## **EXHIBIT 6**

#### Case No. 2:13-cv-893

#### Exhibit E: Infringement of U.S. Patent No. 7,895,178 by Defendant Google

The following analysis shows how each claim element is literally present. In the event that a claim element is deemed to be missing under a literal infringement analysis (e.g., due to claim construction), Rockstar reserves the right to demonstrate the presence of a substantial equivalent of such an element and to pursue infringement under the doctrine of equivalents.

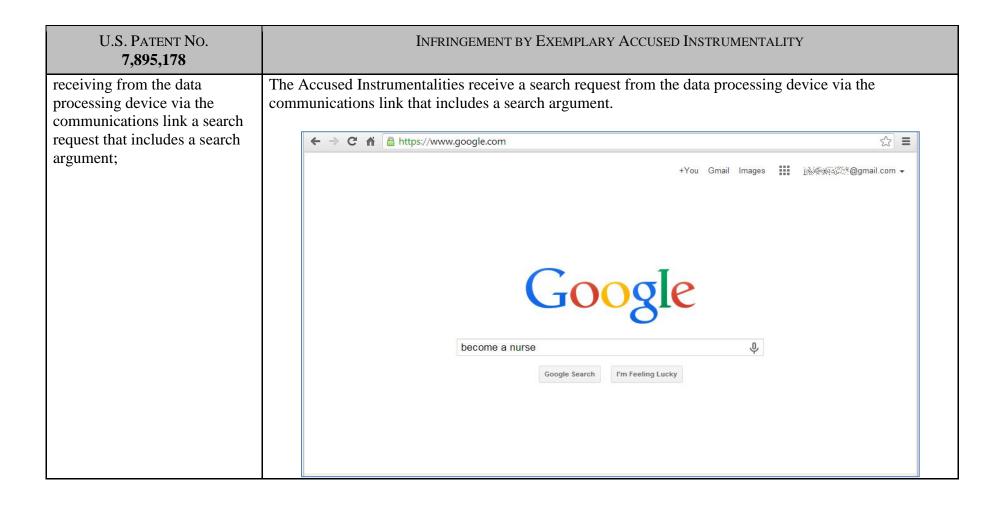

To the extent that the descriptions below give rise to either direct or indirect infringement, Rockstar alleges both.

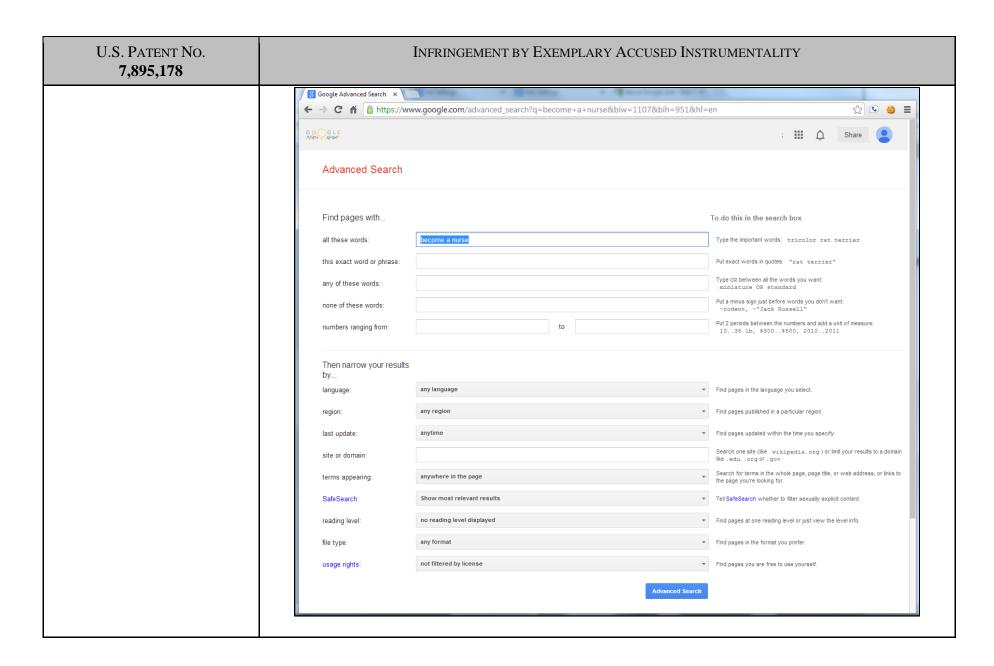

The screenshots below constitute exemplary results of the Accused Instrumentalities' algorithms and source code and do not serve to limit the scope of alleged infringement. Rockstar alleges infringement by the Accused Instrumentalities at each applicable level of abstraction, *i.e.*, source code, algorithms, infrastructure, etc. Further, Rockstar alleges infringement by third-party applications "powered by" Google or that otherwise rely on the Accused Instrumentalities.

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality		
	Claim No. 1		
A method for operating an advertising machine implemented on at least one computer to provide advertisements via a communications link to a data processing device of a user, the method comprising:	Google's advertising services and applications perform the steps of the claimed method. The infringing services and applications include but are not limited to Google Ads, Google AdWords, and Google AdWords Express (or similar functionality) used in conjunction with google.com, the Google Search app, the Android search bar, Google custom search, Google premium search services, youtube.com, Google search services provided to third party websites such as Custom Search Services or AdSense for Search, and any Google-owned property that matches advertisements based in part on a received search term (hereinafter the "Accused Instrumentalities").		

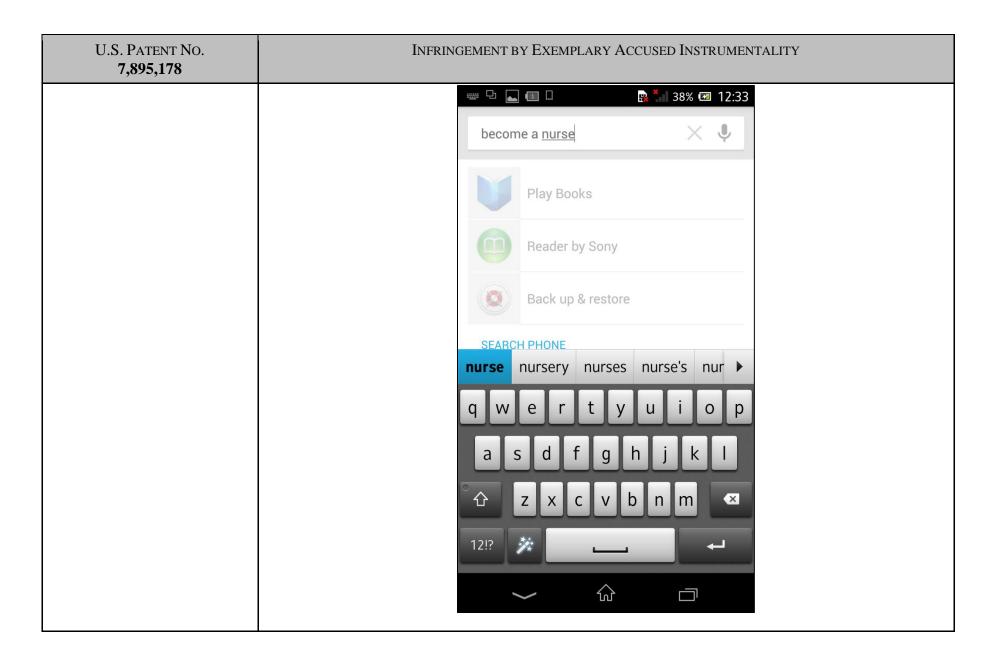

<sup>&</sup>lt;sup>1</sup> Content demonstrating that preamble elements are found in the accused instrumentalities shall not be construed as an admission that the preamble is limiting.

