Updating of the US State Trademark Database is provided by license with and permission of CT Corsearch.

+ Indicates that our trademark database for this state contains images, packaging samples and specimens of use filed with trademark applications.

* Because of the manual nature of data collection for Puerto Rico, we are unable to guarantee that all records through the coverage date are included.

In-Use Information

In-Use Information shows whether and how potentially conflicting trademarks are being used on the Web. We provide information, when available, on the citation, its owner and its use in commerce for up to 25 Group One citations per data source (USPTO, State, Common Law Database, Business Names and Gale Group Database). The search results included in this section are a selection of the information available at the time of the preparation of this search report, and are not a comprehensive representation of the Web. Any of the Web links included in your search report may become unavailable at any time following the preparations of this report.

Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

Analyst InformationName: **ANN ARNOLD**

Comments: **I developed the following search strategy to provide a comprehensive, accurate report. These queries, listed below, retrieved 367 potential references from the database. After careful review and analysis I have selected 315 records for your review.**
