Petition Letter to the Judge of the Google Book Settler and List of Authors Opposing the Settlement

The following petition was submitted to Judge Chin on January 26th, 2010, with the names of the 367 authors who signed it with me.

I am proud to be in their company.

The petition and the list of names will remain posted until the court hearing in February.

Names that came in just past the deadline are [listed separately](#), as supporters of our effort.

It's no longer possible to sign the petition. But you are welcome to join the discussion of the Google Settlement and related issues at the [Book View Cafe blog](#).

Petition Concerning the Google Book Settlement

The Google Settlement was negotiated by the Authors Guild, without consultation with any other group of authors or American authors as a whole. The Guild cannot and does not speak for all American writers. Its settlement cannot be seen as reflecting the will or interest of any group but the Guild.

Three groups of American writers, the National Writers Union, the American Society of Journalists and Authors, and the Science Fiction and Fantasy Writers of America, are opposed to the settlement. So are all the signatories of this letter: professional writers, who make part or all their living from their copyrights.

Ireland, India, South Africa, and New Zealand (countries with active publication in English) protested the settlement and have been exempted from it. The governments of Germany and France protested unregulated digitization and have been exempted from the Settlement (and the French Government is suing Google for illegal digitization of copyrighted property.)

We ask that the United States also be exempted from the settlement. We ask that the principle of copyright, which is directly threatened by the settlement, be honored and upheld in the United States.

The "opt-out" clause in the Settlement is most disturbing:

First, it seems unfair that, by the terms of the class-action settlement, authors can officially present objections to the Court only by being "opted in" to the settlement and thereby subjecting themselves to its terms.

Second, while the "opt-out" clause appears to offer authors an easy way to defend their copyright, in fact it disguises an assault on authors' rights. Google, like any other publisher or entity, should be required to obtain permission from the owner to purchase or use copyrighted material, item by item.

There is no justification for reversing that rule by forcing copyright owners to defend their right against every careless or predatory use of the material, thus rendering copyright essentially meaningless.

The United States Department of Justice agrees, having declared that Google should negotiate individually with copyright holders. The Director of the United States Copyright Office calls the Settlement "an end-run around copyright law."

The free and open dissemination of information and of literature, as it exists in our Public Libraries, can and should exist in the electronic media. All authors hope for that. But we cannot have free and open dissemination of information and literature unless the use of written material continues to be controlled by those who write it or own legitimate right in it.

We urge our government and our courts to allow no corporation to circumvent copyright law or dictate the terms of that control.

LAVINIA

[Locus Award](#) for *Lavinia*!

The Best Books of 2008

The *Oregonian* names *Lavinia* ("brilliant") one of the [Top 10 Northwest Books](#) of 2008.

Cleveland *Plain Dealer*: "A time-traveling Virgil meets the young wife he tosses off in a few lines in *The Aeneid*, and gasps, 'I thought you were a blonde.' Le Guin's wit and scholarship burnish this beautiful, rewarding and unjustly overlooked novel, for which she retooled her grasp of Latin. A believable immersion into an ancient world and the antique virtues of loyalty and grace." — Karen Long, Book Editor, Sunday, December 14, 2008.

She is a social novelist in the best sense of the term [...] her ultimate concern is with the real world. In this novel, Virgil's imaginary Italy allows her a manipulatory freedom which a more realistic method would not. [\[complete review\]](#)

Times Literary Supplement

(Excerpts)

...Ursula Le Guin's vivid novel gives Lavinia a voice, without any serious pretence that the experience of a princess of the Bronze Age can be recalled. ... The world she describes in tender detail is a pastoral utopia, sufficiently alien from modern values to catch the interest of an author who has always chosen to examine the workings of contemporary society by imagining something wholly different....

...The most haunting passages of the novel imagine Lavinia meeting the shade of Virgil at the sacred shrine of Albunea, where spirits communicate with the living. These encounters are necessarily perplexing, for Lavinia knows that she has no life outside Virgil's poem.... Virgil is brought to acknowledge that he has not done justice to the self-possessed, dark young woman who stands before him: "I thought you were a blonde!" Here Le Guin makes her authority felt, insisting on a different kind of reality.... But this is not a matter of Le Guin affirming a superior understanding. Virgil's dignity and stature are given their full weight, and a sense of his sadness suffuses the novel....

...Lavinia's enduring vitality lies in her love for her flawed and courageous husband, who represents a society with 'certain homely but delicate values, such as ... loyalty, modesty, and responsibility.' Le Guin has her own modesty, and would not claim to have superseded Virgil's achievement. Her novel ... is a moving testament to the conversations that great writers sustain through the centuries.
