Literary Fiction

"Smartass is a smart, sweet coming of age story, evocative of a half-forgotten America at the cusp of tectonic national—and generational—changes that still deeply resonate. Kelly's narrative and dialogue both crackle and continue to entice with each new work!"

—Rory O'Connor, author of *Nukespeak: The Selling of Nuclear Technology and Friends, Followers and the Future, How Social Media are Changing Politics, Thwarting Big Brands, and Killing Traditional Media*

"Brian Kelly's 'Smartass' promises us a wild horse ride in its opening lines and it delivers, but the book itself is more like a time machine that takes us to a vanished time in American life. For people of his generation it will be a bittersweet nostalgic journey and for the young it will reveal a time and place where not only could a black man never become president, he was often forbidden to eat at the same lunch counter as whites. It's important that the younger generation feels how close all that is in time and "Smartass", among other things, does just that."

—Richard Lourie, author of *Stebrow* and *The Autobiography of Joseph Stalin*

"With a black man in the White House, racial politics in America is alive and well. Brian Kelly's novel, Smartass takes us back to a time when America was just beginning to emerge from its nasty history of bigotry and hate. But more than a nostalgic trip down a not so rosy memory lane, the story is a reminder of how far we've come and how far we still have to go. Bravo."

—Richard Stratton, author of *Altered States of America*

Brian B. Kelly became the first person in Harvard's long history to complete the requirements for a BA in English while still a sophomore. After meeting requirements for a second major, he graduated from Harvard with honors in 1967. *Smartass* is his second book. Currently he is working on *Commie Spy! The Life and Times of a Soviet Patriot From Brooklyn*, a novel based on the life of his friend Joel Barr, the close friend of Julius Rosenberg. He lives in New York City.

PLANET EARTH

iBooks

The fiction of Arthur C. Clarke has spanned the universe. He has carried us across unimaginable distances to alien times and places. Yet he has not lost sight of his home. Many of his greatest stories are set—or have their roots—right on planet earth.

For Arthur C. Clarke, more than any other science fiction writer, "home" is the entire Earth, through all of space and time. In this book, he shows us around his home to share his wonder. He invites us to share his vision and his dream.

Includes "On Golden Seas," never before collected in any Clarke book

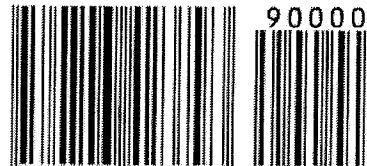

With a Preface by science fiction Grand Master Isaac Asimov, and notes by the author. Illustrated by Hugo Award winning artist Michael Whelan

RON FORTIER has been a professional writer for over twenty-five years. He has worked on such series as *The Incredible Hulk*.