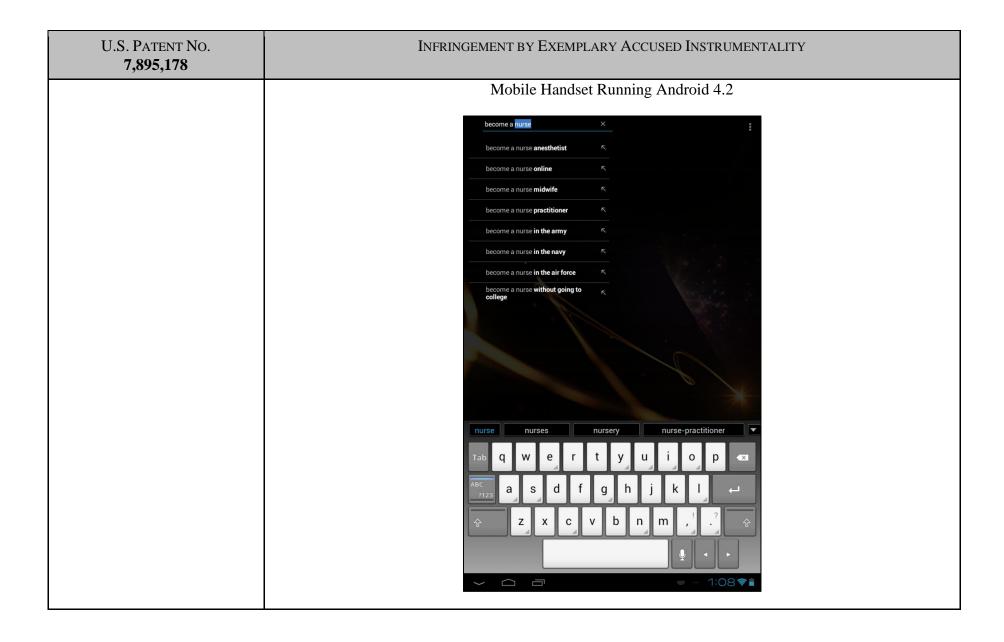

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	About the Google Search Network
	The Google Search Network is a group of search-related websites where your ads can appear, including Google search sites and search sites that partner with Google to show ads, called search partners. Ads are matched to search results based on the terms a person uses to search. With a few exceptions, described below, text ads are the main ad format used on the Google Search Network.
	Where your ads can appear
	When you target your campaign to the Search Network and add keywords to your campaign's ad groups, your ads can appear on Google and other search sites based on the keywords you choose:
	<ul> <li>On Google search sites: Ads can appear alongside, above, or below search results on Google Search, Google Shopping, Google Maps, Google Images, and Google Groups.</li> </ul>
	Google Goodle Go
	<ul> <li>On other sites that are part of the Search Network (search partners): Ads might appear alongside or above search results on our <u>search partners'</u> sites, such as AOL.</li> </ul>

searching at least one database using the search argument to produce search results;	The Accused Instrumentalities search at least one database using the search argument to produce search results.  See above.	
	Finding information by crawling	Organizing information by indexing
	We use software known as "web crawlers" to discover publicly available webpages. The most well-known crawler is called "Googlebot." Crawlers look at webpages and follow links on those pages, much like you would if you were browsing content on the web. They go from link to link and bring data about those webpages back to Google's servers.  The crawl process begins with a list of web addresses from past crawls and sitemaps provided by website owners. As our crawlers visit these	The web is like an ever-growing public library with billions of books and no central filing system. Google essentially gathers the pages during the crawl process and then creates an index, so we know exactly how to look things up. Much like the index in the back of a book, the Google index includes information about words and their locations. When you search, at the most basic level, our algorithms look up your search terms in the index to find the appropriate pages.
	websites, they look for links for other pages to visit. The software pays special attention to new sites, changes to existing sites and dead links.	The search process gets much more complex from there. When you search for "dogs" you don't want a page with the word "dogs" on it hundreds of times. You probably want pictures, videos or a list of
	Computer programs determine which sites to crawl, how often, and how many pages to fetch from each site. Google doesn't accept payment to crawl a site more frequently for our web search results. We care more about having the best possible results because in the long run that's what's best for users and, therefore, our business.	breeds. Google's indexing systems note many different aspects of pages, such as when they were published, whether they contain pictures and videos, and much more. With the Knowledge Graph, we're continuing to go beyond keyword matching to better understand the people, places and things you care about.

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Using keyword matching options  - Use matching options with your keywords to help control which searches can trigger your ad.  - When choosing the appropriate match type for a keyword, we typically recommend starting with broad match to maximize your potential to show your ads on relevant searches.  - Use the search terms report to monitor which keyword variations triggered your ads.  Keyword match types help control which searches can trigger your ad. For example, you could use broad match to show your ad to a wide audience or you could use exact match to hone in on specific groups of customers.	
	In general, the broader the keyword matching option, the more traffic potential that keyword has. Conversely, the narrower the keyword matching option, the more relevant that keyword will be to someone's search. Understanding these differences can steer you in choosing the right keyword matching options and can help you improve your return on investment.  https://support.google.com/adwords/answer/2497836?hl=en	
	How similar keywords match to search terms	
	Your ads are eligible to appear based on the similarity of your keywords to the search terms a person enters when they're searching on Google or our search partner sites. Only one keyword can trigger an ad per search term.  Check out the examples below to learn what happens when multiple keywords in your account match a search at the same time.  https://support.google.com/adwords/answer/2756257?hl=en	

U.S. PATENT No. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	How ads are matched to geographic locations	
	<ul> <li>AdWords allows you to target customers in the geographic locations that you've chosen, so your ads can appear in the areas where you do business.</li> <li>Location can be determined either by someone's physical location, or locations that they've shown interest in (known as locations of interest).</li> <li>You can use your advanced location options to choose whether you'd like your ad to appear for someone's physical location, locations of interest, or both (which is the default setting).</li> </ul>	
	Where your users are located (physical location)	
	The AdWords system uses a number of factors to determine someone's general physical location and whether to show your ad. When possible, we determine general physical location based on someone's computer or mobile device location.	
	• IP address:	
	Location is typically based on the Internet Protocol (IP) address, which is a unique number assigned by Internet Service Providers to each computer connected to the Internet.	
	If a mobile device is connected to a Wi-Fi network, we may detect the mobile device's IP address to determine physical location. If the mobile device is connected to a mobile carrier's proxy server, we may use the carrier IP to determine the device's location.	
	Device location:	
	If users have enabled precise location sharing on a mobile device, we can detect the device location, and use on the search network, from one of the following sources based on availability:	
	<ul> <li>GPS: Accuracy varies depending on GPS signal and connection.</li> <li>Wi-Fi: Accuracy should be similar to the access range of a typical Wi-Fi router.</li> <li>Google's cell ID (cell tower) location database: Used in the absence of Wi-Fi or GPS. Accuracy is dependent on how many cell towers are located within an area and available data, and some devices don't support cell ID location.</li> </ul>	
	https://support.google.com/adwords/answer/2453995?hl=en	

