EXHIBIT L

Praise jesus,ala, and anything else, we have finally landed a major
player. While it is still going to take a few months to get things
rolling, They are Rolling! I appreciate you hangin in there Mark.

We have a friend acting as admin for the time being. He runs a local
isp, he has taken me through your code and I am amazed at everything you
put together. You know your shit man that's for sure.
If it would be agreeable with you once the funds start, I would like to
pay you 500 a month till I am paid in full. I would like to pay more but
we are litterally on the edge of bankruptcy. My house is still for sale
but I owe my ass at this point and am trying to budget things out to pay
everybody back. This geico close will really help in and of itself and
it will help close a few others.
My friend requests the root or admin password for the mysql so we can do
a much needed back up and would also like to know if you have patched
anybugs or if the system is still using just php3. Any other info you
think would help, will help.
Truly Mark it was never my intention to have you wait this long. Its my
first time around the database company track and I really really mistook
how long the process would take. I am sorry for that and a close like
this for geico couldn't have happened without your commitment.

I am sure your up to your neck in finals but if you could confirm the
500 a month and send me the info anton will need I would really
appreciate it.
Good luck on your tests,
--pceglia
