I, Gregory Newby, hereby declare as follows:

1.   My name is Gregory Newby. I reside in Efland, North Carolina.

2.   I am the Volunteer CEO of the Project Gutenberg Literary Archive Foundation, a 501(c)(3) nonprofit corporation organized under the laws of Mississippi. Since 1997, I have also been an Assistant Professor with the School of Information and Library Science at the University of North Carolina Chapel Hill. Between 1991 and 1997, I served as an Assistant Professor, Graduate School of Library and Information Science, University of Illinois at Urbana-Champaign. Prior to that, I was an instructor and adjunct faculty member at Syracuse University in Syracuse, New York. I have published dozens of articles and taught numerous courses on information sciences and Internet issues. I received a Ph.D. in Information Transfer from Syracuse University in 1993, an M.A. in Communications from SUNY Albany in 1988, and a B.A. in Communications and Psychology from SUNY Albany in 1987. My complete vitae can be found at http://www.ils.unc.edu/gbnewby/vita.html.

3.   Project Gutenberg is the oldest information provider on the Internet, having been founded by Michael S. Hart in 1971. Although the "Internet" at the time included only a few computers tied together in a system known as ARPANet, it was clear to Project Gutenberg even then that anything that can be entered into a

AUSLIBI\LTL\
158474.01

1   computer can be reproduced indefinitely. By making use of this principle, it

2   became clear that everyone in the world, or even not in this world (given satellite

3   transmission), could have a copy of every book that has ever been entered into a

4   computer. In order to make this dream a reality, Project Gutenberg was founded to

5   begin entering public domain works into computers and make them easily available

6   to the public and to charge nothing for the eBooks.

7   4.   It is the aim of Project Gutenberg to make information, books and

8   other materials available free of charge to the general public in a general form that

9   the vast majority of computers, programs and people can easily read, use, quote,

10   and search. This is an important difference from the various other eBook projects

11   around the world, which use markup languages that limit users to certain reading

12   and searching programs. In 1971, Mr. Hart began this project by typing the U.S.

13   Declaration of Independence into a computer at the University of Illinois Material

14   Research Laboratory and making it available to other computer users. Since then,

15   an international group of volunteers has been entering public domain works of light

16   literature, heavy literature, reference and scientific materials into computers and

17   making them available to the general public via the Net.

18   5.   Today, Project Gutenberg has coordinated the efforts of thousands of

19   volunteers world-wide. These volunteers enter public domain works into

20   computers, format these works as simple eBooks so that they can be used by the

21   widest variety of computers, including the new "Palm Powered" PDAs, and make

22   these eBooks available to the general public over the Internet through various

23   servers located around the world on every continent. These are all operated by

24   volunteers on their own time and expense.

25   6.   Since its inception in 1971, Project Gutenberg has made over 5,600

26   eBooks available. I expect that number will grow to over 6,000 by the end of 2002.

27   The vast majority of these are works in the public domain and we license the

28   remainder from the copyright owners for Project Gutenberg distribution as eBooks.

1 Thanks to the work of Project Gutenberg volunteers, we published over 1,350

2 eBooks in the first seven months of 2002 and anticipate surpassing 2,500 new

3 eBooks by the end of 2002.

4   7.   A current listing of Project Gutenberg eBooks is attached as Exhibit A.

5 The list can also be found at the Project Gutenberg home page

6 (http://promo.net/pg/titles.zip). The following is a representative sample of the

7 public domain works made available as eBooks through the efforts of Project

8 Gutenberg:

9   a. All major works of William Shakespeare, in multiple editions, and

10 including apocrypha;

11   b. The King James Bible (New and Old Testament), in multiple

12 editions, and including apocrypha;

13   c. The Koran;

14   d. Herman Melville, Moby Dick in two separate editions, and Typee,

15 Omoo: Adventures in the South Seas, etc.;

16   e. Thomas Paine, The Rights Of Man;

17   f. The Federalist Papers;

18   g. NAFTA treaty text, annexes and tariffs;

19   h. Jane Austen, Persuasion, Pride and Prejudice, Sense and

20 Sensibility, Love and Friendship, etc.;

21   i. Upton Sinclair, The Jungle, The Machine, The Profits of Religion,

22 etc.;

23   j. Johann Wolfgang von Goethe, Italienische Reise, Faust, The

24 Sorrows of Young Werther, etc.;

25   k. The first 100,000 prime numbers, and other numbers of particular

26 scientific interest to a million places;