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	About targeting groups	
	A targeting group lets you mix and match targeting settings in one group, and apply them to one or more ads. With AdWords for video, "ad groups" don't exist like they do with other ad campaigns outside this campaign tool.  A single targeting group can contain the following types of targets:	
	<ul> <li>Demographics: Age and gender.</li> <li>Topics: YouTube video or Google Display Network content targeted by category or sub-category.</li> <li>Interests: Pick from available categories to target users interested in these topics, even when they may be visiting pages about other topics. Learn more about interest categories.</li> <li>Placements: Add unique websites or placements within those websites. For example, you can target an entire high traffic blog or the homepage of a popular news site. Placements include:</li> </ul>	
	<ul> <li>Channels (YouTube Partner Channels)</li> <li>Videos (YouTube Videos)</li> <li>Sites (Google Display Network - includes YouTube.com as a publisher site)</li> </ul>	
	<ul> <li>Remarketing lists: Reach viewers based on their past interactions with your videos or YouTube channel. If you've linked your YouTube account to your AdWords account already, we'll create custom ones for you automatically. Learn more about remarketing lists for YouTube.</li> <li>Content keywords (Display Network): These work just like contextual targeting on the greater Google Display Network, but apply only to videos on the entire network (which includes YouTube videos).</li> <li>Search keywords (YouTube Search): These work just like search keywords for a non-video ad campaign, but apply only to search on YouTube.</li> </ul>	
	https://support.google.com/youtube/answer/2454017?hl=en	

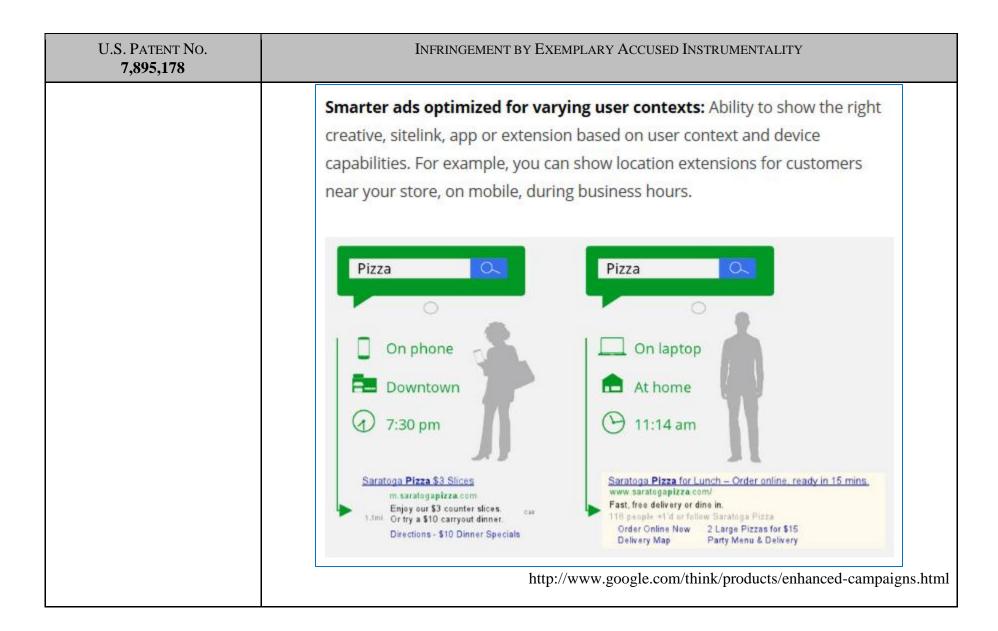

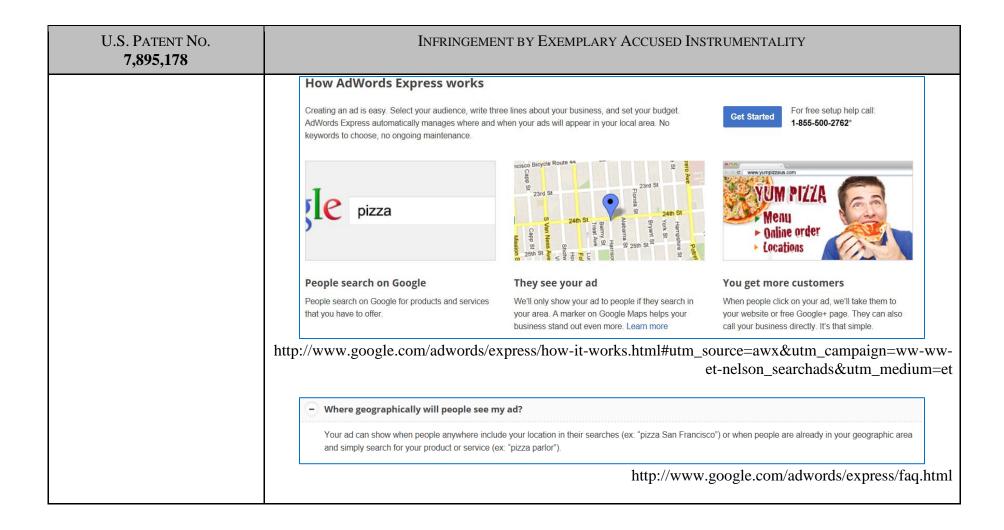

U.S. PATENT No. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
7,895,178	Why you may see particular ads  You may see Google ads on Google Search and related products, Gmail, and sites across the web.  Search ad Gmail ad Display ad  On Google Search  You may see text ads on Google Search results pages and other Google products such as Google Maps. The ads you see may be based on what you searched for, your location, and the time of day. Depending on settings you've chosen, here are some factors that also determine the ads you see:  Recent, previous searches related to your current search Google Web History  Websites you've visited 12 that belong to businesses that advertise with Google Non-personally identifying information in your Google account, like your age and gender Previous interactions with Google's ads or advertising services  Example  You recently clicked a search result for a kayaking website. Later, when you search for "vacations," you might see an ad for a vacation destination where you can kayak.

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality		
	We use different type	kies used by Google s of cookie to run Google websites. Some or all of the cookies identified below may be stored in your browser. You can okies in your browser (though browsers for mobile devices may not offer this visibility).	
	Category of use	Example	
	Preferences	These cookies allow our websites to remember information that changes the way the site behaves or looks, such as your preferred language or the region you are in. For instance, by remembering your region, a website may be able to provide you with local weather reports or traffic news. These cookies can also assist you in changing text size, font and other parts of web pages that you can personalize.	
		Loss of the information stored in a preference cookie may make the website experience less functional but should not prevent it from working.	
		Most Google users will have a preferences cookie called 'PREF' in their browsers. A browser sends this cookie with requests to Google's sites. The PREF cookie may store your preferences and other information, in particular your preferred language (e.g. English), how many search results you wish to have shown per page (e.g. 10 or 20), and whether or not you wish to have Google's SafeSearch filter turned on.	

