Web portal war intensifies over communities

Excite bets control is key to attracting ads

By Patricia Riedman

OLINE COMMUNITIES are the most essential portal accoutrements, as evidenced by last week's stock and acquisition activity. And today Excite adds to that competition when it unveils Excite Communities, a free home page-building product, with backend technology supplied by Seattle-based Thrive, which Excite acquired in March.

Excite Communities will try to address some of the criticism lobbed at home page sites, specifically that they have been unable to attract major advertising. In fact, online community GeoCities had

\$4.6 million in revenue, but reported a net loss of nearly \$0 million.

CONTROLLING OPTIONS

Excite Communities hopes to attract ads through a controlled environment. (Excite said it's just beginning talks with advertisers for sponsorship and ad deals.) The service, which is a network of sites organized into categories, has a feature that lets a user select which other users are able to access the site. For instance, a user can have one area open to business associates while another might be open to family members. Even though a user creates the page, all invited community members can help build the site by adding content. Features may include an online photo album, group calendars and group address books. Users can also select the communities they want to be listed under, arrange private chat sessions and leave private or public

Building mass: With the addition of recent acquisition AngelFire, Lycos now says it has 21 million registered users and is the largest online community.

comments on pages.

"This is where it crosses the line between traditional publishing and an enclosed communications tool," said Sean Derringer, Excite Communities product manager, explaining the privacy functions available to users.

"If you look at existing community products," said Craig Donato, VP-product marketing at Excite, most of the traffic to home pages is an individual visiting his or her site. "It's the cul-de-sac of one-and-that's not a great reach scenario for advertisers."

"This aggregates a very targeted audience," he added, "and it aggregates them in a controlled way."

gates them in a controlled way."

LATE IN ENTERING THE RACE

Excite might be late entering the virtual city race. Last week, GeoCities' stock value jumped to \$1.1 billion in an initial public offering. In January, Yahoo! took a 5% million minority stake in the home pages site, which has 21 million members. Yahoo! has links to GeoCities for home page building.

Also, last week Lycos purchased WhoWhere?, which offers free home pages, e-mail and directory services, for \$33 million in stock. WhoWhere? owns home pages site Angelfire, which has 1.1

million registered users. Lycos, which purchased Tripod in February for \$98 million in stock, now claims to be the biggest online community with 11 million registered users.

In making the acquisition, Robert Davis, chairman-CEO of Lycos, brushed off suggestions online communities don't have ad potential. When Lycos bought the online community, Mr. Davis said, "Tripod was a site that had no revenue." He added it's contributing in a "positive way today."

AOL TESTING SITE

America Online is beta testing Hamtown AOL (hamtown.aol.com), a home page-building product divided into 11 communities. And Inktasek is also working on a communities site with AOL, a company it recently acquired.

"A lot of these add-on features, like chat, become commodities," said Melissa Bane, senior analyst at Yankee Group. "I don't necessarily picture these as customer-acquisition but [rather] as customer-retention features."

"I think where more of the opportunities lie for these guys [portal sites] is in acquisition," she added.

In the last six months, online communities "rocketed to the top of traffic on the Web," said Bill Bass, senior analyst at Forrester Research. "I'd think they're pretty important."

"Someone's not going to build personal home pages on six different sites, they're going to build one," he added. □

Unilever speaks up about Internet strategy

By Beth Snyder

WHILE THE industry is abuzz about Procter & Gamble Co.'s interactive strategy and the meeting the consumer goods giant is holding this week in Cincinnati, its chief competitor Unilever is taking a quieter, but still aggressive approach.

Richard Goldstein, president

and CEO of Unilever U.S., said he's not bothered by the fact that P&G is receiving the lion's share of press, and said some Unilever employees will attend the Future of Advertising Stakeholders summit

NOT PLAYING 'ME-TOO' ROLE

"I'd much rather spend money on helping people know our brands," he said last week after giving a keynote speech at the Jupiter Online Conference. Unilever isn't

just spending money on digital marketing advertising because everyone else is, but instead is "de-

convinced we've got to play and we've got to engage our consumers," Mr. Goldstein said.

\$20 MIL IN ONLINE DEALS

Unilever has more than 40 branded Web sites, including one for Ragu spaghetti sauce (www.esLynn.com) and I Can't Believe It's Not Butter (tasteunilever.com). It recently signed deals worth \$20 million with America Online and Microsoft Corp.

The company also inked an agreement with online supermajor NetGrocer that includes exclusive rights to promote, advertise, research and market Unilever products. These initiatives are just getting under way.

Mr. Goldstein said he views the company's initiatives as experiments about how to work with brands and consumers in the digital age.

"This is truly experimental. For me, it's the same as investing in having scientists play with molecules in order to come up with a
