

# Exhibit C

Department of Energy  
Albuquerque Operations Office  
P. O. Box 5400  
Albuquerque, New Mexico 87185-5400

DEC 1 1993

Ms. Annabelle Quintana  
Assistant University Counsel  
The University of New Mexico  
Scholes Hall 102  
Albuquerque, NM 87131-6003

Dear Ms. Quintana:

Reference: UNM-322

This office received your letter of September 21, 1993, wherein you provided notice of the University of New Mexico's intent to elect title to its undivided interest in an invention entitled "Method for Manufacture of Quantum-Sized Periodic Structures in Si Materials," invented by Steven R. J. Brueck, An-Shyang Chu, Saleem H. Zaidi, employees of the University of New Mexico, and Bruce L. Draper, employee of Sandia Corporation, (Department of Energy Docket No. S-79,030 Sandia Docket No. SD-5308). The invention is a Subject Invention under Contract No. DE-FI04-93AL83300.

Your election to retain title to the above-identified invention has been approved, effective September 23, 1993. Note, however, that an undivided interest still remains in Department of Energy by virtue of Mr. Draper's employment at Sandia National Laboratories.

Please send to this office for each patent application filed or to be filed on the invention, an executed Confirmatory License in triplicate which sets forth the terms and conditions of the election. Also, please notify this office of any foreign filing and provide a suitable Confirmatory License for each such filing.

Please check the Contract Number, there is a disagreement between this contract number given on your notice of election and our contract number as indicated above.

James H. Chafin  
Assistant Chief Counsel for  
Intellectual Property