U.S. PATENT No. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Advertising	We use cookies to make advertising more engaging to users and more valuable to publishers and advertisers.  Some common applications of cookies are to select advertising based on what's relevant to a user; to improve reporting on campaign performance; and to avoid showing ads the user has already seen.
		Google uses cookies, like the PREF cookie, to help personalize ads on Google properties, like Google Search, particularly when you aren't signed in to a Google account. We also use cookies for advertising we serve outside of Google. Our main advertising cookie on non-Google sites is called 'id' and it is stored in browsers under the domain doubleclick.net. We use others with names such as _drt_, FLC, NID and exchange_uid.
		Sometimes a cookie may be set on the domain of the site you are visiting. In the case of our DoubleClick product, a cookie called 'gads' may be set on the domain of the site you are visiting.
		Other Google properties, like YouTube, may also use the DoubleClick cookie to personalize ads. Find out more about ads and YouTube.
		Google also uses various conversion cookies to help advertisers determine how many times people who click on their ads end up purchasing their products. These cookies allow Google and the advertiser to tell that you clicked the ad and later visited the advertiser site. Conversion cookies are not used by Google for interest based ad targeting and persist for a limited time only. These cookies are generally set in the googleadservices.com domain, but may also be set in the google.com/ads domain. Conversion cookie data may also be used in combination with your Google account to link conversion events across different devices you use. Only anonymous conversion cookie data is shared with advertisers.
		Some of our advertising products allow other companies to send their own cookies to your browser. For example, when you visit a page that uses DoubleClick, you may find that cookies are sent to your browser by Google and also by other parties. Each publisher and advertiser may work with various technology and service providers and each of these parties may set its own cookies, though each cookie can only be read by the domain that sets it. This means that several cookies may be sent to your browser by several companies in the time it takes a single web page to load. This is how most online advertising works.
		http://www.google.com/policies/technologies/types/

U.S. PATENT No. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
7,895,178	Set up your ad's target language.  If you try to communicate with others who don't speak the same language, you might find it tough to get your message across. Similarly with AdWords, you want your ads to appear for customers who can understand them. We'll go over how to target the language that your customers speak, so you can be sure to reach the right audience.  With the AdWords language targeting feature, your ads can appear for customers who use Google products and third-party websites in the languages that your campaign targets. This helps ensure that your ads will appear on sites that are written in the language of the customers you'd like to reach.  See the full list of languages that you can target by viewing the "Languages" section of your campaign settings.  How language targeting works in AdWords  Language targeting allows you to choose the language of the sites that you'd like your ads to appear on. We'll show your ads to customers who use Google products (such as Search or Gmall) or visit sites on the Google Display Network (GDN) in that same language. Your ads should be written in the language that you target, because AdWords doesn't translate ads or keywords.  Example  Let's say you sell coffee beans online, and you want to target Spanish-speaking customers. You set up an AdWords campaign targeted to the Spanish language, with Spanish ads and keywords. As long as your customers' Google interface language settings are set to Spanish, your coffee ads can show when your Spanish language customers search for your keywords.

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	4. Better location matching for customers  Features such as postal code targeting in the U.S., have enabled us to show closer and more relevant locations to your customers from within your location extensions. At the same time, if you have a specialty or destination business such as a niche boutique or a ski resort, your location extensions can be shown to people who are located nearby, but who aren't within your business's postal code so you also can attract customers who are willing to travel longer distances to visit your business.  http://adwords.blogspot.com/2012/11/get-local-in-time-for-holidays-and.html	

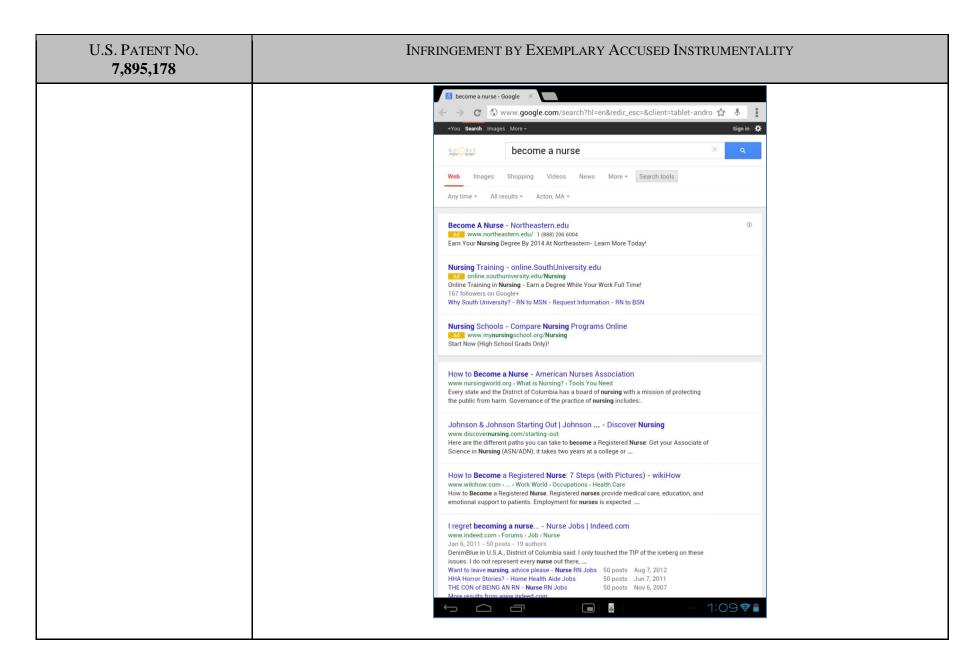

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	One of the biggest reasons why AdWords can be so effective for your business is that it provides the ability to target your ads specifically to your prospective customers. AdWords offers a variety of targeting options, such as language, location, distribution (where your ads appear), and criteria (by keyword or by site). Today we'll cover the first two: language and location.	
	English? Español? Estonian? In this increasingly global marketplace, you may find that your customers don't necessarily all speak the same language (literally). You can take advantage of the language targeting options within AdWords to display ads to users in 56 different languages — everything from English or French to Icelandic and Thai. You can choose your language targeting preferences when you create a new campaign, or change existing preferences under "Edit Campaign Settings." To target multiple languages in a single campaign, hold down the CTRL key and click the languages of your choice.	
	Note: many advertisers ask if Google will translate keywords and ad text into different languages—and no, we do not. The ads will appear just as you've written them. So, for this reason, if you have, say, German customers but don't feel comfortable creating campaigns in German, we recommend that you seek help from professional translators in order to come up with the best ads and keywords for your customers.	
	Advanced example: another question we often hear is whether or not the ad text must be in the same language as the one(s) being targeted, and the answer is no. For example, if you wanted to target French-speaking prospective customers using an ad written in English, you could choose "French" in your language targeting preferences and still submit an English ad. We can't guarantee that the ad will receive a good response, but when Google detects that a user's language preference is French, and he or she types in one of your chosen keywords, your English-language ad may be displayed.	
	Local, Regional, National or International?  If you sell your products or services to customers in a particular area, you may want to consider creating location targeted campaigns. AdWords allows you to target your ads to potential customers in cities, regions, territories, countries, or any area that you define by points on a map. For more detailed explanations, check out our previous post about location targeting.

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Google Search App Running on iOS 7.1

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Find certain types of results
	Some options are not available in all languages or only show if you're signed in to your Google Account.
	At the top of a search results page, you'll see a number of ways to filter your results to see one type of content.  For example, if you're in the market to buy a new camera, search for "digital camera" then click <b>Shopping</b> . Now you'll see all
	sorts of digital cameras to buy. You can then filter by price, brand, size, and more.
	Examples:  • Images
	• Maps • Shopping
	News     Videos
	Books     Flights
	Apps  Filter your results
	Some options are not available in all languages or only show if you're signed in to your Google Account.
	Once you've decided which type of results you want, like <b>Web</b> or <b>Images</b> , you can filter your results even further using <b>Search tools</b> .
	For example, here's how to see pictures of red planets:
	Type planets in the search box.  Click Images.
	3. Click Search tools.  4. Click Color, then select the red filter.

