Gentlemen :

As you know I am preoccupied at the moment and have been for the past two weeks with closing a funding round for Hakia .
I am not pleased that after almost two million dollars of funding from Tapul and Itec , Amiga has not been able to obtain funding from outside investors.
Itec is willing to fund the company a while longer , but will do so on basis of an agreement that gives Itec a much tighter control of the management of the company.
At present we do not really know what the problems have been or are ; whatever they are they need to be addressed . All employees should communicate their views and suggestions .

Amiga has a compelling vision and a technology and product roadmap that has a huge upside potential with proper execution -- including execution of a funding strategy .

I will get back to everyone with the short term plan , which will entail paying all employees two months salary next week after closing of Hakia which will release some funds for Itec . Itec will also cover payroll for September . Upon payment of the salaries I look forward to working with everyone to make sure we have long term funding in place in September .

I expect Garry to participate in the short term funding as a major shareholder at least to the extent of his monthly salaries .

Pentti
