vould ye	u be able to populate the live DB but "wire-off" matches for Sony and Universal?	
At launc	'm thinking another strategy would be to populate the DB with Warner+Sony+Universal. , return matches only on Warner content. omepoint in time wire-on Universal content, then Sony.

Hi Jim,

yes, i was testing yesterday and figured the new appname had not been setup yet. no problem, i'm using the old appname YouTube

i also noticed the DB is probably empty ? I did not get any match returned on my testing of about 100 videos.

Thanks Franck

Hi Franck,

Our systems reported that someone sent an IDRequest with the appname of YouTubeAMYT and we denied it. I assume this was you testing the new setup. We have now enabled the three new appnames. They still all go to the one new server with the smaller database.

I've been talking with Lou today and he's made a lot of progress on the encoding string issue and Beyonc?. I think he is close to an answer that will work for everyone.

Jim
