Protective Order at
Request of Defendants

Oh ya. To just put in my thinking here.

We should disallow the user for uploading the same video more than once. We should also remove the originals from duplicate videos across all users. However, we should never disallow the same video posted by "different" people. We had this discussion a while ago. Because people may have different privacy settings, different comments, share options, so on, we have to keep them separate.
