What is the Amazon Associates program?

Amazon Associates is one of the first online affiliate marketing programs and was launched in 1996. The Amazon Associates program has a more than 12 year track record of developing solutions to help website owners, Web developers, and Amazon sellers make money by advertising millions of new and used products from Amazon.com and Endless.com. When website owners and bloggers who are Associates create links and customers click through those links and buy products from Amazon.com or Endless.com, they earn referral fees. It's free to join and easy to use.

Provide customers the convenience of referring them to a trusted site where they can immediately purchase the products you advertise on your site. And when they do, you can earn up to 15% in referral fees.

Take advantage of various Amazon retail promotions and leverage our newly created advertising features to drive traffic and earn referrals.
