UNDER CONSTRUCTION

[Family Systems](#) operated by [Brian Reynolds](#) is demonstrating and publishing ibook systems based on open source technology. Please check out our Personal Voice System demo at voice.ibook.com and letter from Brian [Invitation to Cooperate](#).

[Ibook System V3](#) adds behaviour to web pages with floating menus above the content which send [verbol](#) messages to the ibook server. We have added innovative voice features in the [Ibook Voice System](#) including [Voicechat](#). Our intention is to enable voice on the web to be as ubiquitous as text. We are publishing this and the other projects listed below using [CC+COOPY](#) open licensing and are also in process of adopting Google Apps for our [ibook domain](#).
