EXHIBIT B

Curriculum Vitae
Mark T. Jones

Work Address: US Citizen
302 Whittemore Hall   DOB 3/15/1965
ECE Department   (540) 231-8849
Virginia Tech   mtj@vt.edu
Blacksburg VA 24060

EDUCATION

- Ph.D., Computer Science, Duke University, May 1990
  - Von Neumann Fellowship, Duke University, 1986-1989
- B.S. *summa cum laude*, Computer Science, Clemson University, May 1986
  - R. F. Poole Scholarship, Clemson University, 1983-1986
  - National Merit Scholar, 1983

EMPLOYMENT

- Professor of Electrical and Computer Engineering, Virginia Tech, 6/07 – present
- Associate Professor of Electrical and Computer Engineering, Virginia Tech, 4/00 - present
- Assistant Professor of Electrical and Computer Engineering, Virginia Tech, 8/97 – 3/00
- Assistant Professor of Computer Science, University of Tennessee, 8/93 – 7/97
- Assistant Computer Scientist, Mathematics and Computer Science Division, Argonne National Laboratory, 6/90 – 7/93

PROFESSIONAL HONORS AND AWARDS

Research Recognition
- 2003-2004 VBI Faculty Fellow
- 1st prize and Honorable Mention at AOL-CIT Research Day 2002
- 1995 NSF CAREER Award
- 1995 & 1996 University of Tennessee (Knoxville) Science Alliance Award
- 1994 Atanasoff Best Paper Award, 3rd National Symposium on Large-Scale Structural Analysis
- 1992 Gordon Bell Prize, awarded by IEEE Computer Society
- 1992 Honorable Mention, Intel Grand Challenge Computing Award

Teaching Recognition
- *College of Engineering Dean's List*, Virginia Tech: Fall 1997, Spring 1998, Fall 2002, Fall 2002, Spring 2005

PAPERS IN REFEREED JOURNALS

GRANTS/CONTRACTS
   (Principal investigator responsibilities on the following grants, percentage of responsibility is listed.)
.
- DARPA, "RECE," With BBN, Responsibility 50%, $30,000 , 4/16/09-10/16/09.
- NSF, "Investigating a Novel Embedded Processor Architecture for Electonic Textiles in Wearable and Pervasive Computing," Responsibility 50%, $220,000, 12/1/08-11/30/10.
- NSF, "Fundamental Algorithms to Enable the Simulation of Multi-Scale Biological Systems," Responsibility 50%, $200,000, 9/1/07-8/31/10.
- AFRL, "Phase II: Amorphous Soft-Core Processor for Hardware Anti-Tamper," Responsibility 33%, ~$230,000, 11/1/06-10/31/08.
- Intel, "E-Textile Rug for Gait Analysis, People Tracking and Emergency Directions," Responsibility 50%, $15,000, 6/1/06-12/31/06.
- Carilion, "Quantitative Measurement and Modeling of Early Events in Influenza Pathogenesis," Responsibility 20%, $20,000, 7/1/05-6/30/06.
- AFRL, "Phase I: Wearable Computer for Enhanced Situation Awareness," Responsibility 33%, $30,000, 5/1/06-1/1/07.
- AFRL, "Phase I: Amorphous Soft-Core Processor for Hardware Anti-Tamper," Responsibility 33%, $35,000, 1/1/06-11/1/06.
- MDA, "Phase I: Secure Software Platform for Real-Time Software Anti-Tamper," Responsibility 33%, $29,994, 6/1/06-11/1/06.

