Subject: [SPAM]feature idea: prevent video removal

hey, we should add a very simple feature that temporarily prevents a user from removing a video.

next time we have another lazy sunday hit, it would hurt us if the user suddenly removed the video, either out of stupidity, or by accident. for example, if user 'youtubedude' decides to remove Lazy Sunday, it would kinda suck for us, and it would have sucked a lot more if he had done that like a week ago.

what if we add a flag to certain videos so that when the owner tries to remove the hugely popular video it just gives some error message and does not remove the video. I suppose we can always bring back a deleted video by changing the status in the database too.
