Subject: Phone call regarding broadcast signals carried on the internet

Hello Ronald,

Thank you for taking my call earlier today regarding broadcast signals carried on the internet, I would like some clarification.

Does the FCC govern the Internet? <http://www.fcc.gov/cgb/internet.html> seems to make it clear it does not.

Does the FCC govern broadcast television distributed over the Internet?

Does the FCC govern the Internet retransmission of broadcast television from a cable system?

Best regards,

--
