## Sarah Palin's New Book: Leaked Excerpts

Well, look what popped up five days early: leaks from Sarah Palin's forthcoming memoir/manifesto, *America By Heart*, in which the reality TV matriarch rants against 'talent deprived' reality TV stars, lauds daughter Bristol's chastity, and celebrates not aborting Trig.

Our favorite Wasilla-obsessed blog Palingates was the first to post excerpts from *America By Heart*. The book is currently in distribution centers, awaiting its official release on Tuesday. We got our hands on some of the pages, too! Here's an annotated guide to our favorite parts, featuring rants against the media and new material about Bristol and Levi.

The book is dedicated to Trig, and opens with a Tea Party 'awakening':

Like the mainstream media that she reviles, Palin delights in recounting her favorite protest signs—including a naked one of Levi! Ew. Sarah Palin saw her daughter's baby daddy naked!

Later, Palin laments the 'self-esteem-enhanced but talent deprived performers' of *American Idol* (Gosh, who does that remind you of?) as a metaphor for liberal entitlement, starting halfway down the page on the right:

Later, Palin posits that her chaste reality star daughter is a better role model than the fictitious Murphy Brown, a single mother who was a total slut.

After trashing Candice Bergen's sitcom character, Palin launches into a Christmas letter round-up of what all her fabulous children have accomplished this year:

She also describes the 'most unfortunate circumstance' of daughter Bristol's pregnancy. Meanwhile, grandson Tripp's inferiority complex is coming along nicely.

Tripp may have been a mistake, but he is 'beautiful.' So beautiful is the Palin family, that Sarah sometimes wonder if she should hide them from the rest of America, who can be so cruel:

"Let's just go back to Wasilla and stop feeding the media beast," she imagines herself saying. "Let's give ourselves and our family a break." Wiser words have never failed to be spoken. At the moment of her greatest sorrow, Sarah found strength in blind-deaf-mute communist Helen Keller:

But Sarah Palin will not be silenced. She will persevere, and fight for the rights of fetuses. Here, Palin argues that pro-choicers infantilize women and execute infants:

That's why she didn't abort Trig:

Suddenly, that 'I'm glad you're here' dedication to Trig seems awfully macabre.
