R&D Overview

Family Systems™ technologies are created to help individuals, families and organizations expand the benefits of the technologies all around us. The World Wide Web, telephones, fax machines, digital recording...all these have tremendous untapped potential to help people live and work together more effectively. Family Systems is leading the movement toward simplified, more productive collaboration for all.

This site was developed using **Family Systems Ibook** technology.

Visit www.ibook.com to learn more about Family Systems Ibooks for use by you or your organization.

We develop our family systems in four stages:

Stage 1) **Assembly of existing components.** This allows us to check out basic ideas and platforms.

Stage 2) **Prototyping** to get functionality we can test out internally. No Family Systems product is published into general release unless it has been used extensively and habitually by staff and affiliates in the Family Systems network.

Stage 3) **Pre-publication launches** that refine functions and present technologies in a form suitable for wide-scale adoption.

Stage 4) **Production launch.** All features ironed out for stable productive use, resulting in happy smiling faces, our only measure of success.

Here is a listing of Family Systems technology either already available or in development:

Family Systems ibooks®

[ibook® Controller](#)

Create and manage interactive books on private and public webs. Ibooks are your key to collaboration.

[ibook® Server](#)

Host your own Ibooks on our servers or yours. Ibook Server software is always free.

[Fax Processor](#)

Web publishing of documents received by fax.

[Progress List](#)

Create and manage task lists.

[MySharer](#)

MySharer automatically and transparently publishes files to the Internet. Makes web publishing easy for non-technical users.

Audio Recorder Technology

Telephone Recorder Record, index and access teleconference calls.

Catch up on exactly what was said even if you couldn't attend the meeting.

Transcriber

Transcribe teleconference calls and other voice recordings. Family Systems Transcriber is for professional or personal use.

Audio Publisher

Fast and easy publishing of MP3 recordings of your conference calls.

And from the Family Systems Labs...

Verbol

The programming language for everyone because you extend it yourself to control processes important to your life.

Music Play Along

Learn to play your favorite musical performances using a fully synchronized sound-visual-tactile experience. Share your Play Along files with others.

Glossarizer

Indexes and annotates large amounts of text helping to create your own knowledge base.
