hey.

i can't confirm this for sure, but can you guys try to verify this.

are all the videos you've added to your favorites still there?

theres soemthing wrong with the skip video link.

it's hard to "hit". like vertically only a very small pixel section will change the cursor to a hand. the "see my entire profile" link somehow is much more like a real link. can we fix it?

also, "click here to upload videos" should be enabled.

I think "click here to upload videos" should ALWAYS show up. not just on the "how to use youtube" help display. it should show up even after you rate a video. remember, this is how we get people to upload videos.