27   l. Central Intelligence Agency, The World Fact Books from 1990 to

28 the present;

m. Caesar's Commentaries (in Latin);

n. Adam Smith, Wealth of Nations;

o. The Human Genome Project, ATCG codes, two editions;

p. Theodore Roosevelt, An Autobiography by T.R.;

q. Karl Marx & Friedrich Engels, The Communist Manifesto;

r. Louisa May Alcott, Little Women, Little Men, Jo's Boys, etc.;

s. John Milton, Aeropagitica;

t. F. Scott Fitzgerald, This Side of Paradise;

u. Alexis de Toqueville, Democracy In America;

v. The Complete Plays of Gilbert and Sullivan;

w. Popular Science Monthly, Oct, Nov, Dec, 1915 V.86;

x. Dante Alighieri, The Divine Comedy (in the original Italian, as well as the Longfellow, Cary and Norton translations);

y. Ulysses S. Grant, Personal Memoirs;

z. Charles Darwin, On the Origin of Species;

aa. Plato: Symposium, Meno, Phaedrus, Ion, Euthyphro, Cratylus, Euthydemus, Protagoras, Laches, Charmides, Lysis, etc. (Jowett translations);

bb. Immanuel Kant, The Critique of Pure Reason;

cc. Collected Inaugural Speeches of the United States Presidents;

In addition to the eBooks made available by Project Gutenberg, thousands more eBooks of public domain works have been created and distributed by other groups. The goal of the Gutenberg Project has been stated as: "to post 10,000 electronic books, or eBooks, on the Internet by the end of 2001." The Internet Public Library listed The Notebooks of Leonardo da Vinci as their 20,000[th] listed eBook, which Project Gutenberg released as their 5,000[th] eBook on April 10, 2002.

8. Because most Project Gutenberg eBooks are public domain works, those who download them are entitled to do anything they like with them. You can also quote from them, abridge them, or create new works based on them. You can

re-post them on your site, print them, distribute them, convert them to other formats. In fact, because the original goal of Project Gutenberg was to make information and literature available to the general public at a cost truly "too cheap to meter," redistribution of eBooks is encouraged. Although it may be expensive and cumbersome to collect thousands of public domain works in paper formats, Project Gutenberg hopes to reduce those costs so every person with a computer can have free, convenient access to a vast library of public domain works. The average new computer today costs under $700, and 100 gigabyte drives are between $100 and $200 depending the brand and place of purchase. With gigabytes approaching $1 each, that means the entire Project Gutenberg collection wouldn't cost even $10 to store, and perhaps another $10 to make backups on a CD writer. By the end of 2002 you should be able to put 5,000 Project Gutenberg eBooks on one of these new computers by using up just $10 of your drive space.

9.   In an effort to ensure that Project Gutenberg eBooks can be read by the widest variety of computers, they are made available in what has become known as "Plain Vanilla ASCII," meaning that nearly all of our eBooks are available in various other formats including HTML and provide dozens of different languages which sometimes require different character sets than ASCII. Our collection also includes several audio files (including audio books and music) and a few short movies.

10.   Although eBooks are distributed by Project Gutenberg from computers that use file transfer protocol (FTP/HTTP servers), eBook files are suitable for distribution through many computer file-sharing technologies. For example, eBooks may be sent as email attachments. Others have reformatted eBooks in numerous formats including LaTeX, PDF, PostScript, eBook formats, HTML, XML, and a variety of other formats, and made them available on the World Wide Web. The Project Gutenberg 'small print' license, included with each eBook, specifically encourages this reformatting and redistribution.

1   11.   Any technology that makes it easier and cheaper for individuals to

2 redistribute eBooks over the Internet helps achieve Project Gutenberg's goals of

3 making public domain information freely available to the general public.

4   12.   With zero labor and material costs, P2P file-sharing technologies

5 promise to be the ultimate public resource for wide-spread dissemination of public

6 domain and authorized eBooks. Numerous authorized and public domain Project

7 Gutenberg eBooks are made available on Morpheus, Kazaa, Gnutella, Grokster, and

8 similar software products. This sharing is a great advantage to both Project

9 Gutenberg and the public since the public domain eBooks can be disseminated

10 without adding any additional costs to the Project or to the public. Project

11 Gutenberg welcomes this widespread sharing of public domain eBooks using these

12 software products since they assist us in meeting our objectives, while providing a

13 tremendous public benefit by spreading knowledge and culture to those who might

14 not have access to the public domain eBooks through more traditional means.

15

16   I declare under penalty of perjury under the laws of the United States of

17 America that the foregoing is true and correct and that this declaration is executed

18 in Elfland, North Carolina on August 27, 2002.
