Israel is only popular because of what the American media does for it, in America people don't get half of the story they just get the side of little miss "victim" Israel.
but thank god for the Internet and when it comes to Israeli's why would any one believe them first it was Jesus now its the Palestinians, they think there above international law's and that they can do what ever they want, and because of America's government there getting away with it....Stand Up To Israel..SUTI
