009. Their support in the form of the Intel Professorship is extremely valuable and important.

Regards,
Bruce Smith

Bruce,
I copied you on a message from Intel stating that they would only be able to make a gift of \$50K again. They really view their gift as "dues as an industrial affiliate". I'd like to talk with you about whether we should look at another company for your professorship. Do you have any time in the next few weeks when I could come and talk with you?
Thanks,

Terri Stevens
