

Exhibit A**WELCOME!****Petition to Congress**

A Petition Against the Military and Intelligence Agencies' Use of Organized Stalking and Electronic Torture

We will collect as many signatures as we can to present to our representatives
sometime this year (2010). The link to sign this petition is listed below.

Preamble

Since at least the early 1950's, the US government has been secretly researching mind control technologies. And although there were a few volunteers, the vast majority of experiments were conducted without the subjects' knowledge or consent, many of which were brutal and even fatal.

After Congress was alerted to these abuses, such as the CIA's MKULTRA Project, and hearings were held in the late '70's these programs were officially dismantled. However, in reality, they continued unabated according to government whistleblower accounts and the experiences of targeted individuals (TI's). And now, nearly 60 years later, the technology has evolved to a point where most people would find unimaginable. Because of the secrecy surrounding these programs, government agencies will not acknowledge the existence or use of their invasive practices and technologies, which are designed to avoid detection or blame for the offending parties. The elements of power, control, and money have come together to make these instruments some of the most diabolical that man has ever created and have destroyed the lives and livelihoods of many thousands of law-abiding American citizens. And its victims so far have had nowhere to turn for help.

We believe that Congress must face its responsibilities to its constituents whose rights to privacy are being violated and once again commence an investigation and hearings into the covert activities and abusive practices of the US intelligence agencies.

To: United States Congressional Members

We, the following petition signers, and United States citizens, believe that we have become victims of covert harassment in a variety of forms, including: electronic and electromagnetic (EM) device assaults by the use of exotic EM weapons of the military(1) and intelligence agencies, organized stalking, computer tampering, mail tampering, vehicle tampering, workplace mobbing, and surreptitious home entry and break-ins.

Some of this may be unauthorized human subject experimentation. Directed Energy Weapons exposure occur in a manner, which leads us to believe is unauthorized human testing by the military/intelligence agencies. This is specifically prohibited in U.S. law and by the Nuremberg Code, internationally.

Subjection to this harassment has many unpleasant and negative results. Some victims have found themselves isolated from friends and family, experiencing the loss of familial comforts and affection. Many have experienced economic deprivation, and more severe deprivations.

We believe that these invasive intrusions into our personal lives may well be caused or related to, acts of government intelligence agencies, corporations, contractors as 3rd parties acting under the authority of government intelligence agencies, and/or individuals, with malicious intent.

We, the signers and organized groups, through various means have found each other and realize that we have many commonalities of experience, the most pertinent being, the awareness of these activities, perpetrated by covert harassment groups. They seem to be networked nationwide, and perhaps, worldwide. Many may represent a rogue group, in our own government.

These groups seem to have targeted victims for physical, emotional, and psychological trauma. Many citizens have experienced very negative impacts as a result of this harassment.

We have come together and formed working groups, to investigate these acts, seek legislation, to foster awareness, and an end to these described abuses, which occur using secret, highly-advanced surveillance and exotic military technologies. (1)

We call upon Congress and local governments to listen to our complaints, support our very real concerns, and convene hearings, on this unlawful harassment. We are also asking our legislators to draft legislation, and if necessary, educate themselves and the public about the ever-increasing threats to our personal freedoms, by these covert groups, possibly acting under color of law, but actually in legal violation of it, using technologies which may be yet unknown to the public.

The Fourth Amendment of our Constitution guarantees us freedom from unnecessary search and seizure. Harassment by these electromagnetic devices, and these individuals, is an unnecessary search and denies us this right.

We are therefore petitioning the United States Congress to commence an immediate investigation, hearings, and legislation regarding the military and intelligence agencies' use of electronic torture and organized stalking on law-abiding American citizens.

Thank you for your attention and concern to this urgent and distressing matter.

Sincerely,

(Signature Pages Follow)
