Crichlow v. Youssef, et al.

12-cv-7774 (NSR)

On May 19, 2021, the Court issued an Order instructing Plaintiff to show cause in writing on or before June 18, 2021 as to why this action should not be dismissed for want of prosecution. (ECF No. 170.) On May 20, 2021, the Clerk of the Court mailed a copy of the Order to Plaintiff at his address on the docket.

On June 22, 2021, following no response from Plaintiff, the Court issued an Order dismissing the action. (ECF No. 171.) On June 23, 2021, the Clerk of the Court mailed a copy of the Order to Plaintiff at his address on the docket.

On July 21, 2021, the Court received a motion for reconsideration from Plaintiff (attached, ECF No. 172) indicating that Plaintiff never received the Court's May 19, 2021 Order to Show Cause and reasserting the merits of Plaintiff's action.

Defendants are directed to respond to Plaintiff's motion on or before August 5, 2021. The Clerk of the Court is kindly directed to mail a copy of this endorsement to *pro se* Plaintiff and show service on the docket.

Dated: July 22, 2021
White Plains, NY

SO ORDERED.

EXHIBIT A

Application granted. Defendant Fuller's motion to dismiss shall be served and filed in accordance with the following schedule:

- (1) Fuller shall serve and file his moving papers on May 14, 2021;
- (2) Plaintiff shall serve and file his opposition papers on June 18, 2021; and
- (3) Fuller shall serve and file his reply papers, if any, on June 25, 2021.

The Clerk of the Court is respectfully directed to terminate the motion sequence pending at Doc. 150 and to mail a copy of this Order to Plaintiff.

SO ORDERED.

April 16, 2021

v. Annucci, No. 18 Civ. 3222 (PMH)

This Office represents Defendants¹ in the above referenced action. I write, to respectfully request an extension of time for newly-served Defendant Fuller to file his motion to dismiss the Second Amended Complaint from April 30, 2021, to May 14, 2021 (Dkt. No. 148). The grounds for this request is that the undersigned is actively preparing for trial, in the action of Magalios v Peralta, 19-cv-6188 (SDNY), which is to be tried before Judge Cathy Seibel commencing April 26, 2021. The parties anticipate that the trial will take between four and six days.

This is the first request for an extension of time for Defendant Fuller to file his motion to dismiss. There is currently a motion to dismiss pending on behalf of Defendants Annucci, Makowski, McCoy, Sipple, Cole, Keyser, Fitzpatrick, Burnett, Holloran, Puerschner, Karson, Jordan, Gilmore, Kolher, Skjeveland, Layton, Buchanan, Askew, Korobkova, Moshier, Wolf, Proulx, and LaPenna, with reply due May 14, 2021. (Dkt. No. 149). I did not seek Mr. Chrichlow's consent, as his status as an incarcerated plaintiff pro se requires communicating by mail and I wanted to make this request forthwith.

I thank Your Honor for your attention to this matter.

Respectfully submitted,
/s/ Jessica Acosta-Pettyjohn
Jessica Acosta-Pettyjohn
Assistant Attorney General
Jessica.Acosta-Pettyjohn@ag.ny.gov

CRICHLow, KEVIN
ADMIT 4/18/11
DR. ARLISS
DOB 11/29/63
MR # 00-07-04
ENCOUNTER # 727

MRI OF THE RIGHT WRIST:

CLINICAL HISTORY: Pain, tendinitis.

Axial fat-saturated T2, coronal T1 and fat-saturated T2 and sagittal T1 weighted images were obtained. This examination is submitted for interpretation on 02/14/2011. The exam is limited as coronal T1 and axial T1 weighted images were submitted, but have extensive artifact and are non-diagnostic. No old examinations or plain films are available for comparison.

There is no evidence of acute fracture or dislocation. There is no evidence of cortical destruction or periosteal reaction. There is no evidence of abnormal bone marrow signal that would be consistent with bone marrow edema or bony contusion. There is no evidence of avascular necrosis. There is no evidence of intramuscular hemorrhage or tear. There is no evidence of any abnormal intramuscular signal. There is a complete and full thickness tear of the scapholunate ligament with increased distance between both scaphoid and lunate. There is no evidence of any other complete and full thickness tear or rupture of any of the intrinsic ligaments of the wrist. There is no evidence of complete and full thickness tear or rupture of any of the tendons that traverse the wrist. There is no significant tendinopathy, no evidence of partial thickness tear or tendinitis. There is fluid in the extensor tendon sheaths consistent with a tenosynovitis. There is no other significant tenosynovitis identified. The triangular fibrocartilage demonstrates no evidence of abnormal signal, no evidence of tear. There is fluid in the distal radioulnar joint, first carpo-metacarpal joint, and radiocarpal joints. There is no evidence of subcutaneous mass or abnormality. There are mild-to-moderate degenerative osteoarthritic changes identified.

IMPRESSION:

1. Full thickness tear of the scapholunate ligament.
2. Extensor tenosynovitis.
3. Fluid in the radiocarpal, first carpal-metacarpal and distal radioulnar joints.
4. Mild-to-moderate degenerative osteoarthritic changes.
5. Examination limited, as described.
