Dear Sir:

Preliminary to examination, please amend the above-identified patent application
as follows:

Claims Amendment

In the Claims:

Please cancel claims 1-38, without prejudice. Please add the following new claims:

39. A system for providing traffic information to a plurality of mobile users connected to a network, comprising:
- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
 - (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;
 - (c) said computer system including a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;
 - (d) at least one of said mobile user stations providing a request to said computer system for traffic information together with a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations and providing to said one of said mobile user stations information representative of selected portions of said traffic

information database based on said respective geographic location of said one of said mobile user stations; and

- (e) said one of said mobile user stations displaying graphically on said display information representative of selected portions of said traffic information database.

40. The system of claim 39 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

41. The system of claim 40 wherein said computer system compares data from said mobile user stations with said data derived from said traffic monitors before updating said traffic information database.

42. The system of claim 39 wherein said at least one of said mobile user stations is a cellular phone.

43. The system of claim 39 wherein said mobile user station further comprises a memory capable of storing a map database.

44. The system of claim 43 wherein said mobile user station displays a selected portion of said map database.

45. The system of claim 39 wherein each said mobile user station provides longitude and latitude information to said computer system.

46. The system of claim 39 wherein said location of said one of said mobile user stations is displayed graphically.

47. The system of claim 39 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic conditions.

48. The system of claim 39 wherein said computer system further comprises a map database, and said computer system compares said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

49. A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
- (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;

- (c) said computer system including a map database and a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;
- (d) at least one of said mobile user stations providing a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations; and
- (e) said computer system comparing said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

50. The system of claim 49 wherein said at least one of said mobile user stations is a cellular phone.

51. The system of claim 49 wherein said computer system provides to said one of said mobile user stations information representative of selected portions of said traffic information database based on said respective geographic location of said one of said mobile user stations.

52. The system of claim 49 wherein said mobile user station comprises a display, and said one of said mobile user stations displays graphically on said display information

representative of selected portions of said traffic information database.

53. The system of claim 49 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

54. The system of claim 49 wherein said mobile user station further comprises a memory capable of storing a map database.

55. The system of claim 54 wherein said mobile user station displays a selected portion of said map database and a selected portion of said traffic information database.

56. The system of claim 49 wherein each said mobile user station provides longitude and latitude information to said computer system.

57. The system of claim 49 wherein said location of said one of said mobile user stations is displayed graphically.

58. The system of claim 49 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic conditions.

REMARKS

Prior to examination, please consider the new claims.

Claims Amendment

In the Claims:

Please add the following new claims: claim 60 and 61.

CLAIMS

39. A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
- (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;
- (c) said computer system including a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;
- (d) at least one of said mobile user stations providing a request to said computer system for traffic information together with a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations and providing to said one of said mobile user stations information representative of selected portions of said traffic

information database based on said respective geographic location of said one of said mobile user stations; and

- (e) said one of said mobile user stations displaying graphically on said display information representative of selected portions of said traffic information database.

40. The system of claim 39 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

41. The system of claim 40 wherein said computer system compares data from said mobile user stations with said data derived from said traffic monitors before updating said traffic information database.

42. The system of claim 39 wherein said at least one of said mobile user stations is a cellular phone.

43. The system of claim 39 wherein said mobile user station further comprises a memory capable of storing a map database.

44. The system of claim 43 wherein said mobile user station displays a selected portion of said map database.

45. The system of claim 39 wherein each said mobile user station provides longitude and latitude information to said computer system.

46. The system of claim 39 wherein said location of said one of said mobile user stations is displayed graphically.

47. The system of claim 39 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic conditions.

48. The system of claim 39 wherein said computer system further comprises a map database, and said computer system compares said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

49. A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
- (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;
- (c) said computer system including a map database and a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;

- (d) at least one of said mobile user stations providing a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations; and
- (e) said computer system comparing said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

50. The system of claim 49 wherein said at least one of said mobile user stations is a cellular phone.

51. The system of claim 49 wherein said computer system provides to said one of said mobile user stations information representative of selected portions of said traffic information database based on said respective geographic location of said one of said mobile user stations.

52. The system of claim 49 wherein said mobile user station comprises a display, and said one of said mobile user stations displays graphically on said display information representative of selected portions of said traffic information database.

53. The system of claim 49 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

54. The system of claim 49 wherein said mobile user station further comprises a memory capable of storing a map database.

55. The system of claim 54 wherein said mobile user station displays a selected portion of said map database and a selected portion of said traffic information database.

56. The system of claim 49 wherein each said mobile user station provides longitude and latitude information to said computer system.

