1 right?

2 A. I think that's possible, yes.

3 Q. Okay. And let's go take a look at, if
4 we can, the search table procedure, if I can, in
5 Column 11 and 12.

6 A. I'm there.

7 Q. Do you see anything in the search table
8 procedure that identifies -- well, first of a
9 let's just be very specific. Is there anything in
10 the search table procedure that reflects
11 dynamically determining the maximum number of
12 records to be removed? I'm looking at the search
13 table procedures Columns 11 through 12. That's
14 all the texts from the phrase search table
15 procedure to the words alternate version of search
16 table procedure.

17 A. No. This will remove all the expired
18 records.

19 Q. Okay. Let's go to the next one. Then
20 in the alternate version of search table
21 procedure. Do you see that?

22 A. Yes, I do.

23 Q. Do you see anything in that section,
24 which is the bottom of Columns 11 and 12 going to
25 the very top of columns 13 and 14 that talks about

1 **the use of removing expired records dynamically**
2 **based on the determination of a maximum number of**
3 **records to be removed?**

4 A. This will remove all the records until
5 the search key is found in the list.

6 **Q. So is it accurate that neither the**
7 **search table procedure identified in Column 11**
8 **through 12 and the alternate version of search**
9 **table procedure specifically address dynamically**
10 **determining a maximum number of records to be**
11 **removed in the access link list of records?**

12 A. That's correct.

13 MR. STERN: I'm done. I've got to
14 catch a flight. I'm going to yield to my
15 colleagues here.

16 MR. BRIGHT: Take a few minutes.

17 THE VIDEOGRAPHER: The time is
18 approximately 3:39 p.m., and we're off the
19 record.
