Updating of the US State Trademark Database is provided by license with and permission of CT Corsearch.

+ Indicates that our trademark database for this state contains images, packaging samples and specimens of use filed with trademark applications.

\* Because of the manual nature of data collection for Puerto Rico, we are unable to guarantee that all records through the coverage date are included.

In-Use Information

In-Use Information shows whether and how potentially conflicting trademarks are being used on the Web. We provide information, when available, on the citation, its owner and its use in commerce for up to 25 Group One citations per data source (USPTO, State, Common Law Database, Business Names and Gale Group Database). The search results included in this section are a selection of the information available at the time of the preparation of this search report, and are not a comprehensive representation of the Web. Any of the Web links included in your search report may become unavailable at any time following the preparations of this report.

Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

Owner Information

Owner Information provides business information about the last reported owner of a trademark, based on a programmatic matching of USPTO, State and certain Common Law trademark records and any business information associated with the trademark owner. We do not guarantee the accuracy of the programmatic matching nor the accuracy of the business information provided by our third party vendors.

Analyst Information

Name: **JOEL FELDMAN**  
 Comments: **I developed the following search strategy to provide a comprehensive, accurate report. These queries, listed below, retrieved 50 potential references from the database. After careful review and analysis I have selected 6 records for your review.**

 Goods/Services: **WEB-HOSTED SOFTWARE APPLICATION FOR USE IN THE DESIGN, CREATION AND PUBLICATION OF BOOKS, PHOTOBOOKS, COOKBOOKS AND CALENDARS; SOFTWARE FOR USE IN THE DESIGN, CREATION AND PUBLICATION OF BOOKS, PHOTOBOOKS, COOKBOOKS AND CALENDARS; DESKTOP PUBLISHING**

With the emergence of the Web as an important common law source, our analysts search the web and include potentially conflicting marks in this Web Common Law section.

Data Information

Our Search Analysts search the Web and select marks to include in your report based on the mark's similarity to the mark being searched and to the goods and services specified. The selected citations provide examples of potentially conflicting occurrences and include links to the Web page(s) on which the mark was found.

For Web Search Extensions, we search the mark and focus on targeted industry-specific Web sites where significant commerce takes place for each of the industries we cover. This focused research can reveal marks that may otherwise be hard to identify.

Important Notices

Due to the dynamic nature of the Web, citations may become available or unavailable at any time. The search results included in this section are a sampling of the information available at the time of the preparation of this search report, and are not a comprehensive representation of all Web sites. Any of the citations included in your search report may become unavailable at any time following the preparation of this report. Additionally, please be aware that we do not filter Web content, which makes it possible that your Web Common Law citation may include objectionable material.

## Welcome to the website of Jason Lu

"Yanse" is Colour in Chinese. The reason for choosing this subject matter is that colour is actually an illusion and what we see is a mutation of vibrations of energy which objects transmit and we in turn translate into forms and hence into objects. These energies are, on the one hand 'unleashed', as they burst out into the atmosphere in waves to our brains, and, on the other hand, they are leashed together to form the thoughts and concepts we are taught and which are constrained or 'leashed' into linguistic terms we call 'words'. Thoughts are words, words become thoughts - logic versus creativity, unleashed versus leashed.

The underlying link between these works is the framework. Once again, a frame is what 'leashes' the work, but in this collection the frame is flexible, blurring the subjective boundaries between what is leashed and unleashed on both a physical and an abstract level. This is an attempt of reflecting the dichotomy that lies within me, the ying and yang as it were, call it what you wish, positive and negative, light and dark, leashed and unleashed!

I wasn't prepared for this having not long left my childhood behind. I was stripped down to my naked soul from where I had to struggle to being able to speak only 20 words of English, communication was virtually impossible so I felt alienated at school.

In-Use Information

In-Use Information shows whether and how potentially conflicting trademarks are being used on the Web. We provide information, when available, on the citation, its owner and its use in commerce for up to 25 Group One citations per data source (USPTO, State, Common Law Database, Business Names and Gale Group Database). The search results included in this section are a selection of the information available at the time of the preparation of this search report, and are not a comprehensive representation of the Web. Any of the Web links included in your search report may become unavailable at any time following the preparations of this report.

Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

Owner Information

Owner Information provides business information about the last reported owner of a trademark, based on a programmatic matching of USPTO, State and certain Common Law trademark records and any business information associated with the trademark owner. We do not guarantee the accuracy of the programmatic matching nor the accuracy of the business information provided by our third party vendors.

Analyst Information

Name: **JOEL FELDMAN**  
 Comments: **I developed the following search strategy to provide a comprehensive, accurate report. These queries, listed below, retrieved 19 potential references from the database. After careful review and analysis I have selected 2 records for your review.**

Important Notices

Due to the constantly changing nature of the Internet, and the reasons detailed below, it is possible that the status of domain names may change between the time this report is generated and the time you receive this report. Therefore, we strongly recommend that you conduct additional domain name searching before attempting to register a domain name or forming a final opinion on the availability of a trademark or domain name.

- \* The dynamic nature of the Web allows for the registration of new domain names virtually continuously, 24 hours a day.
- \* All steps are taken to ensure the completeness and accuracy of our database. However, due to registrar/registry administrative procedures during domain name registration, some domain names may not be present in our database.
- \* Domain name registrars do not report domain names which are not currently registered, nor do they report domain names which may be "on hold" with the registrar.
- \* All domain names cited in this report should be considered to be REGISTERED as of the time this report was generated.
- \* For common names, retrieval may be limited to the identical spelling of the name as ordered.

Due to the nature of the Web, and because we do not filter Web content, it is possible that the Web Page Lookups included in this report may contain objectionable material. If you wish to avoid the possibility of receiving such material, please contact us to "opt out" of Web Page Lookups.

Data Information

This report is the result of a computerized search of our database of top-level domain names. Our database is regularly updated with domain name data from all ICANN-accredited registrars and covers the following suffixes:

.com - commercial (unrestricted use)  
.org - non-profit organization (unrestricted use)  
.net - network (unrestricted use)  
.edu - educational institution  
.gov - U.S. Government agency  
.info - information (unrestricted use)  
.biz - business

This report covers domain names updated to our database as of the following date: **JUN 28, 2007**

Data Information

The General Services Administration(GSA) no longer allows updates of .gov domain names.

**Please Note:** Our last update to the .ca (Canadian country code) domain name file was on December 11, 2000, when authority for .ca domains was transferred from the University of British Columbia to the Canadian Internet Registration Authority (CIRA) and file updates became unavailable. Further updates are not expected to become available unless CIRA develops a policy to allow the distribution of domain name information. Meanwhile, an additional search of CIRA's .ca records has been performed for identical domain names. Any identical URLs found are reported in the Canadian Common Law section of this report.