- *National Science Foundation* (NSF), "CRI", (e-textiles equipment) Responsibility 50%, ~$80,000, 8/05-7/07.
- *Harris Corporation,* "Exploiting the Reconfigurability of a Software-Defined Radio Platform," $161,070, Responsibility 50%, 9/1/05-6/30/06.
- *DARPA,* "Phase I: Technology for Trusted Circuits," $31,000, 3/1/05-9/15/05, Responsibility, 33%.
- *Harris Corporation,* "Partial Reconfiguration Support for the Harris Programmable Modem Platform," $73,448, Responsibility 50%, 12/01/04-6/30/05.
- *NSF,* "Phase I: An Electronic Textile System for Gait Analysis", $33,000, 1/1/2005-6/30/2005, Responsibility 50%.
- *Office of Naval Research (*ONR). "AWINN." $452,300, 12/20/04-7/31/06, Responsibility 50%.
- *Office of Secretary of Defense,* "Phase II: Reconfigurable Processor Technology for Software Protection," SBIR Subcontract with Luna Innovations, Responsibility 33%, $237,581, 6/04-5/06.
- *NSF*, REU Supplement to ITR: Tailor-Made: Design of e-Textile Architectures for Wearable Computing, NSF, $12,000, 6/1/2005 – 8/31/2005, 50%.
- *Office of Secretary of Defense,* "Phase I: Reconfigurable Processor Technology for Software Protection," SBIR Subcontract with Luna Innovations, Responsibility 50%, $33,000, 8/03-2/04.
- *National Science Foundation* (NSF), "ITR: Tailor-Made: Design of e-Textile Architectures for Wearable Computing", Responsibility 50%, $399,000, 8/02-8/06.
- *NSF,* REU Supplement to above grant, 50%, $10,000.
- *NSF,* REU Supplement to above grant, 50%, $6,000.
- NSF, "A Toolbox of Scalable Algorithms and Software for Advanced Scientific Computing Applications", Responsibility 50%, $300,000, 4/03-4/06.
- *Defense Advanced Research Projects Agency (*DARPA). Computational Fabrics, $217,000, 3/01-12/02. Responsibility 85%. Subcontract from ISI/University of Southern California.
- *Office of Naval Research (*ONR). Secure Configurable Radio. $751,000, 4/00-4/04, Responsibility 50%.
- NSF, SUCCEED. Responsibility 100%. $33,000, 9/1/01-8/31/02.
- *National Science Foundation (NSF)*. Amount: $145,023, 10/99-9/02. Responsibility 100%. Subcontract from Penn State. Research into unstructured mesh algorithms.
- *DARPA*. Amount $411,625, 6/99-6/02. Responsibility 50%. Subcontract from ISI/University of Southern California. Development of algorithms and software for the control of distributed, dynamic sensor networks.
- *DARPA*. Amount $160,000, 10/00-10/01. Responsibility 50%. Subcontact with USC/ISI. Development of algorithms and runtime software for systems of configurable computers.
- *Department of Energy*. Amount: $145,000, 12/98-11/01. Responsibility 100%. Subcontract from Pennsylvania State University. Development of algorithms and software for massively parallel architectures.
- *DARPA*. Amount: $345,574, 9/99-9/01. Responsibility 50%. Subcontract from Xilinx. Development of Java-based tools and applications for fast, flexible run-time reconfiguration of configurable computing devices.
- *DARPA*. Amount: $250,000, 6/99-6/01. Responsibility 50%. Subcontract from Lockheed-Martin/Sanders. Development of an application programming interface, algorithms, and applications for run-time reconfiguration on novel adaptive computing architectures.
- Lockheed-Martin/Sanders, $125,000, 5/00-4/01, Responsibility 50%. A Wireless Link for Remote Telemetry of Compact Airborne System.
- *DARPA*. Amount $169,792, 11/99-10/00. Responsibility 50%. Subcontract from ISI/University of Southern California. Development of algorithms and runtime software for systems of configurable computers.
- *National Security Agency (NSA)*. Amount $75,000, 9/99-7/00. Responsibility 50%. Software for the translation of JBits FPGA programs to EDIF programs.
- *DARPA*. Amount $162,886, 9/98-10/99. Responsibility 50%. Subcontract from ISI/University of Southern California. Construction of an API & applications for the control of distributed systems of configurable computing nodes.
- *NSF*. Amount: $125,881, 7/96-7/99. Responsibility 100%. Career Award: Parallel algorithms and software for unstructured mesh computations.

- *Air Force Research Laboratory*. Amount: $97,425, 11/97-5/99. Responsibility 50%. Research and development of an Internet-based, interactive, decision making program.
- *NSF*. Amount: $85,000, 12/97-12/98. Responsibility 20%. Equipment funding for a 16-node cluster of configurable computers (Tower of Power).
- *NSF*. Amount: $318,807, 7/95-7/98. Responsibility 50%. Scientific applications in a distributed computing environment.
- *NSF*. Amount, $100,000, 1/96-12/96. Responsibility 20%. Equipment funding for an ATM-based cluster of workstations.
- *NSF*. Amount, $10,000, 1996. Responsibility 100%. Funding to support a workshop organized at Argonne National Laboratory.

SOFTWARE

- *SLAAC/ACS API (4/99):* Software for the control of complex systems of configurable computing nodes and high-speed networks. This code is being distributed to the ACS community. Developed in Configurable Computing Laboratory with Peter Athanas.
- *BlockSolve (4/93 & 1/96):* Software for solving large sparse linear systems on distributed memory architectures. This code has been distributed via netlib and ANL ftp and has been accessed by several hundred people as of 4/4/99. Developed at Argonne National Laboratory with Paul Plassmann.
- *LANZ (10/90):* Software for solving the generalized eigenproblem on shared memory architectures. This code has been distributed via netlib and NASA and has been accessed by over 10,000 people as of 4/4/99. Developed at Duke University and Argonne National Laboratory with Merrell Patrick.

