Subject: Interesting RIAA subpoena stats

FYI. Note particularly that now a smattering of subpoenas are singling out users of the gnutella net. The vast majority, however, are aimed at Kazaa users.

> We've updated EFF's database of RIAA subpoenas with PACER records
> through last Friday -- 1145 subpoenas.

> Here are some aggregate stats from the set:
> 10 universities, among 40+ ISPs (there are multiple names, not to
> mention mere trademarks, referring to some ISPs). Comcast, SBC, Time
> Warner, and Verizon lead the pack of ISPs. KaZaA is far and away the
> most common filesharing service scanned.
