

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF NEW MEXICO**

STC.UNM,

Plaintiff,

vs.

No. 10-cv-1077 RB/WDS

INTEL CORPORATION,

Defendant.

ORDER

This matter is before the Court on Plaintiff STC.UNM's Rule 56(d) Motion to Add Two Exhibits, filed April 25, 2012. (Doc. 205). Having issued its Memorandum Opinion and Order granting in part and denying in part Defendant Intel Corporation's Motion for Summary Judgment on May 8, 2012, STC.UNM's request is rendered moot relative to that motion. In that Order, however, the Court reserved judgment on the question whether U.S. Patent No. 5,705,3231 ("the '321 patent") is co-owned by (1) STC.UNM and Sandia Corporation; or (2) STC.UNM, Sandia Corporation, and Sandia National Laboratories. STC.UNM is therefore invited to resubmit these exhibits in support of a future pleading pending further development of the factual record on this issue.

THEREFORE,

IT IS ORDERED that Plaintiff STC.UNM's Rule 56(d) Motion to Add Two Exhibits (doc. 205) is denied as moot.

**ROBERT C. BRACK
UNITED STATES DISTRICT JUDGE**
