- Maria: AudioSwap is a good way for labels to monetize their audio assets. I don't think we show any partner badge for videos with audioswap, and hence, not sure if that helps to promote the contents from the content owner. In fact, it seems to be a good idea to show a partner badge for audio only match or video with audioswap. Should I file a request for this?
 - Logically should be allowed, but probably not very impactful at this point.

- Nobody really driving badging right now, but Thai may be good person to reach out
- Reference tab - need better visuals to tell partner what is enabled for. Some partners freaked out when they thought VID references were enabled when they weren't.
- Content Owner <=> Simba ID association. Log to Kyle/Shenaz (Alwin)

- Status on Previous Requests

- Health check on partner reference files (Bonnie)
 - Logged <http://b/issue?id=1345286>
- Packaging gfp_gen to support taking input other than compressed avi (George)
 - TAM is short-staffed now, will speak to Venkat when he returns

- New Feature Rollout Heads Up/Training

- V32 Release notes compiled by Tony. Take a look and use the playground if needed.

- New Process Guidelines

- [Redacted]

- Updates to Partner-facing Collateral and FAQs

- Andy updating docs for V32 - should be launched on Wed
- Will be linked to the new help center
- Help center will have no screenshots, and will obsolete current FAQ

- [Redacted]

- Delay link push to a minipush until it's approved.

- New Policies or Legal Considerations
