### About Rockstar Consortium

Rockstar is an intellectual property (IP) licensing company. We celebrate the value and power of innovation: the ideas that fuel a better way of doing things. Based on Nortel Networks' groundbreaking innovation engine, Rockstar manages a highly valued patent portfolio relevant to all telecom and high tech services and devices. We count among our most valuable assets a professional staff of technology industry veterans—many of whom were part of Nortel's innovation engine, and are inventors and patent holders themselves.