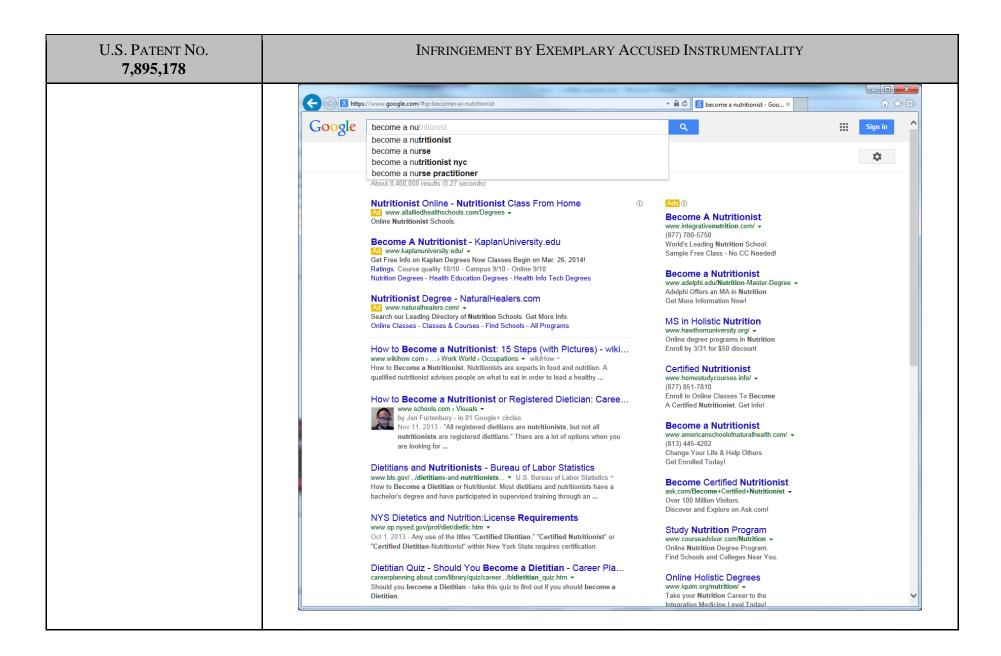

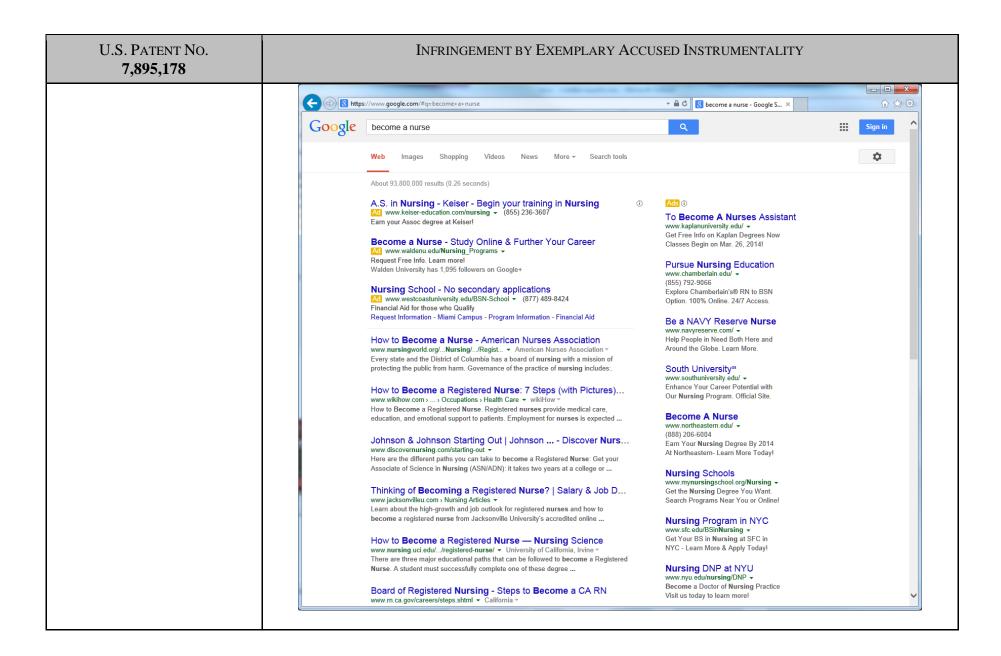

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Search tools will vary based on the type of results you're looking at, but may include:  Publish date: Limit results according to when they were published on the Web.  Verbatim: Search for exact words or phrases \$\mathbb{L}\$.  Dictionary: Find definitions, synonyms, images, and more for your search term.  Reading level: Limit your search results by reading comprehension level \$\mathbb{L}\$.  Private: If you're signed in to your Google Account, you can see content that was shared with you on Google+ or Gmail.  Nearby: See results for your current location.  Visited pages/Not yet visited: If you're signed in to your Google Account and have Web History turned on, you can limit the results to pages you have or haven't already visited.  Images: Filter results by size, type, and color. Learn more about the search tools you can use with Image Search \$\mathbb{L}\$.  Videos: Filter by length of video, quality, and source, like youtube.com.  Recipes: Filter by ingredients, cook time, and calories.  Applications: Choose the price and operating system, or OS, for available apps.  Patents: Select a patent's filing or publishing date, the patent office it was filed in, filing status, and type. You can also do a patent search directly at patents.google.com \$\mathbb{L}\$.  https://support.google.com/websearch/answer/142143?hl=en