57. The system of claim 49 wherein said location of said one of said mobile user stations is displayed graphically.

58. The system of claim 49 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic conditions.

59. A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of traffic monitors, each said traffic monitor comprising at least a detector and a transmitter, said detector providing a signal including data representative of vehicular movement and said transmitter transmitting said signals;
- (b) a receiver that receives said signals transmitted by said traffic monitors;
- (c) a computer system interconnected with said receiver and said network;

- (d) a mobile user station connected to a global positioning system receiver, a display, and a communicating device;
- (e) said computer system providing to said one of said mobile user stations traffic information representative of said signals transmitted by said traffic monitors;
- (f) said traffic information transmitted by said computer system is displayed graphically on said display.

60. (new claim) A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of traffic monitors, each said traffic monitor comprising at least a detector and a transmitter, said detector providing a signal including data representative of vehicular movement and said transmitter transmitting said signals;
- (b) a receiver that receives said signals transmitted by said traffic monitors;
- (c) a computer system interconnected with said receiver and said network;
- (d) a mobile user station includes a display, and a receiving device;
- (e) said computer system providing to said one of said mobile user stations traffic information representative of said signals transmitted by said traffic monitors;
- (f) said traffic information transmitted by said computer system is displayed graphically on said display; and
- (g) wherein less than all available traffic information is displayed by said display.

61. (new claim). A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of traffic monitors, each said traffic monitor comprising at least a detector and a transmitter, said detector providing a signal including data representative of vehicular movement and said transmitter transmitting said signals;
- (b) a receiver that receives said signals transmitted by said traffic monitors;
- (c) a computer system interconnected with said receiver and said network;
- (d) a mobile user station includes a display, and a receiving device;
- (e) said computer system providing to said one of said mobile user stations traffic information representative of said signals transmitted by said traffic monitors;
- (f) said traffic information transmitted by said computer system is displayed graphically on said display; and
- (g) wherein the displayed traffic information geographically encompasses the current geographic position of said mobile user station.

REMARKS

The claims commence on a separate sheet in compliance with 37 CFR 1.75 (h) and 1.21. Claim No. 39, added by the Amendment of June 17, 2003 is included. Two new claims have been added, Claims 40 and 41.

The Examiner is asked to consider the application with the additional claims, and pass this application to issue

DETAILED ACTION

1. This office action is in response to Application Serial No. 10/367,162 filed on February 13, 2003.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 39-58 and claims 59-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 25-38 and claims 1-2 of U.S. Patent No. 6,574,548. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the application encompass the claims of the patents because it is broader.

It is well settle that the omission of an element, and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA 1963). Also note *Ex parte Rainu*, 168 USPQ 375 (Bd. App. 1969). Omission of a reference element of step whose function is not needed would be obvious to one of ordinary skill in the art.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marthe Y Marc-Coleman whose telephone number is (703) 305-4970. The examiner can normally be reached on Monday-Thursday from 9:30 AM - 8:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William A Cuchlinski can be reached on (703) 308-3873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

AMENDMENTS TO THE CLAIMS

This set of claims will replace all previous sets of claims for this application.

Claims 1-38 (canceled).

39 (original). A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
- (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;
- (c) said computer system including a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;
- (d) at least one of said mobile user stations providing a request to said computer system for traffic information together with a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations and providing to said one of said mobile user stations information representative of selected portions of said traffic information database based on said respective geographic location of said one of said mobile user stations; and
- (e) said one of said mobile user stations displaying graphically on said display information representative of selected portions of said traffic information

database.

40 (original). The system of claim 39 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

41 (original). The system of claim 40 wherein said computer system compares data from said mobile user stations with said data derived from said traffic monitors before updating said traffic information database.

42. (original). The system of claim 39 wherein said at least one of said mobile user stations is a cellular phone.

43 (original). The system of claim 39 wherein said mobile user station further comprises a memory capable of storing a map database.

44 (original). The system of claim 43 wherein said mobile user station displays a selected portion of said map database.

45 (original). The system of claim 39 wherein each said mobile user station provides longitude and latitude information to said computer system.

46 (original). The system of claim 39 wherein said location of said one of said mobile user stations is displayed graphically.

47 (original). The system of claim 39 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic

conditions.

48 (original). The system of claim 39 wherein said computer system further comprises a map database, and said computer system compares said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

49 (original). A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of mobile user stations, each mobile user station being associated with a display, and a communicating device to allow each of said mobile user stations to send and receive signals;
- (b) a computer system interconnected with another communicating device and a network, said computer system being capable of sending and receiving signals to and from said mobile user stations;
- (c) said computer system including a map database and a traffic information database, said traffic information database containing data representative of traffic at a plurality of locations;
- (d) at least one of said mobile user stations providing a signal associated with a respective geographic location of said one of said mobile user stations, and in response thereto, said computer system updating said traffic information database based on said geographic location of said one of said mobile user stations; and
- (e) said computer system comparing said signal associated with said respective geographic location of said one of said mobile user stations with said map database before updating said traffic information database.

