**\*\* (NEW) Douglas Brooks** *This why I chose the Tassimo over the Keurig. I like capuccinos and the Tassimo is much better than the Keurig for this. I was in BBB today and I noted that there was a K-cup labled capuccino. Basically it was powdered creamer mixed in the... same cup with the coffee. I'm not sure how that would have turned out.*

*So long as Sbux is still with Tassimo you'll have that variety. But if the news stories are true, Sbux may be trying to bolt from Tassimo. If that happens, than they may take Seattles and Tazo Teas with them. That would surely reduce our choices.*

- ... Lisa Byington *This looks like the Tassimo T45 i bought last month (to replace the original Tassimo i bought 5 yrs ago). Love that the water no longer has to drain out the front and that i don't have to wait long for water to heat ... but otherwise it seems the same. What's different about the Brewbot??* November 15 at 2:00pm · Like · Unlike ·

Any chance Starbucks espresso T-discs will be available without the milk creamer in the future? I would love that for some of my favorite iced drinks that I make with milk!

My husband and I just bought the T-65 and we are loving it! I can now have my latte when I can't get to the closest Starbucks (35 miles away)! I think I just found my traveling barista to have at my Spa Parties! Want more information contact me at [www.lattesandspas.com](http://www.lattesandspas.com)
