# EXHIBIT M

## Objections to Bedrock's Exhibits

Google's objections to Bedrock's exhibits are below.  Objections reference the Federal

Rules of Evidence by rule number or are otherwise descriptive.  In addition, in some instances

Google has asserted the following objections, defined as follows:

| | |
|---|---|
| MP | Exhibit is inadmissible because it contains more than one document or is an improper collection of documents. |
| NI | Exhibit is not sufficiently identified as to allow Google to object to the exhibit |
| SD | Exhibit is inadmissible because it pertains to a defendant that has settled |
| MIL | Exhibit is potentially subject to exclusion in whole or in part under a pending motion in limine. |
| Late production | Exhibit was produced after the close of discovery |

Google objects to the fact that Bedrock has not provided Google with information

sufficient to identify certain exhibits.  Google reserves the right to use exhibits to which it has

objected; in some instances Google's objections will not apply, depending on how the exhibit is

used.  Google reserves the right to supplement, modify, or withdraw objections to Bedrock's

exhibits based on the facts, circumstances, or rulings issued by the Court that arise or develop

subsequent to the filing of this document.
