Background

Summary

Specialties: Web search engines.
e-commerce.
Architecture of large systems.

Experience

Experience

Technical Advisor

Proximic
July 2013 – Present (6 months) | Palo Alto

Founder and CEO

Kyron, Inc.
July 2013 – Present (6 months) | Palo Alto, California

Big data meets health care to generate new medical knowledge.

Technical Advisor

Fotopedia
October 2008 – Present (5 years 3 months) | Paris, France

Investor and Technical Advisor

Five Apes
March 2007 – Present (6 years 10 months) | San Mateo, CA

Chief Scientist

Proximic
April 2011 – July 2013 (2 years 4 months) | Palo Alto, CA

Making sense of a Google-size stream of data. In 20 languages.

Technical Advisor

Clearwell Systems
September 2006 – June 2011 (4 years 10 months)

September 2000 – June 2011 (4 years 10 months)

Technical Advisor

Clearwell Systems

September 2006 – June 2011 (4 years 10 months)

Acquired by Symantec.

CTO and Co-Founder

Qwiki

December 2009 – April 2011 (1 year 5 months) | Palo Alto

Art meets Science, and I built the Science. Qwiki won the TechCrunch Disrupt competition in November 2010.

VP of Products

Cuill

August 2007 – September 2008 (1 year 2 months)

Consultant

23andMe

2006 – 2007 (1 year)

Member of Technical Staff

Google

June 2005 – August 2007 (2 years 3 months)

Designed a faceted search engine for Google internal needs.

Board Member

Beatware

July 2003 – December 2006 (3 years 6 months)

Acquired by Hyperion.

eBay Fellow, Director of the Advanced Technology Group

eBay

June 2001 – June 2005 (4 years 1 month)

Created and led a research group now known as eBay Labs.
Redesigned the search back-end of eBay.
Designed the search experience for eBay Express.

CTO and VP of Engineering

BigVine

April 1999 – June 2000 (1 year 3 months)

Kleiner-Perkins backed start-up exploring online barter.

CTO and Founder

AltaVista

December 1995 – April 1999 (3 years 5 months)

Started as a research project by two people (Mike Burrows and myself), AltaVista was the #1 search engine for several years. My initial contribution was the crawler, page processing and front-end code. As CTO I introduced many innovations: unicode index, query suggestions, the BabelFish translation service. I also served as the public spokesperson for AltaVista.

Member of Research Staff

Digital Equipment Corporation

February 1989 – December 1995 (6 years 11 months)

Research on VLSI, CAD tools, software tools, and finally the prototype for the AltaVista search engine.

Member of Research Staff

Xerox PARC

June 1983 – February 1989 (5 years 9 months)

Research on VLSI design and CAD tools.

Post-Doc

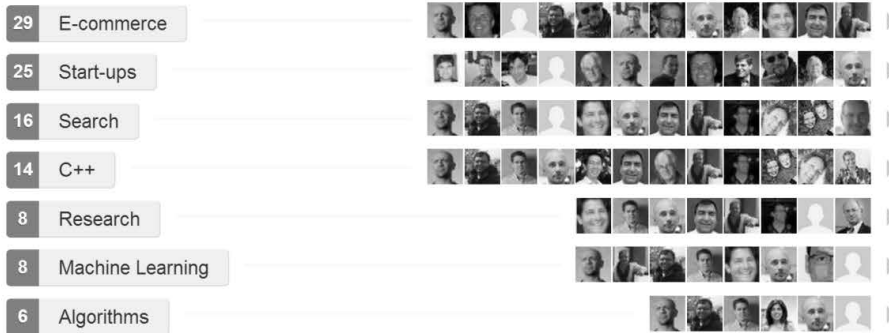

Carnegie Mellon University

1980 – 1983 (3 years)

Worked with H.T. Kung on VLSI design.

Skills & Expertise

Patents

Dynamic query expansion →

United States 6,411,950

Issued June 25, 2002

A dynamic search result refinement for refining a general search query into a more specific search query. For a general search query, a user is presented with a list of more specific queries. The entries in the list selected from a log-file of queries according to the index frequency of each query. The user can choose a new query from the list of more specific queries and run a database search.... [more](#)

Method and apparatus for checking validity of memory operations →

United States 5,613,063

Issued March 18, 1997

A memory monitoring system equips a computer program for monitoring its own memory accesses. The system employs special values, called "VALUEA" and "VALUEB," stored in the memory locations and a table of write tags, each preferably a single-bit flag corresponding to a different one of the memory's locations. If the write tag is not set for a particular memory location, VALUEA within that location... [more](#)

Method and system to display and search in a language independent manner →

United States 10831421

Filed April 23, 2004

A method to facilitate a language independent search includes displaying a search attribute, including an attribute name and a selection of attribute values, to a user and receiving from the user a search attribute value selection corresponding to the attribute name. Then, the attribute name and attribute value selection are translated into language independent symbols, such as numbers. The... [more](#)

Apparatus and Method for Displaying Search Results using Tabs →

United States 179,467

Filed July 24, 2008

A graphical user interface includes tabs representative of different classes of search results. The tabs are derived in response to the processing of a query. The different classes of search results group content by meaning, such that a query term with different meanings produces different classes of search results with different meanings.

Tomas Costello

Method and system to locate a storage device →

United States 8,051,261

Issued November 1, 2011

A method of locating a storage device of a number of storage devices is provided. A request for a data item is received. The request includes a globally unique identifier (GUID) that is associated with a user. A start number is generated based on the GUID, and the storage device that stores the data item is located based on the start number. The data item is then read from the located storage... [more](#)

Method and system to analyze rules →

United States 8,046,321

Issued October 25, 2011

A method and system to analyze rules is described. The system receives a query and applies a first or rules applied to the query and returns counts the second plurality of... [more](#)