50 (original). The system of claim 49 wherein said at least one of said mobile user stations is a cellular phone.

51 (original). The system of claim 49 wherein said computer system provides to said one of said mobile user stations information representative of selected portions of said traffic information database based on said respective geographic location of said one of said mobile user stations.

52 (original). The system of claim 49 wherein said mobile user station comprises a display, and said one of said mobile user stations displays graphically on said display information representative of selected portions of said traffic information database.

53 (original). The system of claim 49 wherein said computer system updates said traffic information database based on data derived from a plurality of traffic monitors.

54 (original). The system of claim 49 wherein said mobile user station further comprises a memory capable of storing a map database.

55 (original). The system of claim 54 wherein said mobile user station displays a selected portion of said map database and a selected portion of said traffic information database.

56 (original). The system of claim 49 wherein each said mobile user station provides longitude and latitude information to said computer system.

57 (original). The system of claim 49 wherein said location of said one of said mobile user stations is displayed graphically.

Appl. No.: 10/367,162
Amdt. dated: March 25, 2004
Reply dated: March 29, 2004

58 (original). The system of claim 49 wherein said computer system screens data provided by said mobile user stations to determine whether said data corresponds to actual traffic conditions.

59 (original). A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of traffic monitors, each said traffic monitor comprising at least a detector and a transmitter, said detector providing a signal including data representative of vehicular movement and said transmitter transmitting said signals;
- (b) a receiver that receives said signals transmitted by said traffic monitors;
- (c) a computer system interconnected with said receiver and said network;
- (d) a mobile user station connected to a global positioning system receiver, a display, and a communicating device;
- (e) said computer system providing to said one of said mobile user stations traffic information representative of said signals transmitted by said traffic monitors;
- (f) said traffic information transmitted by said computer system is displayed graphically on said display.

60. (original). A system for providing traffic information to a plurality of mobile users connected to a network, comprising:

- (a) a plurality of traffic monitors, each said traffic monitor comprising at least a detector and a transmitter, said detector providing a signal including data representative of vehicular movement and said transmitter transmitting said signals;
- (b) a receiver that receives said signals transmitted by said traffic monitors;
- (c) a computer system interconnected with said receiver and said network;
- (d) a mobile user station includes a display, and a receiving device;
- (e) said computer system providing to said one of said mobile user stations traffic information representative of said signals transmitted by said traffic monitors;
- (f) said traffic information transmitted by said computer system is displayed graphically on said display; and
- (g) wherein less than all available traffic information is displayed by said display.

REMARKS / ARGUMENTS

In order to overcome the nonstatutory double patenting rejection based on a judicially created doctrine grounded in public policy so as to prevent the unjustified or improper timewise extension of the 'right to exclude' granted by a patent, and to prevent possible harassment by multiple assignees, we include herewith a terminal disclaimer in compliance with 37 CFR 1.321(c).

If the Examiner believes that for any reason direct contact with applicant's attorney would advance the prosecution of this application, the Examiner is invited to telephone the undersigned at the number below.

Respectfully submitted,

TERMINAL DISCLAIMER TO OBTAIN A DOUBLE PATENTING REJECTION OVER A PRIOR PATENT

Docket Number
7116.0006

In re Application of : Bruce W. DeKock

Application No.: 10/367,162

Filed: February 13, 2003

For: SYSTEM FOR PROVIDING TRAFFIC INFORMATION

The owner, Bruce W. DeKock, of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application, which would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. 154 to 156 and 173 as presently shortened by any terminal disclaimer, of prior US Patent No. 6,574,548. The owner hereby agrees that any patent so granted on the instant patent application shall be enforceable only for and during such period that it and the prior patent granted are commonly owned. This agreement runs with any patent granted on the instant application and is binding on the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. 154 to 156 and 173 of the prior patent, as presently shortened by any terminal disclaimer; in the event that it: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. 1.321, has all claims canceled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as shortened by any terminal disclaimer filed prior to its grant.

Check either box 1 or 2 below, if appropriate.

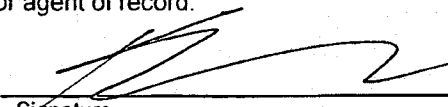

- 1. For submissions on behalf of an organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the organization.

I hereby declared that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

- 2. The undersigned is an attorney or agent of record.

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

- A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.
B. If the status is changed, pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above and notify the United States Patent and Trademark Office of the change in status, or

If the SMALL ENTITY is shown as NO:

- A. Pay TOTAL FEE(S) DUE shown above, or
B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check the box below and enclose the PUBLICATION FEE and 1/2 the ISSUE FEE shown above.
[] Applicant claims SMALL ENTITY status. See 37 CFR 1.27.

II. PART B - FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B - Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DATE MAILED: 06/17/2004

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.