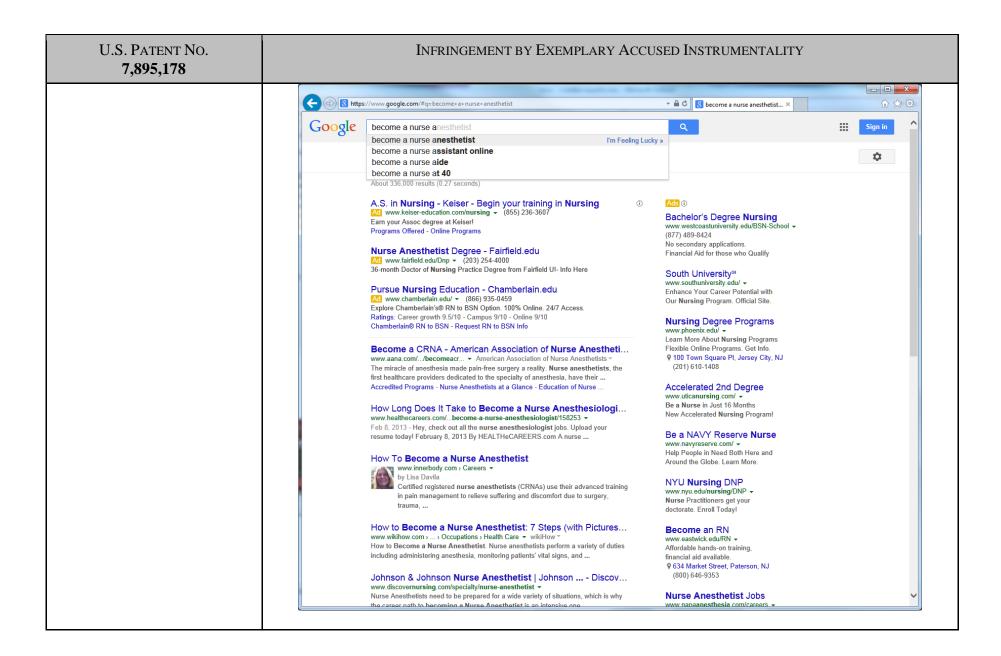

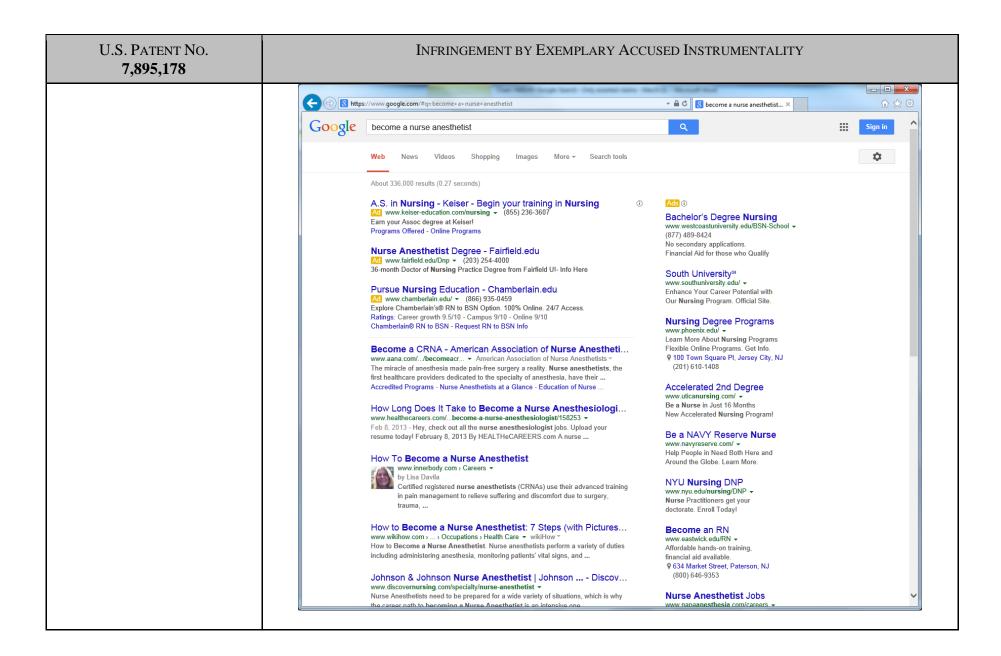

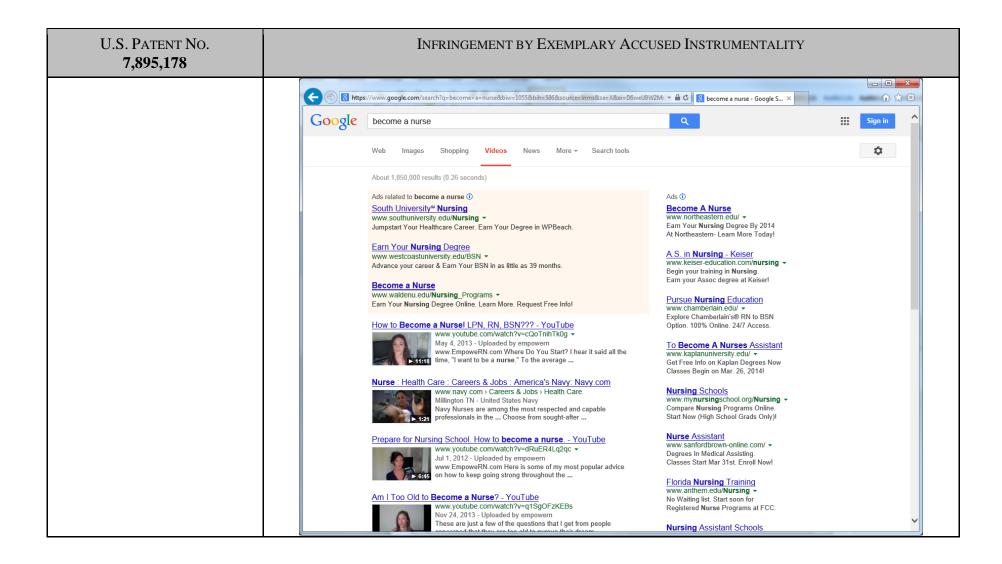

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Context is subtle, and it's not easy for a computer to replicate the kind of contextual understanding humans have in everyday conversation. Yet, despite the challenges, over the past decade context has become a foundational part of search, and it's hard to imagine search without it:
	<ul> <li>Language: What is the language of the search query? The query language is an incredibly basic, yet important signal we rely on to determine the right results to serve. If you type a search in French and we return results entirely in Swahili, you'll be changing search engines very, very fast.</li> <li>Geography: Where was the search conducted? If you're looking to order a pizza, and we send you off to a pizza parlor on the other side of the country, you'll be waiting a long time for delivery.</li> <li>Search queries: What search queries did you type immediately before this one? If you say to me "I'm looking for a card game," and I say to you, "which one?" and then you say "Dominion," and then I say, "The card game or the power company?" you'd be pretty frustrated. It's the same with search.</li> </ul>
	Personalization, a special kind of context "Personalization" is a special kind of context; it's the context of you. For example, what are you interested in, who do you care about, and what do you search for regularly? In addition to the contexts mentioned above, we personalize search results in a couple specific ways:
	<ul> <li>Past search activity: With Web History personalization, we make search results more relevant to you based on your interests, as revealed through the "context" of past queries and clicks. We look at both "pattern" (which site do you generally visit for a given topic) and "preference" (which topics do you tend to be interested in). For example, if you're an apple farmer who frequently visits sites about apple varieties and farming techniques, we'll be more likely to show you results about apples the fruit rather than Apple computers. If you're signed out, we'll still customize your search results based on up to 180 days of past search information linked to your browser using an anonymous cookie.</li> <li>Social connections: With Social Search, we improve your results by relying on the context of your friends, family, coworkers and other people you may care about across the web. We'll sometimes improve the ranking of results if they're more likely to be relevant based on your social connections. We'll also highlight your connections by showing their names and pictures in the results when they've published or commented on content, for example by clicking the +1 button.</li> </ul>

U.S. PATENT No. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
7,895,178	How AdWords works and make the most of your advertising budget, it's important to familiarize yourself with some key building blocks — like keywords, placements, Ad Rank, bids, and Quality Score.  How keywords trigger your ad to appear  Keywords are words or phrases you choose that can trigger your ad to show on search and other sites. For example, if you deliver fresh flowers, you could use "fresh flower delivery" as one keyword in your AdWords campaign. When someone searches Google using the phrase "fresh flower delivery" or a similar term, your ad might appear next to Google search results. Your ad can also appear on other websites in the Google Network that are related to fresh flower delivery.
	Create a list of keywords that are most relevant to yo keywords — rather than more general keywords — to who are most interested in your product or service. If than simply "flower." This improves your ad's perform than simply "flower." This improves your ad's perform like mobile phone apps.  Placements: Advertising on non-search webs  All of the places where your AdWords ad can appear, including Google sites, websites that partner with us, and other placements like mobile phone apps. U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Claim No. 7	
The method of claim 1, wherein the at least one advertisement includes a link to a website sponsoring the advertisement.	The at least one advertisement includes a link to a website sponsoring the advertisement.  See claim 1 above.	
	Destination URL  The URL address for the page in your website where you'd like people to be sent after they click your ad.  • For each ad, you'll specify a display URL (shown to customers with your ad) and a destination URL (used to determine where people are taken when they click your ad). Google's policy is that both URLs be within the same website (meaning that they share the same domain).  • Your destination URL isn't visible in the ad, so you can use it to direct people to a specific page within your site without cluttering your ad. For example, an ad could use a clean display URL like example.com to show with the ad, while using a more specific destination URL like example.com/camera_purchase_page.html to link customers to the most relevant page.  https://support.google.com/adwords/answer/2684490?hl=en	

### Exhibit E: Infringement of U.S. Patent No. 7,895,178 by Defendant Google

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Destination URL	
	What's the policy?	
	The destination URL is the URL that loads when a user clicks your ad. The landing page URL is where users actually end up after passing through any redirects associated with your destination URL. If the destination URL doesn't redirect, the destination URL and landing page URL are the same thing.	
	After clicking an ad, the user should end up on a site that complies with AdWords policy and works properly for all users in all browsers and devices.	
	Requirements	
	Link to a functional site	
	<ul> <li>Your ad's destination URL can't lead to a website that is under construction or that links to an error page that displays a status code beginning with a 4 or a 5 (such as a 405 error). See the bottom of this page for help to fix these errors.</li> <li>Your landing page must work properly for all locations, regardless of where you're targeting your ad.</li> <li>Your website should load quickly on most popular browsers and devices. We recommend avoiding content or features on your site that delay a page's load time and that may make a user think that your site isn't working.</li> <li>Your ad's destination URL can't lead to an email address or a file instead of a webpage. Such files include image, audio, video, or document files that require an additional application to open or run (such as PDF files).</li> <li>If you're using dynamic tracking URLs, they must lead to a valid URL and meet all of the requirements listed here for destination URLs.</li> </ul>	
	Match the domain of your ad's display URL	
	<ul> <li>Your landing page's domain must match the domain of the display URL in your ad. For example, if the website that you're advertising is using the domain "example.com," your ad's display URL must also contain "example.com."</li> </ul>

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Clickthrough rate (CTR)	
	A ratio showing how often people who see your ad end up clicking it. CTR can be used to gauge how well your keywords and ads are performing.  • CTR is the number of clicks that your ad receives divided by the number of times your ad is shown (called impressions). For example, if you have five clicks and 1000 impressions, then your CTR is 0.5%. CTR = Clicks on your ads ÷ Impressions (ad views)  • Each of your ads and keywords have their own CTRs that you can see listed in your account. Find them on your Campaigns tab ©  • A high CTR is a good indication that users find your ads helpful and relevant. CTR also contributes to your keyword's Quality Score which can affect your costs and ad position. Note that a good CTR is relative to what you're advertising and on which networks.	
	You can use CTR to gauge which ads and keywords are successful for you and which need to be improved. The more your keywords and ads relate to each other and to your business, the more likely a user is to click on your ad after searching on your keyword phrase.  https://support.google.com/adwords/answer/2615875?hl=en	
	Clickthrough rate (CTR)	
	The clickthrough rate (CTR) is the number of ad clicks divided by the number of impressions, page views, or queries you received.  CTR = ( Clicks / # of impressions, views, or queries) * 100%  For example, if you received 7 clicks out of 1000 page views, your page CTR would be .7%.	

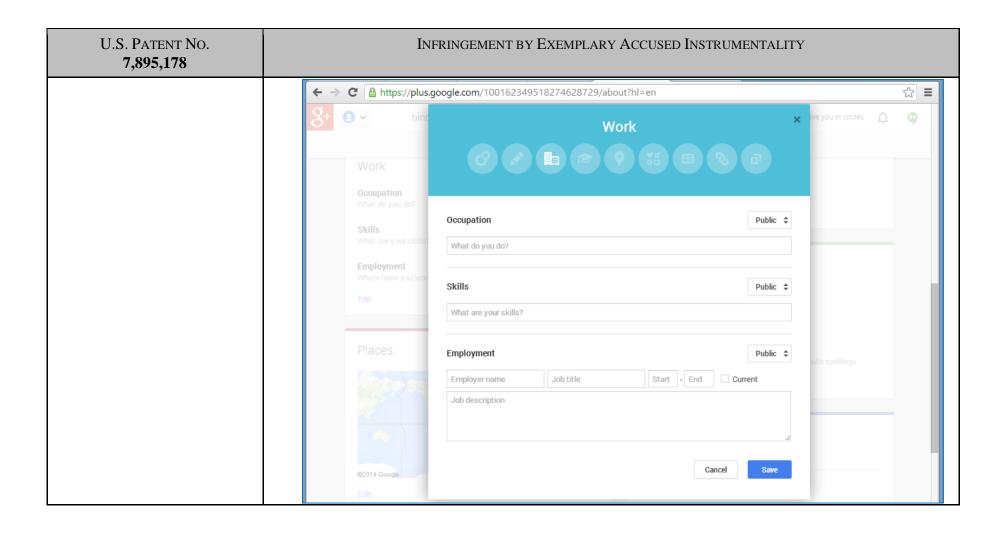

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	https://support.google.com/adsense/answer/112025?hl=en	
updating advertisements provided to the data processing device based upon a determination that the user does not select the at least one advertisement.	Upon information and belief, the Accused Instrumentalities update advertisements provided to the data processing device based upon a determination that the user does not select the at least one advertisement  Ad Rank  A value that's used to determine your ad position, where ads are shown on a page. Ad Rank is calculated using your bid amount and Quality Score.  Understanding AdWords Ad Rank  Learn about how Ad Rank is determined and how to increase your ads' chances of ranking high. Read more about ad rank: http://goo.gl/KawkRW Subscribe to AdWords Help on YouTube: http://www.youtube.com/adwordshelp  • Ad Rank determines your ad position – where your ad shows on the page in relation to other ads.  • The main components of your Ad Rank are your bids and the quality of your ads, keywords, and website as measured by what we call Quality Score. We also incorporate the expected impact from your extensions and other ad formats when computing your Ad Rank. When estimating the expected impact from your extensions and other ad formats when computing your Ad Rank. When estimating the expected impact from your extensions and other ad formats as the relevance, clickthrough rates, and the prominence of the extensions or formats on the search results page. So even if your competition has higher bids than yours, you can still win a higher position at a lower price by using highly relevant keywords, ads, and extensions.  • Your Ad Rank is recalculated each time your ad is eligible to appear, so your ad position can fluctuate each time depending on your competition at that moment.

	Advertising on Google AdWords: An Overview  Tip  New to AdWords? Register for our Online Marketing 101 course to maximize your business online.  AdWords, Google's online advertising program, lets you reach new customers and grow your business. Choose where your ad appears, set a budget you're comfortable with, and measure the impact of your ad. There's no minimum spending commitment. You can pause or stop anytime. Get started at https://adwords.google.com.  https://support.google.com/adwords/answer/3464111?hl=en&ref_topic=3121763&rd=1

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Showing your ads on Google Search and other search sites
	If you use keywords to target your ads, you select a set of keywords related to the product or service you'd like to advertise. Then, when people search using the words or phrases you picked, your text ads can appear alongside or above search results.  On Google search sites: Your ads can appear on Google Search, Shopping, Maps, Images, and Groups when someone searches on your keywords. Here's an example, for the keyword "cupcakes":
	Coogle spaces  Service  The service of the service
	On other search sites that are part of the Search Network: When someone searches on search sites that have partnered with Google to show AdWords ads, such as AOL, your ads might appear alongside or above search results or on other relevant search pages.  On mobile search: Your ads can appear on http://m.google.com 🗗, the mobile version of Google Search. Here's an example of an ad for cupcakes on mobile search:
	AdWords ad on mobile version of Google Search

	Find certain types of results	
	Some options are not available in all languages or only show if you're signed in to your Google Account.	
	At the top of a search results page, you'll see a number of ways to filter your results to see one type of content.	
	For example, if you're in the market to buy a new camera, search for "digital camera" then click <b>Shopping</b> . Now you'll see all sorts of digital cameras to buy. You can then filter by price, brand, size, and more.	
	Examples:	
	Images  Maps  Shopping  News  Videos  Books  Flights  Apps  Filter your results	
	Some options are not available in all languages or only show if you're signed in to your Google Account.  Once you've decided which type of results you want, like Web or Images, you can filter your results even further using Search tools.  For example, here's how to see pictures of red planets:  1. Type planets in the search box. 2. Click Images. 3. Click Search tools. 4. Click Color, then select the red filter.	