TEACHING RESPONSIBILITIES

- Computer Programming
  ECE 2574, *Data Structures*
  ECE 1574, *Engineering Problem Solving with C++*
- Computer Simulation and Modeling
  CS 371, Numerical Analysis
  CS 594, Computational Modeling
- Computer Network, Architecture, and Organization
  ECE 2504, *Introduction to Computer Engineering*
  CS 594, Internetworking with TCP/IP
  ECE 4504, *Computer Organization*
  ECE 4534*, Design of Embedded Systems*
  ECE 5504 (formerly ECE 5515), *Computer and Network Architectures*
  ECE Special Studies: *Configurable Computing*, E-Textiles
  ECE 5984, *Java-Based Configurable Computing*
  ECE 6504, *Applications of Parallel and Distributed Computing*, TV course.
  CS 530, *Computer Systems Organization*
- CEO of DISC, a student-run virtual corporation, for Fall 1998 and Spring 1999.

COURSE, CURRICULUM, AND PROGRAM DEVELOPMENT

Spring 2005 (Virginia Tech): Redesigned the senior level embedded systems design course to focus on modern embedded processors and systems and incorporated a capstone design experience in the course. This course has been incorporated into the curriculum as a required course for computer engineering majors. I have taught the course three semesters, achieving a rating of 3.9/4.0 during the Spring 2006 semester.

Fall 2005 (Virginia Tech): Revitalized the freshman programming course for computer and electrical engineering majors. The new course focused on the design and development of programs in the context of embedded systems. While the course addressed the basics of

object-oriented programming, significant hands-on experiences with an embedded systems platform were incorporated into laboratories and programming projects. In particular, there was a strong emphasis on designing applications that interact with sensors and actuators. The new course was well-received by the students, with a significant improvement in the instructor evaluation over past semesters.

Fall 2001 (Virginia Tech): Designed (and had approved) a course on computational fabrics (e-Textiles). This course focuses on research issues in computational fabrics as well as the background necessary to pursue research in the area. As part of the course, students will create a functioning computational fabric application.

Fall 2001 (Virginia Tech): Designed (and had approved) a course on the design of Internet-based decision support systems. The goal of this course is an object-oriented design and implementation process for DSS in which the students actively participate in the process. Students learn the basics of DSS as well as the software engineering process.

Fall 2000 (Virginia Tech): All freshman wishing to enter the Computer Engineering and Electrical Engineering majors at Virginia Tech must take an introductory object-oriented programming course. Analysis showed that students in this course were not learning to program adequately and had a high percentage of honor code violations. I led an effort to completely revamp the course to address these concerns; modifications included interactive labs and active learning techniques as well as a redesign of the curriculum. Analysis this semester indicates that the students who progressed on in the computer engineering major are now proficient programmers and the number of honor code violations was reduced by over an order of magnitude.

Fall 1999 (Virginia Tech): Developed a new course based on the configurable computing course that I taught in Fall 1998. This new course is refocused to use Java-based tools for developing configurable computing applications. The short project has been changed to be implemented using Java-based development tools and include a short project report. The large application project has also been changed to Java-based development tools. Also, in collaboration with David Lee of 3Com, many of the large application projects in the class will focus on designing and implementing configurable, high-speed network routers.

Spring 1999 (Virginia Tech): Developed a graduate level course on parallel & distributed algorithms based on the textbook by Kumar, et.al. This was a TV course, so I developed presentation slides suitable for that medium. I also developed several programming exercises for parallel implementation on three different parallel computing platforms: a network of workstations, the IBM SP-2, and the Silicon Graphics "Crunch" computer.

Fall 1998 (Virginia Tech): Developed an upper level undergraduate/graduate course on configurable computing. The lecture materials were drawn from research papers and materials from faculty at other institutions. The students were required to complete a small project on configurable computing hardware, followed by a significant application project on configurable hardware.

Spring 1995 (University of Tennessee): Developed a graduate level course on internetworking based on the *Internetworking with TCP/IP* textbooks by Comer. I developed laboratories and lecture notes for the course.

Spring 1994 (University of Tennessee): Developed a graduate level course on scientific computing. As part of the development process, I created lecture materials, reading materials, and laboratories.

PROFESSIONAL SERVICE

- Technical Program Committee: MAMSET 2002, VTC 2003, RAW 2003/2004.
- Reviewer and/or panel participant for various journals, conferences, and agencies, including *SIAM J. on Scientific Computing, SIAM J. on Matrix Anal. & Appl., SPDP, Supercomputing, Journal of Parallel & Distributed Computing, CONPAR 94, HICSS, Int. J. of Supercomputing Applications, ICPP, IPPS, IEEE Tran. on Parallel & Distributed Systems, ACM Trans. on Math. Software, Symp. on Large-Scale Structural Analysis, Applied Numerical Mathematics*, Department of Energy, NIOSH, and the National Science Foundation.

- *Department*: Curriculum Committee (chair and member), Computer Area Committee, Resource Committee, Undergraduate AdCom Committee, Computer Systems Area Committee (chair and member), Social Committee, Web Committee (chair)
- *Centers:* Director for Virginia Tech Information Systems Center (VISC) Spring 1999-Fall 2000
