▼ Content Providers

With HDML 2.0, content providers can greatly enhance their revenue models by providing secure subscription-based wireless information services right from their existing Web sites. Hundreds of developers have embraced HDML 2.0 to create and extend compelling Web information sites to a global community of mobile subscribers. Developing with HDML is free to any Web site—there's no purchase required—which makes providing information services to millions of digital mobile phones the newest business opportunity on the Web. The following is just a sampling of **Powered-By UP** Web sites that are using HDML 2.0 to publish innovative, interactive information services for wireless handheld devices enabled with UP.Browser.™ Click on a category to find out more about these services:
