| J. KENNETH BLACKWELL, et al., | : | |
| | : | |
| Defendants. | : | |

AFFIDAVIT OF MATTHEW M. DAMSCHRODER

1. My name is Matthew M. Damschroder, I am over 18 years of age and under no legal disability. I have personal knowledge of the facts attested herein.
2. Since June 2003, I have been the Director of the Franklin County Board of Elections.
3. For the November 2, 2004 General Election, Franklin County had a total inventory of 2,904 voting machines and 845,720 registered voters in the county for a total machine to registered voter ratio of or one machine for every 292 registered voters in the county (rounded up).
4. In November 2005, the County selected a new voting system pursuant to federal and state law (Help America Vote Act of 2002 and Sub. H.B. 262, 125th General Assembly). Based on the requirements of state law (Am. Sub. H.B. 66, 126th General Assembly), Franklin County was required to purchase voting machines sufficient to have a starting inventory ratio of one machine for every 175 registered voters as of January 1, 2005 less an estimated number of registered voters expected to be purged from the Franklin County rolls under the National Voter Registration Act during 2005. The estimated purge number was provided by the Office of the Ohio Secretary of State. Franklin County presently has an inventory of 4,565 voting machines.
5. As of October 23, 2006, there are 766,490 qualified electors for the November 7, 2006 General Election in Franklin County.
6. In accordance with state law (R.C. §3501.11(I)), the Franklin County Board of Elections met in open session on October 20, 2006 and approved the deployment of 4,450 voting machines at a precinct-by-precinct ratio of one machine for every 170 registered voters as of August 29, 2006, with a minimum of three machines in every precinct. The voting machine allocation, as adopted, meets or exceeds the state minimum precinct machine allocation ratio of one machine for every 175 qualified electors casting ballots at most recent election for the office of Governor (R.C. §3506.12 and Secretary of State Directive 2005-07), with the exception of three precincts in which the total number of electors casting ballots at the last gubernatorial election exceeds the total number of qualified

electors now registered in the same precinct. An additional 27 voting machines are assigned to the main office of the Franklin County Board of Elections for in person absentee and provisional voting. The balance of the machines, approximately 88, is available for deployment on Election Day in the event of machine failure. (See Exhibit 1.)

7. Based on projections by the Office of the Ohio Secretary of State, statewide turnout is expected to be approximately fifty-four percent (54%); based on this projection, one can expect approximately 413,905 total voters to cast ballots in Franklin County at the 2006 General Election. Based upon the countywide allocation of voting machines (4,450) there will be one voting machine for every 94 qualified electors expected to cast ballots on November 7, 2006.
8. As a result of additional changes to state law permitting early voting by mail or in person at an office of the county Board of Elections, approximately 100,000 absentee ballots have been requested for the November 7, 2006 General Election for voters desiring to vote early by mail. Approximately 24% of the total qualified electors expected to turnout for this election have already requested ballots. Of these, approximately 75,000 have already been returned to the Board of Elections (as of the close of business November 4, 2006). Reducing the State's estimate of total registered voters expected to cast ballots in Franklin County at the November 7, 2006 General Election by the total number of absentee ballots requested to date yields 313,905 total voters expected to cast ballots in their home precinct on a voting machine on Election Day. Using this estimate, there will be one voting machine for every 71 qualified electors casting ballots in their home precincts on Election Day.
9. As a result of the high turnout of absentee voters, the supply of pre-printed absentee ballots at the Franklin County Board of Elections has been exhausted. The inventory of pre-printed absentee ballots for many ballot styles has completely run out and the Board has been utilizing its limited "ballot on demand" printing capability to print ballots as the turn-around time necessary to re-order ballots from its commercial printer exceeded the number of days between the time the ballots for any given ballot style ran out and the days remaining until the election. At this late date, it is impossible to supply each of Franklin County's 834 precincts with sufficient paper ballots, whether printed "on demand" at the offices of the Franklin County Board of Elections or by the Board's contracted commercial printer, that will comply with state law and thus be eligible to be counted.

Further affiant sayeth naught.

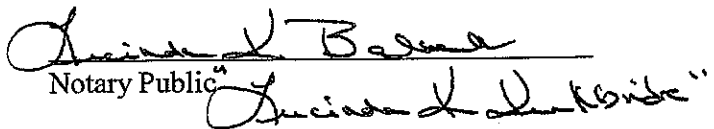

Matthew M. Damschroder

Sworn to and subscribed before me a notary public for the State of Ohio, this 5th day of November, 2006

Note 1: If every qualified elector (as of 8/29/06) were to vote at their precinct on 11/7/06, the total county machine allocation per voter would be 1:169 (standard rounding). Assuming 100,000 qualified electors vote early by mail or in person at the offices of the Franklin County Board of Elections (over 100,000 have already requested ballots to do so) and the balance of the qualified electors (as of 8/29/06) vote in person at their precinct in 11/7/06, the total countywide machine allocation per voter would be 1:146 (standard rounding).

Note 2: There are three precincts (Columbus 20-A, Columbus 73-A, and Reynoldsburg 1-E) where the 2006 machine allocation of 1:170 qualified electors as of 8/29/06 with standard rounding yields fewer machines than the ratio of 1:175 machines to actual 2002 General Election voters. This occurs because there are fewer qualified electors registered in those precincts as of 8/29/06 than cast ballots at the 2002 General Election as a result of the addition of precincts to those wards or the redrawing of precinct boundary lines in those wards since 2002.