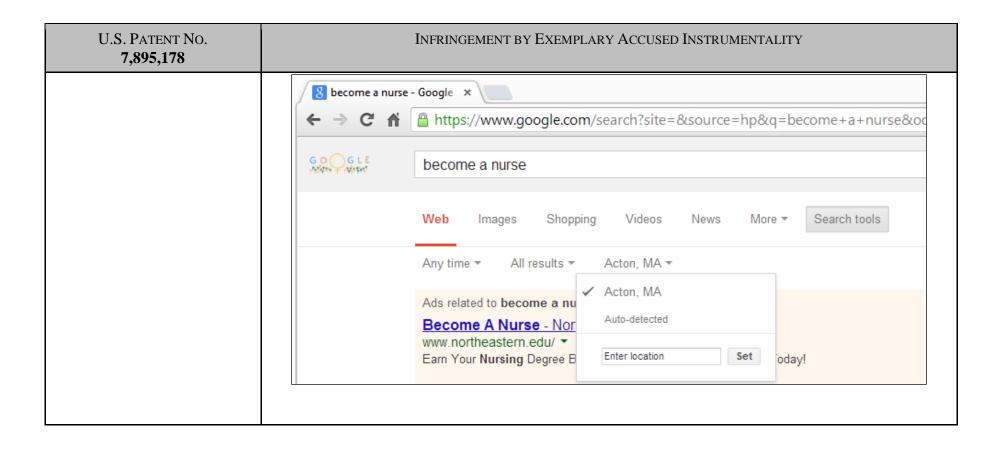

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality		
	Filter your search results  You can filter and customize your results by using the options at the top of the results page. For example, you can choose to just see blogs updated within the last 24 hours, or photos of a certain color.  Settings  Trying to change your search settings? Visit google.com/preferences to change settings like SafeSearch, search history, results per page, languages, and location.		
	How to add filters  1. At the top of your search results page, select a filtering option like Images or News. Click More to see extra choices.  2. Click Search tools to see more filters you can apply to your search. Since your options will be different based on your search and the filters you've already used, you won't see all the options every time.  3. Select one or more filters to narrow down your search results.  4. To go back to unfiltered results, click Web at the top of the search results page.  5. To remove any filters you've added through Search tools, click Clear.  https://support.google.com/websearch/answer/142143?hl=en

When a search filter is enabled and removes some results, the search results output indicates that results were filtered. See Estimated vs. Actual Number of Results for more information about how a filtered result set is identified and for recommendations for displaying the results.  Although the filter=0 option exists, Google recommends against setting filter=0 for typical search requests, because filtering significantly enhances the quality of most search results.  When the Google Search Appliance filters results, the top 1000 most relevant URLs are found before the filters are applied. A URL that is beyond the top 1000 most relevant results is not affected if you change the filter settings.  Back to top					
Language filters limit a search to pages in the specified languages. The Google Search Appliance has built-in language filters that detect the language of a query and return appropriate results. You can combine language filters to further restrict search results.  https://developers.google.com/search-appliance/documentation/68/xml_reference#request_query_term		more information about how a filtered result set is identified and for recommendations for displaying the results. U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Claim No. 16	
The method of claim 12,	The at least one advertisement includes a link to a website sponsoring the advertisement.	
wherein the at least one advertisement includes a link to a website sponsoring the advertisement.	See claims 7 and 12 above.	
	Destination URL	
	The URL address for the page in your website where you'd like people to be sent after they click your ad.	
	<ul> <li>For each ad, you'll specify a display URL (shown to customers with your ad) and a destination URL (used to determine where people are taken when they click your ad). Google's policy is that both URLs be within the same website (meaning that they share the same domain).</li> <li>Your destination URL isn't visible in the ad, so you can use it to direct people to a specific page within your site without cluttering your ad. For example, an ad could use a clean display URL like example.com to show with the ad, while using a more specific destination URL like example.com/camera_purchase_page.html to link customers to the most relevant page.</li> </ul>	
	https://support.google.com/adwords/answer/2684490?hl=en	

#### Exhibit E: Infringement of U.S. Patent No. 7,895,178 by Defendant Google

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality	
	Destination URL	
	What's the policy?	
	The <b>destination URL</b> is the URL that loads when a user clicks your ad. The <b>landing page URL</b> is where users actually end up after passing through any redirects associated with your destination URL. If the destination URL doesn't redirect, the destination URL and landing page URL are the same thing.	
	After clicking an ad, the user should end up on a site that complies with AdWords policy and works properly for all users in all browsers and devices.	
	Requirements	
	Link to a functional site	
	<ul> <li>Your ad's destination URL can't lead to a website that is under construction or that links to an error page that displays a status code beginning with a 4 or a 5 (such as a 405 error). See the bottom of this page for help to fix these errors.</li> <li>Your landing page must work properly for all locations, regardless of where you're targeting your ad.</li> <li>Your website should load quickly on most popular browsers and devices. We recommend avoiding content or features on your site that delay a page's load time and that may make a user think that your site isn't working.</li> <li>Your ad's destination URL can't lead to an email address or a file instead of a webpage. Such files include image, audio, video, or document files that require an additional application to open or run (such as PDF files).</li> <li>If you're using dynamic tracking URLs, they must lead to a valid URL and meet all of the requirements listed here for destination URLs.</li> </ul>	
	Match the domain of your ad's display URL	
	Your landing page's domain must match the domain of the display URL in your ad. For example, if the website that you're advertising is using the domain "example.com," your ad's display URL must also contain "example.com."	
	www.example.com www.example.com

U.S. PATENT NO. <b>7,895,178</b>	Infringement by Exemplary Accused Instrumentality
	Clickthrough rate (CTR)
	A ratio showing how often people who see your ad end up clicking it. CTR can be used to gauge how well your keywords and ads are performing.
	CTR is the number of clicks that your ad receives divided by the number of times your ad is shown (called impressions).  For example, if you have five clicks and 1000 impressions, then your CTR is 0.5%.  CTR = Clicks on your ads ÷ Impressions (ad views)
	Each of your ads and keywords have their own CTRs that you can see listed in your account. Find them on your Campaigns tab ☑
	<ul> <li>A high CTR is a good indication that users find your ads helpful and relevant. CTR also contributes to your keyword's     Quality Score which can affect your costs and ad position. Note that a good CTR is relative to what you're advertising     and on which networks.</li> </ul>
	<ul> <li>You can use CTR to gauge which ads and keywords are successful for you and which need to be improved. The more your keywords and ads relate to each other and to your business, the more likely a user is to click on your ad after searching on your keyword phrase.</li> </ul>
	https://support.google.com/adwords/answer/2615875?hl=er
	Clickthrough rate (CTR)
	The clickthrough rate (CTR) is the number of ad clicks divided by the number of impressions, page views, or queries you received.
	CTR = ( Clicks / # of impressions, views, or queries) * 100%
	For example, if you received 7 clicks out of 1000 page views, your page CTR would be .7%.
